

**THE CENTRE REPORTER.**

THURSDAY, JANUARY 15, 1920

**THIRTY-FIVE YEARS AGO**

Paragraphs of News Taken from the Files of the Reporter, of 1885.

April 1, 1885.

Rev. M. L. Deitzel, of Snyder county, will be pastor of the vacant Aaronburg charge.

Mrs. B. D. Brisbin purchased a lot of D. J. Murray, at the south end of town and will put a house on it.

Stakes have been driven for a new house (at the railroad station. This makes the 12th new building erected and in contemplation at Centre Hall for '85, with five or six more in prospect.

Aaron N. Runkle has again hied himself back to Kansas.

Our town has not an unoccupied room; buildings are occupied that before were not sought for as dwellings, and some houses have two families to accommodate new ones. A dozen more houses could find occupants if we had them.

Samuel Harter bought Jacob McCool's farm, near Spring Mills, at \$51 per acre, and Rev. Wm. McCool bought the pleasant home at Spring Mills for 1800.

**Irvin G. Gray to Get New Trials.**

On Monday of last week the Supreme court handed down its decision in the case of the Commonwealth vs. Irvin G. Gray in which the judgement of the Superior court and the sentence of the lower court was reversed in the two cases appealed and new trials awarded Mr. Gray. Mr. Gray is now serving his sentence of not less than two years nor more than two years and six months in the penitentiary, one case on which he was convicted, so that just when he will be given new trials in the other cases is, of course, problematical.

Ex-Postmaster C. M. Bierly, of Rebersburg, lifted his commission at Bellefonte as justice of the peace for Miles township, recently, to succeed the late W. J. Carlin.

**Wood Ashes too Valuable to Be Wasted.**

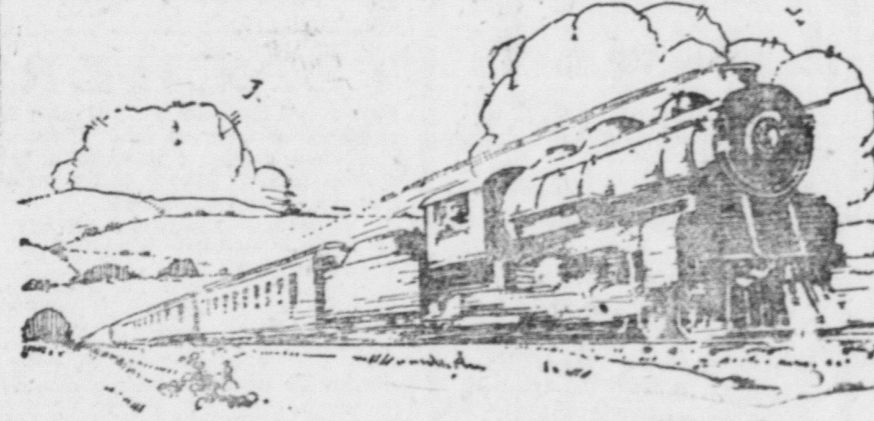

The Pennsylvania Department of Agriculture reminds farmers and others who are burning wood for fuel that wood ashes contain the mineral matter that the trees, from which the wood was obtained, took from the soil when they grew. Wood ashes, therefore, are valuable for making the soil fertile. If they have not been leached, that is, if they have not been exposed to water, they contain much potash and some phosphoric acid and a large percentage of vegetable lime, but no nitrogen. If they have been leached, the potash has been mostly washed out.

Much wood is still being consumed in rural sections for fuel, particularly at this time, due to the scarcity and high price of coal. Besides, the price of commercial fertilizer is high and the practice of permitting waste is wrong. We are now living under changed conditions and in order to obtain the best results in farming as in everything else, the little things must not be overlooked.

**Too Bad Holidays Fall on Sunday in 1920.**

Those who have indulged in the thrilling perusal of their 1920 almanacs find due cause to pity those sons and daughters of the humankind who take more than passing delight in the observance of this country's legal holidays, for my, oh my! here comes the 30th of May and the Fourth of July, two of the most recreating days of recreation, right on Sunday, when overworked clerks have a holiday, anyhow, and when the wheels of sports are not supposed to be turning. Mayhap, if one and all spend Memorial and Independence days in the bosoms of their families and meditate on the cause of just why they are there, by the time the shades of evening gather they will realize more fully the true significance of those occasions, which for years past have only meant one big time.

Lecture Course patrons will undoubtedly be well pleased with the Little Playhouse Company, of Cincinnati, which comes to Centre Hall Saturday night.

A vast amount of work now remains to be done which the introduction of war has necessarily delayed and accumulated, and the result is that very large capital expenditures ought to be made to make up for the interruptions inevitably due to the war, and to prepare the railroads to serve adequately the increased traffic throughout the country.  
WALKER D. HINES,  
Director General of Railroads.

*Work more—  
Produce more—  
Save more—*

But we can't continue increasing our production unless we continue increasing our railroad facilities.

The farms, mines and factories cannot increase their output beyond the capacity of the railroads to haul their products.

Railroads are now near the peak of their carrying capacity.

Without railroad expansion—more engines, more cars, more tracks, more terminals—there can be little increase in production.

