

GET READY FOR "FLU"

Keep Your Liver Active, Your System Purified and Free From Colds by Taking Calotabs, the Nauseless Calomel Tablets, that are Delightful, Safe and Sure.

Physicians and Druggists are advising their friends to keep their systems purified and their organs in perfect working order as a protection against the return of influenza. They know that a clogged up system and a lazy liver favor colds, influenza and serious complications.

To cut short a cold overnight and to prevent serious complications take one Calotab at bedtime with a swallow of water—that's all. No salts, no nausea, no griping, no sickening after effects. Next morning your cold has vanished, your liver is active, your system is purified and refreshed and you are feeling fine with a hearty appetite for breakfast. Eat what you please no danger. Calotabs are sold only in original sealed packages, price thirty-five cents. Every druggist is authorized to refund your money if you are not perfectly delighted with Calotabs.—(Adv.)

Quite a Shock.
Bridegroom (expectantly)—Now my dear father-in-law, I wish to say just a word about my debts.
Father-in-law (slapping him on the back)—Debts, my boy? Why, I'll warrant my debts exceed yours three to one.

"CALIFORNIA FIG SYRUP" IS CHILD'S LAXATIVE

Look at tongue! Remove poisons from stomach, liver and bowels.

Accept "California" Syrup of Figs only—look for the name California on the package, then you are sure your child is having the best and most harmless laxative or physic for the little stomach, liver and bowels. Children love its delicious fruity taste. Full directions for child's dose on each bottle. Give it without fear.

Mother! You must say "California!"—Adv.

Trying On a Hat.
"Now, madam, you get the effect."
"The effect on me is all right. Show the price tag to my husband and let's note that effect."

ONLY WAY ASPIRIN SHOULD BE TAKEN

Look for name "Bayer" on tablets and follow directions in package.

The Bayer Company, who introduced Aspirin, tell in their careful directions in each package of genuine "Bayer Tablets of Aspirin" that to get the best results one or two glasses of water should be drunk after taking tablets. "Bayer Tablets of Aspirin" to be genuine must be marked with the safety "Bayer Cross." Then you are getting the world-famous Aspirin, prescribed by physicians for over eighteen years.

Each unbroken "Bayer" package contains proper directions for Colds, Headache, Toothache, Earache, Neuralgia, Lumbago, Rheumatism, Neuritis, and for Pain generally.

Handy tin boxes of twelve tablets cost but a few cents. Druggists also sell larger "Bayer" packages. Aspirin is the trade mark of Bayer Manufacturing of Monocetate of Acetylsalicylic acid.—Adv.

Clean up the little tasks of today and be ready for the big tasks of tomorrow.

SWAMP-ROOT FOR KIDNEY AILMENTS

There is only one medicine that really stands out pre-eminent as a medicine for curable ailments of the kidneys, liver and bladder.

Dr. Kilmer's Swamp-Root stands the highest for the reason that it has proven to be just the remedy needed in thousands upon thousands of distressing cases. Swamp-Root makes friends quickly because its mild and immediate effect is soon realized in most cases. It is a gentle, healing vegetable compound.

Start treatment at once. Sold at all drug stores in bottles of two sizes, medium and large.

However, if you wish first to test this great preparation send ten cents to Dr. Kilmer & Co., Binghamton, N. Y., for a sample bottle. When writing be sure and mention this paper.—Adv.

It is easy to get rich after you have the first million.

MAKING PROFIT IN CUT TIMBER

Understanding of Elementary Principles of Forestry Will Assist Farmer.

CAN SELL IN CARLOAD LOTS

Wasteful Practice to Put High-Priced Logs to Ordinary Use on Farm—Much Pine, Yellow Poplar and Cotton Wood Used for Pulp.

(Prepared by the United States Department of Agriculture.)

An understanding of the elementary principles of farm forestry will enable the farmer to market his timber far more profitably than it is done on the average farm. In the Southern States, and in many other sections of the country as well, high-grade logs of such trees as white oak, yellow poplar, red gum, ash, cherry, and black walnut can usually be sold in carload lots direct to manufacturing plants, even though these are located at some distance. Many local log-using plants buy in lots as small as a wagon or truck load. In the South clear logs of white oak and yellow poplar 16 inches and up in diameter are most profitably sold to sawmill plants especially equipped for quartering and veneering woods. High prices at loading points make it wasteful to put such logs to ordinary use at home.

