CONDENSED CLASSICS

> **CAPTAINS** COURAGEOUS

> > By RUDYARD KIPLING

Condensation by James B. Connolly

Rudyard Kipling the British School of Art. He was educated at the United Service College, Westward Ho, of the lurid Stalky

Hills" and six more of his best stories, which established his fame through out the world.

the tales of native life and adventure "beyond the pale" India was revealed anew men from sea to sea.

Within the next ten years Kipling travsled round the world, married, lived in America, England and South Africa, and finally became so imbued with imperial-ism as almost to destroy his art. His "Barrack Room Ballads" and "Seven Seas" revealed him as an inspiring poet who "splashed at a ten-league canvas with brushes of camel's hair." of his three noveis, "The Light That unanimity that the careless fisherman Failed" is a tale of Suez: "Captains Courhad never—absolutely never—shown ageous" of Gloucester fishermen, and "Kim" breathes again the subtle and

mysterious fascination of India.
With the "Jungle Books" Kipling enthralled a new audience. These, and the incomparable "Just So Stories," written to his son who was killed in the war, en-

TARVEY CHEYNE'S father was immersed in amassing more money; his mother was busy with her nerves; and so we have Harvey, at fifteen years, the insufferable type that most grown males want to heave a brick at on sight.

He was a passenger on this ocean liner, and she was crossing the Grand Banks in a fog. He came into the smoking room saying: "You can hear the fish boats squawking all around Wouldn't it be great if we ran

He asked for a cigarette. Somepathy, a few more tender words, a body with a diabolical sense of humor began to feel queer, but he had then came the great day when they left vey lit it up and went on deck. He bragged of never being seasick; so now he went aft to the turtle deck, and he was still there, wrestling with the cigar and not caring much what happened, when a long gray sea swung out of the fog and took him overboard.

Harvey was next aware of being man in a blue jersey, who said: "You in dory with me. Manuel my name."

Later he was holsted aboard of a schooner and lowered into her heaving Here," a hundred quintals of fish in fo'c's'le where men in ollskins gave her hold, was laying her course for him a hot drink and put him to sleep Gloucester, Harvey's father was bein a bunk. When he awoke a boy ginning to wonder in his mahogany whose name was Dan asked him smilingly if he was feeling better. The better game to drop the ceaseless schooner was the "We're Here" of struggle for more power and wealth. Gloucester, and the boy's father, Disko What was the use of it all-with no Troop, was her skipper.

Disko; and demanded that he be taken retary brought him a telegram. back to New York, where, as he told Disko condescendingly his father ter. Mr. Cheyne laid his face down would pay them very well for their on his desk, breathed heavily for trouble; he added many other items awhile; and theh, heaving orders to what his father could and would right and left, started that run of do. Disko, as it happened, was an which railroad men talked for many old-fashioned type of banks fisherman, a day. Three days and a half it was wise in the ways of fish but knowing from coast to coast, with railroad spelittle of the great world. He decided clalists along the way dividing huge that this boy with his talk of his bonuses; for it was the great Harvey father's immense wealth must be Cheyne who was racing East to see crazy; with an idea of restoring the his rescued boy, and the boy's mother poor boy to sanity he offered him the was with him. berth of second boy on the "We're Here" at \$10.50 per month.

his sullenness worried nobody; he met was a boy with toughened figure went to work. The dories were re and a keen, clear eye. turning to the vessel with their catches of fish; so for the first work of his things did not interest young Harvey life Harvey was set to helping Dan What his heart yearned for was to hoist in the dories, to swabbing the gurry from their insides and then to purchased sailing ships on the Pacific nesting them on the deck. By the Coast, The ships he got when he was time he had finished doing that and ripe for them; and for Dan, son of eating his supper it was nighttime, and Disko Troop-seeing that he could not Manuel, Penn, Long Jack, Old Salters. offer money—he got a berth as mate Tom Platt-all hands were standing of one of them, with the promise that

by to dress fish. Manuel and Penn stood deep among the fish, flourishing sharp knives. "Hi!" shouted Manuel, with one finger under the gill of a cod, the other Gloucester are the able little vessels in an eye. The blade glimmered, there The 'We're Here,' she's one. I owe s was a sound of tearing, the fishslit from throat to tail-dropped at Long Jack's feet., "Hi!" cried Long Jack and, with a scoop of a mittened hand, dropped the cod's liver into 'a basket; another wrench and scoop sent head and offal flying. The gutted fish slid across to Old Salters, who snorted flercely, ripped out the backbone and splashed the headless, gutless fish into a tub of water.

