**HILL'S CASCARA QUININE BROMIDE**  
 Standard cold remedy for 20 years—in tablet form—safe, sure, no opiates—breaks up a cold in 24 hours—relieves grip in 3 days. Money back if it fails. The genuine box has a Red top with Mr. Hill's picture. At All Drug Stores

**KILLS PAIN IN 5 MINUTES**

Agony of Rheumatism and Gout, Neuralgia, Lumbago, Chest Colds and Sore Throat Ended in Half the Time It Takes Other Remedies.

Mustardine won't blister—it is always ready for use—it's grandmother's old-fashioned mustard plaster with other up-to-date pain killers added. The best and quickest remedy in the world for lameness, sore muscles, stiff neck, cramps in leg, earache, backache, headache and toothache. Beechey's Mustardine—ask for it by name. Is made of real, honest, yellow mustard—not cheap substitutes. Use it freely to draw the pain from those sore feet—it's great for chilblains, too, and for frost-bitten feet. Ask for and get Mustardine always in the yellow box. S. C. Wells & Co., Le Roy, N. Y.

**ART WORKS ON LARGE SCALE**

Interesting Figures Concerning Decorations for Lincoln Memorial Building at Washington.

Simply to stretch the canvas, says Jesse Lynch Williams, describing in Scribner's Magazine how Jules Guerin painted the decorations for the Lincoln Memorial building in Washington, required eight men, which is less surprising when one realizes that each figure in the groups Mr. Guerin was about to paint is a good deal larger than the painter himself. One agrees with the writer that, although such details are not necessary to art appreciation, it is interesting to know that the two unpainted canvases cost \$400 apiece, and that when the artist finished his work the paint he had used added 150 pounds to their weight. And because the paintings will be somewhat exposed to weather, the paint was mixed with wax. In a way which chemical analysis shows was done to weatherproof painting when the ancient kings of Egypt were erecting memorial buildings.

No Affinity.  
 "There is one queer thing about the old sea dogs."  
 "What is that?"  
 "They don't seem to take to ocean greyhounds."

**Why Women Go Mad.**  
 "You used to say I reminded you of a woodland sprite," she complained. "You never tell me any more that I'm as beautiful as the dawn or that my eyes are translucent pools in which you see reflections of Elysian vistas."  
 "I know," he replied, still studying the market page. "Since I have to give so much of my attention to hard facts I seem to have lost my imagination."

**Hates Himself.**  
 "Eibson says he despises a liar."

**BULLY!**

If Bilious, Constipated or Headachy, take "Cascarets"

Feel grand! Clean up inside! Your system is filled with liver and bowel poison which keeps your skin sallow, your stomach upset, your head foggy and aching. Your meals are turning into poison and you can not feel right. Don't stay bilious or constipated. Feel splendidly always by taking Cascarets occasionally. They act without griping or inconvenience. They never sicken you like Calomel, Salts, Oil or nasty, harsh Pills. They cost so little too—Cascarets work while you sleep.

Conflicting Accounts.  
 Little Helen—Mamma, the minister told me today that God gave me to you.  
 Mother—Well, he did, my dear.  
 Helen—Then somebody isn't telling the truth. I heard auntie telling Mrs. Brown that the court gave me to you.  
 —Boston Transcript.

**ASPIRIN INTRODUCED BY "BAYER" IN 1900**

Look for name "Bayer" on the tablets then you need never worry.

If you want the true, world-famous Aspirin, as prescribed by physicians for over eighteen years, you must ask for "Bayer Tablets of Aspirin."

The "Bayer Cross" is stamped on each tablet and appears on each package for your protection against imitations.

In each package of "Bayer Tablets of Aspirin" are safe and proper directions for Colds, Headache, Neuralgia, Toothache, Earache, Rheumatism, Lumbago, Neuritis, and for Pain in general.

Handy tin boxes containing 12 tablets cost but a few cents. Druggists also sell larger "Bayer" packages. Aspirin is the trade mark of Bayer Manufacturing of Monoaceticacidester of Salicylicacid.—Adv.

**Brazil's Anniversary.**

The recent celebration of the anniversary of Brazilian independence brings to mind several interesting facts concerning this growing nation. Brazil, with the exception of Cuba, is the youngest of the Latin-American republics. Unlike Cuba, however, Brazil enjoyed independence long before the change of government came. Again, most unlike its sister republics of Spanish America, Brazil effected the radical change without bloodshed. Dom Pedro was a wise, as well as a lovable, monarch; when he saw that the majority opinion favored a republican form of administration, he graciously abdicated and retired from public life. If only certain European monarchs had possessed similar foresight and common sense but a few years ago!