Paper Pulp Wood.
Large quantities of pine are cut and sold by southern farmers for paper pulp wood. Yellow poplar and cottonwood, red gum, tupelo and others in less amounts are used for the same purpose, according to forestry specialists. The wood must be peeled and is usually marketed in 4-foot lengths and 3 to 10 inches in diameter. Pulp wood is sold by the cord, and the prices usually range from about \$4 to \$6 for pine and from \$5 to \$9 for poplar, cottonwood, etc.

Farm Timber Product.
Railroad ties have long been a standard farm timber product. As a rule, however, the price represents only fair wages for cutting, hewing, and hauling, with little return for the timber itself. For example, a tie 7 inches by 8 inches by 8 1/2 feet long, if sold at 50 cents, when the items in the cost of manufacture are taken into account, would have a value equivalent to the same amount of lumber valued at \$16.50 a thousand board feet. This is a low figure for white oak. It is often a mistake to cut a young tree for one small tie when in a short time the tree could produce two ties.

INSPECTION SERVICE GROWS
Certificates issued by inspectors State Condition of Interstate Shipments.
The inspection service for shipments of fruits and vegetables, started in 1917 by the bureau of markets, United States department of agriculture, has been extended to cover 150 designated

markets. The certificates issued by inspectors upon request state the condition of interstate shipments as they arrive at market centers and are used as a basis for settling claims that may arise between shipper and consignee.

WHITE LEGHORN BEST LAYER

markets. The certificates issued by inspectors upon request state the condition of interstate shipments as they arrive at market centers and are used as a basis for settling claims that may arise between shipper and consignee.

WHITE LEGHORN BEST LAYER

Average Total Production of Eggs During Life is About 500—Profitable Four Years.

The White Leghorn is the most important egg-producing breed at the present time. The average life of a White Leghorn is about six years. The average total production of eggs is above 500 and the maximum possible above 1,000, but they are seldom profitable to keep after the fourth year.

REMOVE RAM DURING WINTER

Should Not Be Permitted to Run With Ewes Because He Gets "Bossy" and Eats Too Much.

The ram can be allowed to stay with the ewes until winter and then he should be taken away from them. If he stays with the ewes during the winter he will eat too much, get "bossy" and hurt them around, often causing abortions.

THOUSANDS OF WILD ANIMALS DESTROYED

At Least \$5,000,000 Saved to Farmers and Stockmen.

Marked Decrease in Number of Coyotes Followed by Corresponding Decrease in Loss of Sheep, Cattle, Pigs and Poultry.

(Prepared by the United States Department of Agriculture.)

Taking the estimates of farmers and stockmen themselves, there has been saved to them during the past year not less than \$5,000,000 from the hunting of predatory wild animals by the United States department of agriculture, in co-operation with the states. The work is done by the bureau of biological survey and such agencies as are designated by the various states. During the past fiscal year about 32,000 wild animals were killed under the direction of the biological survey by a force of between 400 and 500 skilled hunters. Indications are still greater numbers were killed by poisoning, though no actual count was made of animals thus destroyed.

Extensive poisoning operations were conducted in the great sheep-growing sections of Arizona, Colorado, Nevada, New Mexico, Utah, and Wyoming. This was followed by a marked decrease in the number of coyotes, particularly with a corresponding decrease in the losses of sheep, cattle,

Half-Grown Mountain Lions Snapped in Top of a Yellow Pine Tree—There Are Still a Considerable Number of These Animals in the West Which Have Eluded the Hunters.

pigs, colts, and poultry. Stockmen say that on many important ranges and lambing grounds the former heavy annual losses have become negligible or have been entirely eliminated. As an illustration, there is an area about 75 miles in diameter in western Colorado where sheep owners formerly reported an average loss of about 25 sheep a day throughout the season. Poisoning operations have been conducted through two successive seasons. Destruction of predatory animals has been so thorough that sheep now range freely, sometimes unattended for several days in succession, without loss. Losses throughout the area are nominal.

BORAX USED IN FERTILIZER

Container Must Be Properly Marked According to Order of Secretary of Agriculture.

