**TREAT OATS AND WHEAT FOR SMUT**

Reports Show That It Pays to Use Formaldehyde at Time of Planting Crops.

**WORK OF DIFFERENT AGENTS**

Practically None of Fields Given Treatment Showed Any Signs of Disease—Farmers of Porter County Lost \$140,000.

(Prepared by the United States Department of Agriculture.)

Evidence that it pays to treat wheat and oats at the time of planting with formaldehyde to prevent smut is given in reports of a number of demonstrations conducted by Indiana county agents. Fields of oats in DuBois county, sown with seed treated with formaldehyde for smut as recommended by the United States department of agriculture and the State Agricultural college, showed practically none of the disease, while fields planted from seed not treated contained about 15 per cent smut, according to the local county agent's report.

Work in Warren County. As a result of the demonstration conducted by the county agent in Warren county it was found that a plot of oats planted with untreated seed showed 33 per cent smut, while another plot in the same field planted with treated seed was free from the disease. Other oat fields throughout the county that were not treated were infested with the disease in amounts varying from 7 to 35 per cent.

As the result of the damage done by wheat smut in Porter county, farmers will lose about \$140,000 on the crop, according to statistics compiled by the county agent. In checking up the damage done by smut the agent found that the disease had caused 7 per cent decrease in the county's yield. About two-thirds of the farmers of the county treated their seed and effected a saving of nearly \$100,000.

Smut in Steuben County. The county agent of Steuben county, in company with a representative of the United States department of agriculture, found one field of wheat with as much as 84 per cent of smutted heads, and considerably more than 50

Protecting Seed Wheat Against Smut by Formaldehyde Treatment.

per cent of the crop was lost. Other fields showed as high as 40 to 50 per cent of smut. Where wheat had been sown in corn stubble ground the smut was much worse than where it followed other crops. The agent took advantage of the gatherings of farmers while they were thrashing to show how smut and other cereal diseases were causing losses and to demonstrate methods of seed treatment.

**PASTURE FOR STOCK IN FALL**

Highly Important to Keep Animals in Good Condition Through Fall and Winter.

One of the essential factors in keeping live stock in good condition through the fall and early winter, which is highly important, is good fall pasture, says Andrew Boss, vice director of the Minnesota experiment station. Nothing excels the grasses for pasture, though mixtures of the grasses and clover are better than either grasses or clover alone, and furnish the best kind of feed for all kinds of stock.

Where an abundance of cultivated grasses can be obtained for pasturing, no further attention need be given the subject. Meadow afterwards containing clover, or timothy and clover, makes good fall feed. Clover growing in the stubble field is also an excellent fall pasture. Pasturing stock on clover often enables the farmer to pick up some of the wasted grain, and the droppings of the live stock are beneficial to the land.

**WOOD ASHES ARE VALUABLE**

As They Have Peculiar Fertilizing Value They Should Be Carefully Stored Away.

The farmer who burns wood for heating or cooking should carefully store the ashes and not permit them to leach, as they have a peculiar fertilizing value. They not only contain potash and phosphoric acid in appreciable amounts, but also contain magnesia and lime, and when applied to the land they also act indirectly to increase the available nitrogen content of the organic matter in the soil.

**GOOD STALLIONS TO IMPROVE COLT CROP**

Harvest Aid, Animal of Highest Type, Is Purchased.

Work at New Breeding Station at Buffalo, Wyo., Carried on by Government in Co-operation With State Officials.

(Prepared by the United States Department of Agriculture.)

A standard-bred stallion, Harvest Aid, 63908, an animal of the very highest breeding type, has recently been purchased by the United States department of agriculture and placed at the government's new horse-breeding station at Buffalo, Wyo. Work at this station is being carried on in co-operation with the state of Wyoming, the object being to develop utility horses especially adapted to western range and farm conditions. Harvest Aid is by the champion trotting stallion The Harvester, and his dam is Santos Maid, a mare which holds the trotting record of 2:08 1/4, and a daughter of

A Sire That Insures an Improved Colt Crop.

Peter the Great, the leading sire of speed in America. Harvest Aid is an animal of great stamina, good size and conformation, and while he was selected on his merits as an individual, the horsemen of the department say they are extremely fortunate in getting such a well-bred animal. It is not the purpose at the horse-breeding station to develop speed animals, but it is well understood that a good stallion from a family noted for its speed is highly desirable for the production of active utility horses.

**MAKE MONEY RAISING BARLEY**

Experiments Show It Will Surpass Corn as Ration for Fattening Hogs if Properly Fed.

Experiments at the Wisconsin experiment station show that barley will surpass corn as a ration for fattening hogs if it is properly fed. Twelve lots of pigs were fed, using with some a corn ration, while the others were given barley. The return for each pig over the cost of feed was \$14.38 for the barley-fed pigs, and \$12.38 for the corn-fed porkers.

