While the government agrees to pay all War Savings Stamps upon ten days' notice, why should they be cashed in? The W. S. S. investment is the best investment that can be made today. It is better than a five per cent first mortgage, as to interest, and has many advantages over the mortgage. Hold your stamps until matured, as they possibly represent the total aid you are extending the government at this time.

That the \$100 and \$1000 Treasury Savings Certificates are meeting with unqualified success in the Third Federal District is evidenced by a report recently issued by the Federal Reserve Bank. It is shown that since the issuance of the new form of security over 350 of the \$1000 and over 1600 of the \$100 Treasury Savings Certificates have been purchased by the thrifty people of this district.

Banking institutions were among the first to recognize the desirability of the government securities and many of them are carrying a certificate registered in the name of the bank. Others have a limited quantity on hand for re-sale to the public.

250 fraternal organizations have availed themselves of the opportunity to invest part of their funds in these securities for they realize that if the occasion arises the certificates can be redeemed on ten days' notice a full value plus the interest earned.

Since the Treasury Savings Certificates were placed on sale, the by monthly reports of per capita sales show an increase from \$62 to \$85 for the district. During this period the per capita sales of Southern New Jersey have advanced from \$37 to \$84 while Delaware has increased her sales from \$23 per capita on July 15th to \$33 per capita today. The forty-eight counties of Eastern Pennsylvania have increases from \$63 to \$83 per capita and Philadelphia has jumped from \$73 to \$101.

It is surprising how quickly small amounts saved systematically and invested at a fair rate of interest increase until one has saved a considerable sum. An illustration which comes to mind, is the case of a man in one of our rural communities who had built himself a home, but owing to his limited funds, was unable to complete the house according to his plan. When government Savings Stamps were first issued in 1917, this man became a regular purchaser, investing a certain sum in Thrift Stamps each week.

A few days ago he went to his postmaster and presented \$500. (maturity value) worth of 1918 Government Savings Stamps and said he would like to have \$400 in cash, which he wanted to use to have a bathroom built in his home. The other \$33 he had in 1918 Stamps, he said, "and I would like to have this Certificate with 12 Government Savings Stamps and the eight new stamps exchanged for one of those new Treasury Savings Certificates of \$100 maturity value."

That man knows the value of saving and the fact that he redeemed his stamps to pay for a bath room in his home, makes him a better citizen. He feels that he must advance and in doing so he will remember the government offers him advancement in the absolutely safe security of Treasury Savings Certificates.

The upbuilding of a great body of investors is an undertaking which has deep significance to the institutions of the United States.

A Splendid Suggestion.
H. Jeff, in "Short talks," in the Lewistown Democrat and Sentinel, makes this suggestion:
It would be a good idea, I believe, to make the 11th of November our national Thanksgiving Day. This would allow a general celebration of armistice day, without increasing the number of holidays. It could readily be done after this year.

At Garman's Theatre.
Herrman, the great, will be at Bellefonte and can be seen at Garman's Saturday night, November 8th. His company includes a great number of artists who are capable of producing the highest class of entertainment in various lines.

The Secret of a Superlative Tire

The whole question of a super-tire is a matter of principles. For there is nothing exclusive in the industry. No patents, no secret formulas prevent a conscientious maker from building the best.

But cost and competition modify ideals. The Brunswick idea is to pay perfection's price and get it.

That has been the Brunswick policy since 1845. And it accounts for the growing preference for Brunswick Tires. Motorists expect the utmost from a tire bearing the name of Brunswick—and get it.

You, too, will be convinced by your first Brunswick, that here is an extraordinary tire, and that more money cannot buy a better.

Better tires of their type are impossible—or better tubes. That we guarantee.

Try ONE Brunswick—learn how it excels.
