THIRTY-FIVE YEARS AGO.

Paragraphs of News Taken from the Files of the Reporter of 1884.

January 7, 1885.

Eight or ten houses are wanted just now in Centre Hall. Who will build

them?  
Squire Boal's office was burglarized Saturday night. The thief entered by unlocking the door and stole the change in the drawer, amounting to about \$4.50. There was nothing else missing.

Centre Hall will soon have a steam roller flouring mill. Work was begun on digging the foundation last week, and the enterprise will be pushed to completion as rapidly as possible. The mill will be located near the railroad station

to the west of Grenoble's grain house. Its capacity will be 70 barrels per day, with a 40 horse power engine. It will be the first complete roller mill in the county, and all machinery first class.

Married.—On Dec. 18, at the residence of W. Henney, at Centre Hall, by Rev. G. W. Currin, Mr. James H. Lohr, of Centre Hall, and Miss Annie J. Welsh, of Carlisle.

**What Is a "Single-Cure, Wrapped-Tread" Tire?**

It is a tire built by a special process which eliminates the necessity of curing tires under tremendous hydraulic pressure.

Such pressure, used in making ordinary tires, for the sake of quick production, is responsible for the flattening of fibres which results in premature "blow-outs" and limited mileage.

In the "single-cure, wrapped-tread" method, the manufacturer welds together

the various "ingredients" of the tire without jamming or displacing a single element. In this way only is it possible to conserve the native strength and resiliency of the fabric which forms the foundation of long-mileage.

It is the "single-cure, wrapped-tread" process that has made the Globe hand-made tire the longest mileage tire ever produced.