One of the most interesting facts brought out was the value of a barley and whey combination, which netted a handsome return, and the gains made with this ration were very rapid.

If you are in a region which is suited for the production of barley, or if you have been using it as a nurse crop for alfalfa, do not be discouraged by the prospect of a lower price, due to the curtailing of the use of barley in the brewing industry. Perhaps it will pay you more than ever as a feed for your hogs and your other live stock.

**LIMESTONE INCREASES YIELD**

Demonstrations Carried On for Two Years in Indiana to Show Value of Ground Material.

(Prepared by the United States Department of Agriculture.)

For two years the county agent in Jefferson county, Ind., has been carrying on demonstrations to show the value of ground limestone on acid soils. In one demonstration this year an average of 25 1/2 bushels of wheat were produced to the acre. Neighbors who helped thrash this wheat, and who have land that is just as good, except that they did not make applications of ground limestone, obtained only 15 bushels to the acre. This high yield is hardly an exception, reports the agent, for similar results were obtained by other farmers in the section who used limestone.

**ADVANTAGES OF SAME BREED**

Better Prices Secured From Uniform Product and Breeding Stock Secured Near Home.

(Prepared by the United States Department of Agriculture.)

There are many advantages to be gained when the stock raisers of one community raise the same breed. Better prices may be secured from the sale of a uniform product and suitable breeding stock can be secured near home.

**FARMER WHO AIDS FERTILITY**

Dairyman Who Studies Feed for Land Is Not Soil Robber—Something Must Be Put Back.

(Prepared by the United States Department of Agriculture.)

The dairy farmer not only studies how to feed his cow, but how to feed his land. He is not a soil robber, as he realizes that the farmer who reduces the fertility of his land robs without reason, since he steals from himself.

**BLACK AND WHITE POPULAR**

Colors Form Favorite Combination at French Resorts—Stripes in Narrow and Wide Arrangements—Skirts Are Very Short.

From all signs this will be a decisive season in Paris in so far as fashion creation is concerned. The designers seem to have taken on their old accustomed stride. They have turned their efforts unreservedly to leadership in the world of style.

To aid them in this crucial moment there are arriving from the United States, from South America, and from England hosts of buyers and fashion experts to watch the latest developments. This is almost a new experience. At least it is a revived experience, for through the last five years only the most favored of buyers have been allowed to cross the water and only a few of the dressmakers have kept up their work with anything like pre-war vigor.

American women during the war have developed a style all their own. They are dressing now as suits the climate and their life and their pursuits, which are quite different from the French woman's. And one sympathizes with the buyers, who wonder whether their clients at home will refuse to accept the wonderful things brought over from France. If their eyes are trained only for beauty they will be dazzled into letting all their accumulated notions of dress go by

mors of hoops about the hips and even about the bottoms of the skirts.

The sleeves now in vogue can hardly be called sleeves. They actually are just a little strip of material over the top of the shoulder. In most instances that is all, and the Parisians wear them fearlessly for morning and afternoon. In the evening there is no sign to be seen of sleeves.

Indeed, a Frenchwoman's dress of the present mode is little more than two strips of material sewed together and cut kimono fashion, though the lines of her frock are not flowing; they follow the outline of her figure.

Evening gowns, far from being an exception to this rule, carry things to an exaggerated degree. The economical use of material there extends to the neckline, which not only opens at back to the waist, but sometimes below that point. These gowns are low in front also. All that is used for the bodices are two pointed strips of material on either side of the front. In order to keep this on there are strings of jewels or beads attached to the points strung around the neck, and from the back of the neck strung to the waistline again. It is the fabric of the evening gown that counts for everything and its draping.

Favorite Color Combination. Black and white is by all odds the favorite color combination at the French resorts at this time of the year. Black and white stripes, since early spring, have been very good for sep-

An afternoon hat of unusual merit. The skeleton ostrich feathers make a striking trimming for this exquisite headgear of velvet.

the board and the conservatives at home will not be suited.

At this time of the year all of France, as all of the rest of the world, seeks a cool spot; and so it is at Deauville and the other resorts by the seaside that one looks upon the fashionably arrayed crowd of women and is able to gain some idea of the trend of the times as regards dress. They are wearing the very latest things from a French point of view, and of course, the majority of the fall fashions will follow in some respects the lines favored just now.

**Skirts Are Very Short.**

Well, the tendency is all in the direction of the skirts that are shorter than anything America has ever worn or even dreamed about. You hear it said that the Parisians are wearing their skirts very long, but when you see them with their skirts actually extending just below their knees, so that when their arms are raised the skirt pulls above the knee, you know what a short skirt really is. It is easy on material and is extremely good looking when the figure of the wearer can stand the strain. The skirts are tight, too, but what matters that when their length is what it is? No trouble about taking a good, long step in a dress of this character. Then the coats, when it is a suit, reach almost to the bottom of the skirts, leaving, in fact, only about two or three inches of the skirt to be seen. The coats are either strictly tailored or they show a little fullness about the hips. That tells a story of forthcoming fullnesses of even greater volume.