**When to Plant Potatoes.**

The date of planting necessarily must be governed by climatic conditions. In attempting to produce an early crop as possible, some risk must always be incurred of the plants being injured by late spring frosts. As a general proposition, it is best to plant potatoes as soon as there is little likelihood of killing frosts after the plants are up and the ground is in condition to work.

**Depth to Plant.**

Plant the small eye cuttings from 1 1/2 to 3 inches deep, depending upon the character of the soil—the lighter the soil the greater the depth of planting. Larger sets may be planted 4 inches deep.

**Spacing.**

If an early variety is planted, and the work is to be done by hand, the rows may be spaced as close as 26 inches, whereas if cultivation is to be done with a horse, 30 to 34 inches usually is allowed. In order to give the gardener some idea of the number of sets required to plant a plot of ground 50 by 100 feet at different spacings, the following table is submitted.

If a late variety is planted, the spacing should be greater, say 34 to 36 inches between the rows and 12 to 18 inches between the plants in the row.

To Plant a Plot 50 by 100 Feet.

Space between rows.	Space in row between plants.	Sets required.
26 inches	10 inches	2,769
28 inches	12 inches	2,487
30 inches	10 inches	2,678
32 inches	12 inches	2,331
34 inches	10 inches	2,400
36 inches	12 inches	2,000
38 inches	12 inches	1,874
44 inches	12 inches	1,762

**UNPROFITABLE METHOD**

Hogging down rye is an unprofitable practice, according to tests made in pork production at the Ohio experiment station. The tests show that it is generally more profitable to harvest the grain and sell it as a cash crop, or to feed the grain to hogs after threshing, rather than to allow the hogs to harvest the grain themselves.

**BEST SOIL FOR GROWING TUBERS**

Sandy or Gravelly Loams Are Best Adapted for Success With Potatoes.

**PLANT FOOD IS IMPORTANT**

Never Advisable to Turn Up More Than One Inch of Raw Subsoil at One Plowing—Land Should Be Pulverized.

(Prepared by the United States Department of Agriculture.)

The types of soil in which the potato thrives best are those designated as sandy or gravelly loam soils. It may be grown with a fair degree of success on any type of soil except loose sand and a heavy, sticky clay soil, provided the land is well drained and contains the necessary plant food. Successful potato production is dependent to a large extent on the thoroughness with which the land is prepared before planting the crop. Where a horse can be used, the land should be plowed from 8 to 10 inches deep, provided the surface soil is of a sufficient depth to permit it. It is never advisable to turn up more than one inch of raw subsoil at any one plowing, so if previous plowings have not been over 6 inches the maximum depth at which it should be plowed is 7 inches.

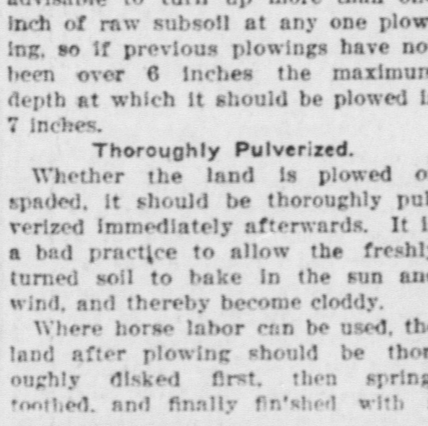

**Thoroughly Pulverized.**

Whether the land is plowed or spaded, it should be thoroughly pulverized immediately afterwards. It is a bad practice to allow the freshly turned soil to bake in the sun and wind, and thereby become cloddy.

Where horse labor can be used, the land after plowing should be thoroughly disked first, then spring-toothed, and finally finished with a

**A Good Example of Digging Potatoes in Old Way.**

smoothing harrow. Where land must be prepared by hand, it is good practice to pulverize the soil as much as possible when spading it up, after which it can be put in a fine condition of mellowness with a steel garden rake. The importance of thoroughly fluffing the soil cannot be overemphasized, for it increases the water-holding capacity of the soil, renders more plant food available, and reduces the number of weeds.

A Good Example of Digging Potatoes in Old Way.

