

NERVOUS PROSTRATION

Dr. J. Christman Proved That Lydia E. Pinkham's Vegetable Compound is a Remedy for this Trouble.

Binghamton, N. Y.—"I was in a very nervous condition for over a year, my mind was gloomy, could see no light on anything, could not work and could not have anyone to see me. Doctor's medicine did not help me and Lydia E. Pinkham's Vegetable Compound was recommended. I took it and a new world opened up. I am now well. I recommend it to all afflicted with nervous prostration."—Mrs. J. CHRISTMAN, 193 Oak Street, Binghamton, New York.

The success of Lydia E. Pinkham's Vegetable Compound, made from roots and herbs, is unparalleled. It may be used with perfect confidence by women who suffer from nervous prostration, displacements, inflammation, ulceration, irregularities, periodic pains, backache, bearing-down feeling, flatulency, indigestion and dizziness. Lydia E. Pinkham's Vegetable Compound is the standard remedy for female ills. If there are any complications about which you need advice write in confidence to Lydia E. Pinkham Medicine Co., Lynn, Mass.

Delicate Sensibilities. Why have you broken your engagement with Billy Sands? Oh, I couldn't stand for his snafu. I tried to put him where that father was sore on the phony talk, but he couldn't seem to get hep, so I gave him the razz-dazz."—Boston Transcript.

"Cold in the Head" is an acute attack of Nasal Catarrh. Persons who are subject to frequent "colds in the head" will find that the use of HALL'S CATARRH MEDICINE will clear the blood and render them less liable to colds. Repeated attacks of Acute Catarrh may lead to Chronic Catarrh. HALL'S CATARRH MEDICINE is taken internally and acts through the blood on the mucous surfaces of the system. All Druggists 75c. Testimonials free. \$100.00 for any case of catarrh that HALL'S CATARRH MEDICINE will not cure. F. J. Cheney & Co., Toledo, Ohio.

EUROPEAN BORER IS DESTRUCTIVE

Estimated Loss of Million Dollars Daily if Insect Once Gets Established.

FOUND IN EASTERN STATES

Larva Is Dirty White Caterpillar, About One Inch Long, With Brown Head—Ears of Corn Are Bored Through.

A million dollars' worth of damage a day is conservatively estimated as the effect of the European corn borer if it once gets established in the corn belt of the United States. This is the statement of George A. Dean, head of the entomology department in the Kansas State Agricultural college.

The insect, which has done tremendous damage in Europe and Asia, has been introduced into New York and Massachusetts and is looked for in other regions.

Larva Is White Caterpillar. The larva of the European corn borer is a dirty white caterpillar, about an inch long, with a brown head. It passes the winter in a nearly full-grown condition within its food plants. In the spring its growth is completed and it then bores its way to the surface of the food plant, where it makes a slight hole to serve as an exit for the resulting moth.

The larva now forms a cocoon in the burrow, passes into the pupal stage, and in about two weeks the adult moth emerges. The moth, which lives about two weeks, deposits 300 to 700 eggs on the egg hatch, and the young larvae at first feed on the tender shoots of the plants, but finally bore their way into the main stem of the plant. In about six weeks, after burrowing through all parts of the plant, the larvae pupate as before and emerge as moths about the middle of summer.

The female moths of the second brood do the greatest damage to corn, since they attack not only the stalk, but also the tassel and the ear, and continue feeding until cold weather.

Destroy Ears Completely. The ears of corn are bored through from bottom to top and from side to side, the borers feeding on the kernels while they are soft. Complete de-

A Good Harvest of Corn, With Good Organic Matter Left, Which, if Plowed Under, Will Make Next Corn Crop a Better One.

struction of the ear is generally accomplished either by the borer or through decay which follows the injury. One moth which emerges in the spring may be responsible for from 100,000 to 200,000 larvae later in the same season. Every farmer and gardener should be on the look-out for the insect. Professor Dean urges, and upon discovering signs of its presence should immediately inform his state entomologist or experiment station, sending in the insect or the plant on which it has evidently worked.

INSULATE HIVES IN WINTER

Ample Protection Should Be Supplied to Keep Out Cold Winds—Leave Entrance Open.

Protect hives from prevailing cold winds, and insulate hives to retain the heat generated by the bees. A grove of trees, an adjacent hill, or nearby fence may serve as a windbreak. The packing usually done should completely surround the hive, including the bottom, but the bees' entrance should remain open, though reduced in size. Cork chips, sawdust, fine shavings, dry leaves, chaff, and similar material should be used and packed tightly in a box built about the hive, allowing from six to eight inches space for the insulation.

QUARTERS FOR YOUNG STOCK

Preferable to Have Calves Separated From Main Part of Cow Barn—Mothers Not Disturbed.