It is so with the dresses. Always there is a slight gathering of extra material where the hips join the waist. It is the pannier that is greeting us on the broad highway of fashion. As yet it is not large enough nor full enough to be alarming, though there are ru-

rate silk dresses and for suits, as well as for topcoats. Now the new woolly fabrics are appearing, and they show these stripes in wide and narrow arrangements.

Then there is the black gown with the white hat; that is the most effective. This season they are wearing over the white hat, which is sans trimming, a black lacy veil. This makes the costume even more effective. The veil does not necessarily cover the face—in fact, it rarely does—but its lacy pattern is so distributed that the white showing through the black transparent pattern makes a trimming of its own.

**Hats Without Trimming.**

The hats, as a forecast of fall headgear, are mostly without trimming. The style is all in the line, but how that line is obtained is a complete mystery. Upon examination the riddle only becomes more complicated. There seems to be nothing there except a band of something stiff to fit about the head. The crown and the brim are entirely without inner stiffening or frame. The trick does not allow for explanation. It is all in the wizard who causes it to be. Yet, when this seeming mass of velvet or satin is put on the head it takes a shape and form that commend it to any wearer. It seems to have been made to set off at its best that face alone, and while you cannot say that the hat is round or oval or square or long, still it has shape.

The felt blocked hats worn with midseason gowns are round as to crown and as to brim as well. The brim turns up at the same distance all the way round and the only trimming for the hat is a silk band of the same color. Hats of this character in beige and taupe worn with navy blue suits are effective. Then there is another variation of this hat done in duvety,

**ASPIRIN FOR HEADACHE**

Name "Bayer" is on Genuine Aspirin—say Bayer

Insist on "Bayer Tablets of Aspirin" in a "Bayer package," containing proper directions for Headache, Colds, Pain, Neuralgia, Lumbago, and Rheumatism. Name "Bayer" means genuine Aspirin prescribed by physicians for nineteen years. Handy tin boxes of 12 tablets cost few cents. It is estimated that there is only one sudden death among women to eight among men.

**Was Laid Up In Bed**

Doan's, However, Restored Mrs. Vogt to Health and Strength. Hasn't Suffered Since.

"I had one of the worst cases of kidney complaint imaginable," says Mrs. Wm. Vogt, 6315 Audrey Ave., Westlawn, Mo., "and I was laid up in bed for days at a time."

"My bladder was inflamed and the kidney secretions caused terrible pain. My back was in such bad shape that when I moved the pains were like a knife-thrust. I got so dizzy I couldn't take another step. Heads of perspiration would stand on my temples, then I would become cold and numb. My heart action was affected and I felt as if I couldn't take another breath. I got so nervous and run down, I felt life wasn't worth living and often wished that I might die so my suffering would be ended. Medicine failed to help me and I was discouraged."

"Doan's Kidney Pills were recommended to me and I could tell I was being helped after the first few doses. I kept getting better every day and continued use cured me. My health improved in every way and best of all the cure has been permanent. I feel that Doan's saved my life."—HENRY B. SURKAMP, Notary Public.

**THE "BLUES"**

Caused by

**Acid-Stomach**

Millions of people who worry, are despondent, have spells of mental depression, feel blue and are often melancholy, believe that these conditions are due to outside influences over which they have little or no control. Nearly always, however, they can be traced to an internal source—acid-stomach. Nor is it to be wondered at. Acid-stomach, beginning with such well defined symptoms as indigestion, belching, heartburn, blood, etc., will, if not checked, in time affect to some degree or other all the vital organs. The nervous system becomes deranged. Digestion suffers. The blood is impoverished. Health and strength are undermined. The victim of acid-stomach, although he may not know the cause of his ailments, feels his hope, courage, ambition and energy slipping. And truly life is dark—not worth much to the man or woman who has acid-stomach!

Get rid of it! Don't let acid-stomach hold you back, wreck your health, make your days miserable, make you a victim of the "blues" and gloomy thoughts! There is a marvelous modern remedy called EATONIC that brings, oh! such quick relief from your stomach misery—sets your stomach to rights—makes it strong, cool, sweet and comfortable. Helps you get back your strength, vigor, vitality, enthusiasm and good cheer. So many thousands upon thousands of sufferers have used EATONIC with such marvellously helpful results that we are sure you will feel the same way if you will just give it a trial. Get a big 50 cent box of EATONIC—the good tasting tablets that you eat like a bit of candy—from your druggist today. He will return your money if results are not even more than you expect.

**EATONIC**

(FOR YOUR ACID-STOMACH)

Cures most trouble in horses and cattle. Fattens them and keeps them fat. Results guaranteed or money back. Made of 80% salt, balance 5 different kinds of drugs. Weighs 3 lbs. Blocks 5 lbs. Stays hard. Nearly all merchants have it.