**WAR ON WHEAT SMUT WIDENS**

Sales of Formaldehyde Demonstrate Desire of Farmers to Drive Out Insidious Disease.

That farmers are tremendously in earnest in their desire to drive out wheat smut is shown by the big increase in the sales of formaldehyde which have been made in four states where the United States department of agriculture, in co-operation with the extension departments of the state agricultural colleges, has been carrying on campaigns of education

**Illustration of Improvement Which May Result from Treating Seed With Formaldehyde as Smut Often Stunts the Plants.**

to demonstrate the proper use of formaldehyde in treating wheat for this disease. Reports from these states show that the increase in the sales of formaldehyde for the current year varies from 150 to 325 per cent, as compared with the sales of 1917, the last year before the present campaign was inaugurated. The four states in which this record has been made are Minnesota, North Dakota, South Dakota, and Montana. There is every reason to believe that practically all of this increase represents supplies used in fighting smut.

**MUNICIPAL ABATTOIR LOWERS MEAT PRICES**

Animals Are Slaughtered at All Times of Year.

Meat is Chilled in One Room and Will Keep for Long Period in Good Condition—Meats Inspected by Veterinarian.

(Prepared by the United States Department of Agriculture.)

The city of Paris, Tex., operates a municipal abattoir which serves the entire locality at cost, according to the United States department of agriculture, which has recently procured data regarding its operation. Hogs are killed in this establishment at all times of the year, and at a cost to the owners of \$1.50 a head, which covers killing, dressing and cooling the meat. The meat is chilled for 24 hours in one room, put in the cooler the next day, and kept at 32 degrees, and will keep in good condition for a long period. The first four days it is kept in this cooler without additional cost to the owner and after that it is kept at a charge of ten cents a day for each carcass.

Hogs are killed and salted down at \$2.50 a head, no extra charge being made for the salt, and they are kept in cold-storage rooms after being salted down for four days without additional cost, and at five cents a day thereafter. This curing room is separate from the regular cooler where fresh meats are kept, and is not quite so cold, but no meat has been known to be lost in it. Calves up to 350 pounds are killed for \$1.50 a head and the hide is left on them, though they are dressed and the hide is thoroughly washed. When cattle are skinned there is an additional charge of one dollar, the hide remaining the property of the owner of the carcass. Sheep are killed at \$1.50 a head and are skinned without extra charge.

Hogs, cattle and sheep are killed throughout the year. A city ordinance compels every butcher or other individual who sells meat in Paris to have his slaughtering done at the municipal abattoir, which is operated at cost. All the meats are inspected by the city veterinarian, who stamps each carcass. The plant pays its own expenses and has been making enough in addition to cover cost of depreciation. The abattoir cost between \$15,000 and \$20,000. About ten years ago, when the abattoir was built, the department has a record of original cost of \$10,000 and the daily capacity then was 30 cattle, 30 hogs and 30 sheep and calves.

Meat in Paris has been selling from ten to twelve cents a pound cheaper than in some neighboring localities. Competition is assured because it is easy for the hotels, restaurants and others using much meat to buy live stock and have it killed and stored in this municipal abattoir until they are ready to consume it. This results in prices being kept at relatively low levels.

**INDIGESTION** Caused by Acid-Stomach

Millions of people—in fact about 3 out of 10—suffer more or less from indigestion, acute or chronic. Nearly every case is caused by Acid-Stomach. There are other stomach disorders which also are sure signs of Acid-Stomach—belching, heartburn, bloating after eating, food repulsive, sour, gassy stomachs. There are many ailments which, while they do not cause much distress in the stomach itself, are, nevertheless, traceable to an acid-stomach. Among these are nervousness, biliousness, cirrhosis of the liver, rheumatism, impoverished blood, weakness, insomnia, melancholia and a long train of physical and mental miseries that keep the victims in miserable health year after year. The right thing to do is to attack these ailments at their source—get rid of the acid-stomach. A wonderful modern remedy called EATONIC now makes it easy to do this. One of hundreds of thousands of grateful users of EATONIC writes: "I have been troubled with intestinal indigestion for about nine years and have spent quite a sum for medicine, but without relief. After using EATONIC for a few days the gas and pain in my bowels disappeared. EATONIC is just the remedy I needed."

We have thousands of letters telling of these marvelous benefits. Try EATONIC and you, too, will be just as enthusiastic in its praise. Your druggist has EATONIC. Get a big box from him today. He will refund your money if you are not satisfied.
