(Continued from first page.)
 for which he paid \$800 per acre six years ago. He sold it the day before I left for \$1600 per acre. He showed me a check for \$220 for his lemons for last month on the trees. It seems they gather ripe lemons every six weeks. I met another farmer near Los Angeles who sold an orange grove recently for \$4,000 per acre. His oranges netted him last year \$14,000. Are these people boosters? You can't beat it."

"Is it a good country in which to locate?"
 "Yes for the rich. It is the playground for retired capitalists. I believe that some money can be made by intensive farming out there, but it requires a lot of money. You must provide irrigation and fertilizers. For young men without money, it is no good. For health and pleasure it is delightful."

"Do you know the most delightful sight that greeted Mrs. Spangler and myself in returning from the coast? The sight of a running stream of water. All the creeks and rivers of California

and the West until you reach Iowa are as dry as punk; not a drop of water in them, with the sole exception of the Colorado, over which we passed at night! That beautiful stream of running water in Iowa was certainly good to look upon."

"Would you invest any money in oil lands, orange groves, etc., in that section?"
 "No; unless you go and stay with it. Otherwise you don't have a chance in a million to get it back."
 "Would you like to live there permanently?"
 "No; Pennsylvania is good enough for me. Here nature furnishes the irrigation and the fertilizer. Our crops of corn, wheat, etc., vastly exceed the crops in California. If intensive farming were carried on here, regular garden farming etc., the results would be greater than there. But fruit cultivation with irrigation beats the East."
 "Old Pennsylvania, take it all in all, is still the Premier State of the forty-eight. I expect to live my life right here."