A recent order signed under the control act by the secretary of agriculture, and issued by the bureau of soils of the United States department of agriculture provides as follows:

"That hereafter no licensee handling or dealing in fertilizers or fertilizer ingredients shall sell for application to the soil any mixed fertilizer which contains more than one-tenth of 1 per cent of boron, expressed as anhydrous borax, unless the container thereon be marked, tagged, branded, or labeled so as to show plainly and conspicuously, as part of the analysis, the percentage of borax present."

ANIMAL FOOD IS ESSENTIAL

Farmer Makes Mistake in Neglecting Any of Elements in Ration Stimulating Eggs.

Many poultry flocks which receive an abundance of fine quality grain do not lay many eggs in the winter due to a lack of animal food like sour milk, buttermilk or beef scrap. Many experiments by practical farmers prove the value of both beef scrap and sour milk in the hen's ration. At the present price of grain and eggs the farmer can hardly afford to neglect any of the elements in the ration which enable the hen to pay for her feed.

EXCELLENT FEED FOR SHEEP

Ewes Thrive on Three to Five Pounds of Silage Daily, With Alfalfa as Roughage.

An ideal winter feed for breeding ewes is three to five pounds per day of good corn silage to each ewe, and winter alfalfa hay they will eat up clean. The silage should be made from well-matured, well-cured corn.

FARM ANIMALS

ATTENTION TO SICK ANIMALS

Inability of Laymen to Recognize Ailments Often Results in Loss of Valuable Stock.

(Prepared by the United States Department of Agriculture.)

The tendency of laymen to engage in the diagnosis and treatment of diseases of live stock is in a great many instances resulting in losses of animals through inability to properly recognize ailments in time to apply needed treatment, or through applying remedies not indicated in the specific cases. This is particularly dangerous in the handling of infectious and contagious diseases where not only the original herd is at stake, but where,

Flank Injection—Proper Handling of Hog Cholera Treatment is Absolutely Essential to the Checking of the Disease.

through the spread of infection, other animals may become exposed and infected.

In the work of controlling hog cholera, for instance, perhaps the greatest hindrance has been the tendency of farmers to attempt the diagnosis and treatment of their own herds, or else to call in an untrained layman, who frequently does not recognize the disease or advises the wrong procedure in the handling of the outbreak. According to experts it is not always an easy matter to recognize hog cholera, as symptoms are sometimes obscure. Other ailments of swine, such as pneumonia, worms and tuberculosis, at certain stages of development, somewhat resemble hog cholera. Accordingly, training and experience are required to distinguish between these and hog cholera.

The practicing veterinarian should acquire all possible knowledge pertaining to control and suppression of hog cholera. Of late many complications associated with the disease have created a multiplicity of opinions among those who claim to understand the various ailments of swine, and even within the veterinary profession hasty judgment has in some cases led to losses which could have been avoided through a careful consideration of facts, proper diagnosis and treatment. This should emphasize the necessity for the study of cases, including the history, environments and circumstances involved in an outbreak, before attempting to decide on the cause of trouble. Then comes the physical examination of the animals. Look for abnormal action, breathing, gait, appetite, digestion and other functions. Next, take the animal's temperature with a good, reliable thermometer. Even then positive diagnosis is not always possible until a post-mortem examination has been made, which means an examination of the various organs and parts of the body after death.

It is evident that all swine-producing localities should have someone available whose services, based on training and experience, are reliable in detecting and prescribing for diseases of live stock. And farmers should realize generally that they can not afford to jeopardize their herds by attempting to administer treatment which requires a certain amount of technical application. It is better to call a qualified veterinarian than to run the risk of losing valuable animals, to say nothing of the possibilities of causing a widespread epizootic outbreak of a destructive animal disease.

EXPERIMENT IN HOG FEEDING

Tests at Ohio Station Show That Animals Fed on Corn Alone Make Costly Gains.

Tests in swine feeding at the Ohio experiment station show that pigs when fed on corn alone make costly and slow gains as compared with the more up-to-date methods of using supplemental feeds, such as tankage or skim milk, with corn.

LESS MEAT IF BACK AND KIDNEYS HURT

Take a Glass of Salts to Flush Kidneys if Bladder Bothers You.