But this country of ours is going to keep right on growing—and the railroads must grow with it.

To command in the investment markets the flow of new capital to expand railroad facilities—and so increase production—there must be public confidence in the future earning power of railroads.

The nation's business can grow only as fast as the railroads grow.

*This advertisement is published by the Association of Railway Executives.*

Those desiring information concerning the railroad situation may obtain literature by writing to the Association of Railway Executives, 61 Broadway, New York.

**Brunswick Principles In Fine Tire Making**

The reason you are interested in the name on your tire is that it identifies the maker. By knowing the maker you can judge his ideals of manufacture.

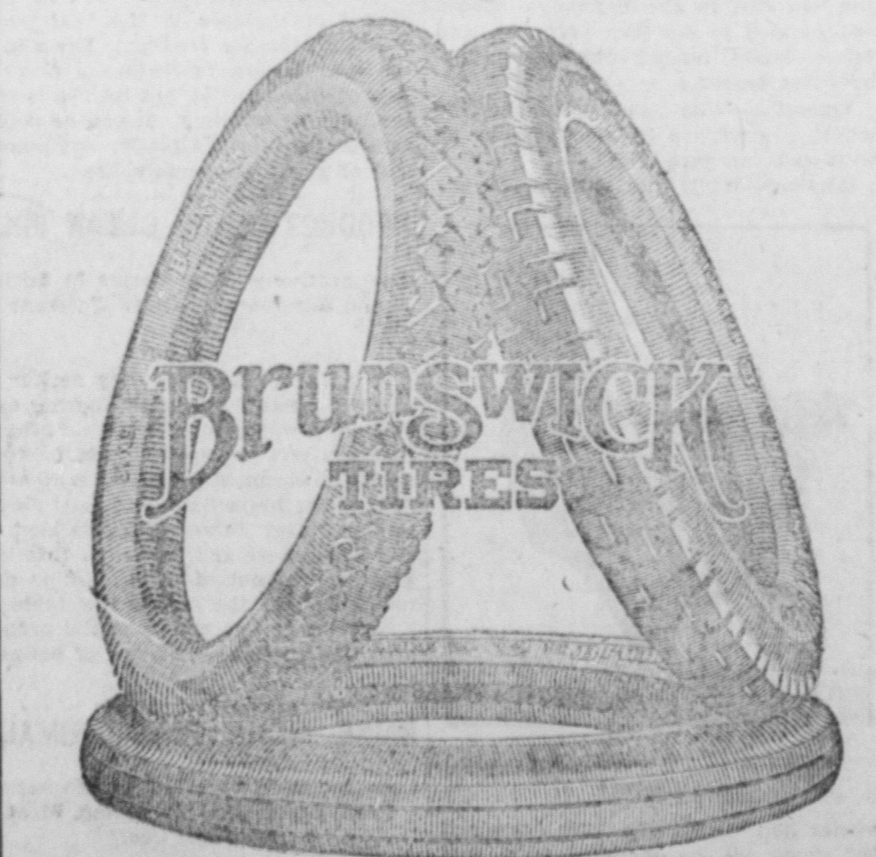

The only secret of a super-tire lies in the principles of the maker. His standards decide the quality. For there are no secrets in the tire industry.

What you get depends on what is behind the name on your tire. Brunswick, as you know, means a very old concern, jealous of its good name. Since 1845 the House of Brunswick has been famous the world over for the quality of its products.

The Brunswick Tire is all that you expect—and more. Your first one will be a revelation. You'll agree that you've never known a better. And you'll tell your friends. So spreads the news among motorists. The Brunswick is the most welcome tire that ever came to market.

Try one Brunswick Tire. Learn how good a tire can be built. And remember, it costs no more than like-type tires.

**FARMERS' MEETING**

In Grange Arcadia, CENTRE HALL  
**Tuesday Ev'g, January 20th**  
1920, at 7:30 O'clock

**This Meeting Is Held in the Interest of Better Farming and Bigger Profits.**

**Mr. A. W. Burg, an Expert**  
on Hay, will give a Lecture on the John Deere Dain System of Air Curing Hay.

You will be interested and benefited; also entertained. Bring your family and your neighbors. Let's make it a regular get-together meeting. It is absolutely free. Do not fail to attend. Mr. Burg has a special message of interest to every farmer in this locality.

**BRADFORD & SON**

**When you get your Perfection Oil Heater**

You will look back and smile at the days when you shivered and piled coal on the furnace in a vain attempt to heat properly the one room you were using.

And the cold rooms that the furnace never did heat. And the cold mornings before the Perfection gave you a cheerful circle of warmth to dress by.

In short, you'll be mighty glad you bought one.

**PERFECTION OIL HEATERS**

A Perfection Oil Heater will pay dividends of comfort for years to come. It will start paying for itself right away in the amount of coal it will save you.

Easily carried from room to room. Smokeless, odorless and absolutely safe. You can't turn the wick too high.

Go to your dealer today and see the full line. There's a model that will just suit your needs, and pocketbook.

YOUR Perfection Oil Heater will burn for ten hours on one gallon of Atlantic Kerosene Oil. Best for Rayo Lamps too. Costs no more than ordinary kerosene.