Some dairymen fail to consider housing the young stock when they build their barns. It is preferable to have the young stock separated from the main part of the cow barn because of odors and because calves near their mothers will cause the cows to become restless. The quarters for the calves should be connected with the main barn, and a location on the south-east side of the barn is desirable.

GRASSHOPPERS MAKE FINE POULTRY FEED

Especially Relished by Turkeys and Guinea Fowls.

Fowls Consume Millions of Destructive Insects During Course of Year—With Minimum Amount of Trouble to Farmers.

Grasshoppers are beginning to pay big cash dividends in North Dakota through the medium of poultry, especially in turkeys and guinea fowls. The experiment has been successfully tried at the state agricultural college and numerous farmers have taken the cue.

Fattened Turkeys Being Driven to Market.

Wherever there are green fields, there are grasshoppers and other insects. G. R. Greaves of the agricultural college, who has conducted the experiments, says:

"It seems the inexorable law of nature that wherever there is something good to eat there is something to eat it, and man's existence is a continual struggle for supremacy over the creatures that are determined to consume the food he requires."

During past years in North Dakota, prairie chickens, sage hens and grouse held the grasshoppers in check, and their plumpness and the delicious quality of their meat attested to the superiority of their food. Now the prairie chickens especially are going the way of the buffalo, and Mr. Greaves was assigned to find a substitute that would keep down the insect pests with a minimum of trouble and expense to the farmer. The answer is turkeys and guinea fowls.

Mr. Greaves declares that flocks of turkeys and guinea fowls consume millions of grasshoppers and other insect pests, and naturally do their own foraging. Early in the season the experimental flocks at the agricultural college have grown fat and strong on the young insects.

Later in the season they have received the abundant exercise necessary for their proper market condition by chasing the elusive hoppers, having saved the field corps and provided a new, big source of income.

"Three old turkeys kept through one winter," said Mr. Greaves, "produced a flock of young turkeys the following season which kept the fields near their house clear of grasshoppers, and fulfilled their destiny by grazing Thanksgiving tables."

BEST PRACTICE IN PLOWING

According to Minnesota Expert It is Best to Deepen Furrows Gradually Each Year.

The nature of the soil and the crop to be grown should determine the question of whether to plow deeply or more shallowly. As with most other farm problems, the farm operator's judgment and experience must be called into play in determining which practice is best on any farm.

Andrew Boss, vice director of the Minnesota experiment station, believes that deep furrows turned on edge, "three-quarters over," furnish the best conditions for pulverizing and sweetening the soil. "It is not good practice," he says, "to deepen the plowing greatly in any one year. It is better to deepen it by one-half inch or an inch each year until a sufficient depth has been reached. Rarely is it necessary to plow deeper than seven or eight inches, except for certain deep-rooted crops like sugar beets, carrots, potatoes and like crops.

"Where it is desirable to incorporate in the soil water-holding material, such as a green manure crop or a dressing of coarse barnyard manure, deep plowing is wise. Either a very sandy or a very heavy dense clay would be benefited by such treatment periodically."

FALLACIOUS IDEA OF SHEEP

Animals Will Consume More Weeds and Shrubs Than Other Animals, but Need Some Feed.

Many farmers who have failed with sheep have gone into the business with the fallacious idea that sheep will eat anything, simply because some misinformed person started the tale. Sheep will consume more weeds and shrubs than any other class of animals, but to turn them into the woodlot and expect them to thrive on sprouts and dry leaves is asking too much of their digestive system. However, there is usually waste land on most farms on which the sheep may be kept at certain seasons of the year very profitably.

Embarrassed. Edward is five years old and lives in Irvington. One morning he called early next door and asked for Mrs. Blank. "Come right in, Eddie," said Mrs. Blank. "What's on your mind so early this morning?" "Well," began Edward, "I come to see your new rug." "What a good little boy, to be so interested," and taking him by the hand she led him into the living room and pointed out the oriental rug. "Well," said Eddie, "well, well, it don't make me sick to my stomach."—Kansas City Star.

Thousands Have Kidney Trouble and Never Suspect It

Applicants for Insurance Often Rejected.

Judging from reports from druggists who are constantly in direct touch with the public, there is one preparation that has been very successful in overcoming these conditions. The mild and healing influence of Dr. Kilmer's Swamp-Root is soon realized. It stands the highest for its remarkable record of success.

An examining physician for one of the prominent Life Insurance Companies, in an interview on the subject, made the astonishing statement that one reason why so many applicants for insurance are rejected is because kidney trouble is so common to the American people, and the large majority of those whose applications are declined do not even suspect that they have the disease. It is on sale at all drug stores in bottles of two sizes, medium and large.

However, if you wish first to test this great preparation send ten cents to Dr. Kilmer & Co., Binghamton, N. Y., for a sample bottle. When writing be sure and mention this paper.—Adv.

