Students Travel Three Miles to College Classes.

Student living conditions at the Pennsylvania State College are so crowded at the present time that half of the boys who will come from the farms to enjoy the winter course in agriculture, will have to live in near by villages and be transported to and from their rooms daily by motor bus lines. Lack of proper dormitory space on the college campus have made it necessary for every available room in the town there to be rented out to students and faculty members, and there are not enough facilities to care for the limited class of short course students.

However, the School of Agriculture made a thorough canvass of State College and surrounding towns, and accommodations could be found for only room. Rooms for half of these were found in Lemont, three miles from State College, and arrangements have been made to carry these men daily to the college for their class work. These crowded conditions made it necessary to limit the class, and many applicants had to be turned away. The classes in this course will start on Thursday.

MILLHEIM PENN. KESSLER'S DEPARTMENT STORE

LaCrosse
TRACTOR

\$1250 Cut to \$895

WE are pleased to announce that in spite of rising costs the production of the LaCrosse Tractor has become so standardized that we offer a reduction of \$355 from the former price of \$1250.

We have been allotted a limited number for distribution at the remarkably low price of \$895. This is the standard Model G three-plow tractor, rated at a full 2,000 pounds drawbar pull. With its perfect kerosene burner and its own twin cylinder horizontal motor it holds many records for low fuel cost and dependability.

The price of \$895 is for the tractor complete with belt pulley, fenders and governor ready for work.

It has the fewest number of parts and every part is very accessible. There are thousands of these tractors being used successfully under many different conditions.

If you ever intend to have a tractor here is your opportunity to get a dependable three-plow tractor at a price only made possible by standardized quantity production.

During the next two weeks we will be increasing our number of dealers. If we do not have an agent in your community, and you know a live dealer who wishes to build a permanent tractor business on a proven success, urge him to write us at once.

Even though the production on this standard model will be more than doubled in 1920, the factory cannot promise delivery beyond present allotments.
