Gave Pleasing Play.

In spite of the steady downpour of rain and the miserable road conditions a large crowd was on hand to the initial performance of "The Man Without a Country" presented by the junior class of the Vocational School at Spring Mills on Thursday, March 4th. A very entertaining comedy started the program, furnishing the audience cause for much hearty laughter throughout the play. In this and in the patriotic play which followed, there was excellent acting, some very difficult situations being handled with a fine understanding of what the moment required. At the conclusion of the play the class was showered with congratulations.

This entertainment was scheduled at Centre Hall on Saturday, the 6th, but the impassable roads made necessary a postponement. It is now planned to present these plays in Centre Hall, with some new and very interesting features shortly after April 1st. The date will be well advertised; and tickets purchased for March 6th will be accepted at the later date.

Are there "Big Profits" in the Telephone Business?

FOR twenty years the operations of The Bell Telephone Company of Pennsylvania have never afforded the owners of the property more than a reasonable return on a good, sound, conservative investment.

This is not a Company that has been marked by frenzied finance. On the contrary, there is not a drop of so-called water in our capitalization.

It has created no great fortunes.

Because the Company is big, many people think it has made "all sorts of money" and is still making it.

The fact is—as the published records show—that fancy dividends have always given way to good plant maintenance, adequate reserves against depreciation and common-sense stability of the business.

That's what good service depends on!

At the present time those essential elements are facing serious danger. There are not revenues enough to meet our necessities. And unless adequate rates are forthcoming, and quickly, the outcome is obvious—a service dangerously impaired and a property which, because of the uncertainty of continued returns, will not attract new capital for improvements and extensions.