Showing Them Off. A considerable amount of golf is played principally for the reason that some women think their husbands look well in knickerbockers.—Washington Star.

RECIPE FOR GRAY HAIR.

To half pint of water add 1 oz. Bay Rum, a small box of Barbo Compound, and 4 oz. of glycerine. Apply to the hair twice a week until it becomes the desired shade. Any druggist can put this up or you can mix it at home at very little cost. It will gradually darken streaked, faded gray hair, and will make harsh hair soft and glossy. It will not color the scalp, is not sticky or greasy, and does not rub off.—Adv.

Her "Sorrow Clothes." Mary Ellen had just finished dressing in a clothespin in black for Halloween and she said, "That clothespin has lost her husband and has on her sorrow clothes."

NAB BRIDEGROOM ON HONEYMOON

"Winnie" Loveday Accused by Police of Being Society "Raffles."

BETTER THAN FICTION

Wins Beautiful Bride, Starts on Wedding Trip and Is Caught by Detectives—Wife Decides to Stand by Him.

Chicago.—The knightly and romantic crook stealing hearts as easily as he steals the family jewels abounds in fiction and upon the moving picture screen.

But little is seen of him in real life. Veteran police reporters have long sought him in vain.

But—at last an unusual type appears in the police records. Earl Winfield Loveday is his name. In a vague way he suggests the "Raffles" and "Arsene Lupin" of fiction. Although only twenty-six years of age, he has lived several existences. To his friends in the upper stratum he is known as Earl Loveday, formerly a popular member of Kenwood's younger set.

To the police he is known as "Winnie" Loveday, "the greatest safecracker that has appeared in the underworld for twenty years." He is in custody to-day after a seven months' search on charges of being the leader of the band of three men who blew the powerful vault of the American Brass company in Kenosha, stole \$30,000 in cash and Liberty bonds and shot to death Policeman Tony Singapore in the "get-away."

Seized on Honeymoon. But there is yet another chapter. It concerns Loveday's vain reformation. His wooing of little Carrie O'Neal, eighteen-year-old school teacher of Clearwater, Fla., a simple wedding in a little church at St. Petersburg, Fla., and the denouement and arrest while the honeymoon was still shining.

The story was gathered from "Billy" Pinkerton, chief of the Pinkerton National Detective agency.

"Loveday is one of the most remarkable criminals I have met," said the veteran Pinkerton. "His technical ability would have won him a reputation and money in legitimate business. His uncanny mastery of safes and vaults is startling.

"After the Kenosha job he maneuvered his way down to Tampa, Fla.

"Hello, Loveday," Steele Said.

There he lived at the best hotel and won friends by his personality and his dancing. Then he purchased an orange grove in Clearwater. He was living under the name of George R. Scott.

Wedding Is Brilliant.

"Then Carrie O'Neal, school-teacher and daughter of a neighboring farmer, came into his life. Immediately Loveday fell." He wrote his friends that Earl Loveday was dead. That henceforth he was George R. Scott, farmer. All Clearwater folks attended the wedding in St. Petersburg, and named their happiness.

"Then Loveday started to take his wife for a trip to California. But we were closing in on him. At Hot Springs, where Loveday stopped to wind up entirely his connection with his old friends, we caught up with him. J. C. Steele of our St. Louis office went to make the arrest. Police were ready to assist him, Earl and the girl wife were sighted on the street. With hands on their guns the police advanced. They were ready for a fight. "Hello, Loveday," Steele said.

"But Earl pulled no gun. He just smiled wearily and took the girl's hands in his. She didn't know what to make of it. But I suppose that, womanlike, she understood.

"You'd better go home to your folks," said Earl.

"No," she said, after a little thought, "I'm going with you."

"And, by George, she did," concluded Pinkerton. "She came through here with him, and she's going to stand by him. But we've got Loveday this time. It's the long trail for him."

Leech in Man's Windpipe.

London.—A British surgeon has successfully removed a living leech that had found its way into a patient's windpipe.

Watch Your Kidneys!

That "bad back" is probably due to weak kidneys. It shows in a dull, throbbing backache, or sharp twinges when stooping. You have headaches, too, dizzy spells, tired nervous feeling and irregular kidney action. Don't neglect it—there is danger of dropsy, gravel or Bright's disease! Use Doan's Kidney Pills. Thousands have saved themselves more serious ailments by the timely use of Doan's. Ask Your Neighbor!

A Maryland Case

G. W. Ellis, chief of police, Clark Ave., Pocomoke City, Md., says: "I was troubled with a severe case of backache and my kidneys were out of order. My back caused me a lot of pain and I was unable to do my work. I tried every remedy I could get, but nothing helped. I used Doan's Kidney Pills and one box cured me."