Eating meat regularly eventually produces kidney trouble in some form or other, says a well-known authority, because the uric acid in meat excites the kidneys, they become overworked; get sluggish; clog up and cause all sorts of distress, particularly backache and misery in the kidney region; rheumatic twinges, severe headaches, acid stomach, constipation, torpid liver, sleeplessness, bladder and urinary irritation.

The moment your back hurts or kidneys aren't acting right, or if bladder bothers you, get about four ounces of Jad Salts from any good pharmacy; take a tablespoonful in a glass of water before breakfast for a few days and your kidneys will then act fine. This famous salts is made from the acid of grapes and lemon juice, combined with lithia, and has been used for generations to flush clogged kidneys and stimulate them to normal activity; also to neutralize the acids in the urine so it no longer irritates, thus ending bladder disorders.

Jad Salts cannot injure anyone; makes a delightful effervescent lithia-water drink which millions of men and women take now and then to keep the kidneys and urinary organs clean, thus avoiding serious kidney disease.—Adv.

Opening the Flood Gates.
"Did Marks take a prominent place in the late war?"
"Did he? Ask Marks!"

BOSCHEE'S SYRUP.

A cold is probably the most common of all disorders and when neglected is apt to be most dangerous. Statistics show that more than three times as many people died from influenza last year, as were killed in the greatest war the world has ever known. For the last fifty-three years Boschree's Syrup has been used for coughs, bronchitis, colds, throat irritation and especially lung troubles. It gives the patient a good night's rest, free from coughing, with easy expectation in the morning. Made in America and used in the homes of thousands of families all over the civilized world. Sold everywhere.—Adv.

Not Tied.

A small boy of Columbus was out riding with his mother one day recently. When he saw several pumpkins in a field. He wished to stop the machine and get one, but the mother explained that this would not do, that the pumpkins on the vine were the property of the man who owned the field, and that in due time he would gather them for winter use. The boy was convinced, and said no more until he happened to see a pumpkin unattached to a vine, lying at the side of the road. "Well, mother," he said, "I guess we can have that one. It isn't tied."—Indianapolis News.

In a Quandary.

"Here's a letter from a Frenchman," said the mayor of Toadville. "The school teacher translated it for me. The writer wants to know if Hank Puckett of this town is the right kind of a man to marry his daughter." "What are you going to write him, four honor?" "I don't know exactly what to say. Hank was arrested once or twice for hog stealing, and I suspect he made a little 'moonshine' now and then, but the ornery critter went over to France and lost an arm."—Birmingham Age-Herald.

Good Cause.

"Do you believe in signs?"
"Certainly, when they warn me to look out for the locomotive."

Knavery has limits, foolishness none.

Sure Relief

HOW TO GET RID OF CONSTIPATION

It's needless and dangerous to suffer from a clogged up system because it often lays the foundation for a lifetime of misery and ill-health.

DR. TUTT'S LIVER PILLS taken one or two at bedtime, quickly eliminates all poisonous waste matter from the system and strengthens the bowels.

Dr. Tutt's Liver Pills

Relief from asthma

W. N. U., BALTIMORE, NO. 7-1920.

One good turn always leads up to hope for another.

Garfield Tea keeps the liver normal.—Adv.

The way of the transgressor is hard on his friends.

Many a man never gets on the popular side until he joins the silent majority.

The office may seek the man, but the boy looking for a job comes in bunches.

Small and Blue.

At a tea one afternoon, just as I was going upstairs to get my wraps, one of my girl friends said: "I wore my new hat. Try it on and see how you like it. It's a small blue one." While I was turning around before the mirror viewing the hat from all sides a woman I hadn't met came into the room. I noticed that she stood and watched me while I took off the hat and put on my own, but thought nothing about it—until she passed me in the hall wearing the small blue hat that I had thought was my friend's.—Exchange.

Treasures Hidden in Mexico.

Vast treasures of silver and gold, stolen by bandits over a period of many years, are cached in the mountains of Chihuahua, Mexico, and in the remote and wild sections of the Mexican states of Durango, San Luis Potosi and Zacatecas, according to American mining men who have been investigating operation of foreign-owned mines in bandit-ridden sections of the southern republic.

Among the peons rumors run of buried treasure, stored in Chihuahua and Durango mountains by the bandit Francisco Villa, rivaling the riches Cortez found among the people when the Spaniards conquered Mexico.—Detroit News.