Harvey pitched the washed fish lown into the hold, from whence came tramplings and rumblings as Tom he says traveling 150 miles an hour ir Platt and Disko moved among the salt | a plane is 'crawling through the air.'

rubbed on rough flesh from below made a steady undertone to the clicknick of the knives in the pens, the wrench and schloop of torn heads, the flap of ripped-open fish falling into the tub on deck.

At the end of an hour Harvey wanted terribly to rest, but also for the first time in his life he was one of a working gang of men; and so. beginning to take pride in the thought. he held on grimly. Not till the last fish was stowed below did a man rest But when that moment came! Disko and Old Salters rolled toward their cabin bunks, Manuel and Long Jack went forward. Tom Platt waited only long enough to slide home the hatch.

All hands were below and asleep, Xxxxxxxxxxxxxxxxx except the two boys; they had to stand watch; so by and by the moon was born Dec. 30, looked down on one sinn boy in 1865, in Bombay, erbockers, which was Harvey, staglooked down on one slim boy in knick-John Lockwood gering around the cluttered deck; John Lockwood While behind him, waving a knotted author, was profes-Dan, yawning and nodding between taps he dealt the first boy to keep him

The "We're Here" was on a salt-North Devon, scene fishing trip which meant four months away from home; so there was time At seventeen he for Harvey to learn many strange new was in India once things if he cared to. After a time, nore, a journalist as the pride in honest work well done sefore he was began to grip him, he cared. He before he was twenty-four he had completed "Plain learned to fish from a dory; to make Tales From the his way in safety around a heaving vessel's deck; to know what each rope and sail aboard a vessel was for. Disko allowed him, when the wind was light, to steer the vessel from one berth to another, and wonderful was Harvey's sense of power when he first with a brilliance, color and passion un-surpassed; Mulvaney and his pals, the felt the vessel answer to his touch of exuberant "Soldiers Three," captivated the wheel. Almost did he come to understand, as a fisherman understands, the never-absent dangers of the banks, the eternal fogs, the tides, the gales, the wicked seas; and learned, too, fishermen's opinion of the officers of the great steamers who, after cutting a vessel down, raise high hands to heaven and swear with had never-absolutely never-shown so much as a single light.

He saw one day a foul, draggled, unkempt vessel heaving up past the "We're Here," for all the world like a blowsy, frousy, bad old woman sneershrined him in the hearts of children the ing at a decent girl, saw her sail off and into a batch of watery sunshine and-go under, taking all hands with her! He saw, while his hair stood on end, a whiteness moving in the whiteness of the fog with a breath like the breath of a grave; and then he heard a roaring, plunging and spouting; that was his first iceberg. He saw the surf break over Virgin Rocks; and the fish strike in so thick on a shoal that scores of dories stood riding gunnel to gunnel while their crews battled for the catch. He saw a gale break so sudden and fierce that everywhere on the sea were men in dories cutting riding lines and racing for their vessels, but some

never making their vessels. So he passed four busy, wonderful ed him a thick, oily cigar. Har- months, growing in body, mind and soul with every hour that passed; and the banks for home. Toil hardship and danger were now mostly behind them; there was left little to do but stand watch and study the folding and packing away of the morning mists, the hurry of winds across the open spaces, the glare and blaze of the high sun; to harken to the grinding of the on a pile of fish with a broad-backed booms against the masts, the creaking of the sheets against the bitts, the sail filling to the roaring winds.

Now about the time the "We're offices in Los Angeles if it wasn't a son to hand it to? He was still work Harvey went up on deck to see dering when one day an excited sec-

GARDEN WORK IS MOST IMPORTANT

Mistake to Think That Cultivation Is Done for Sole Purpose of Killing Noxious Plants.

ROOTS NEED SUPPLY OF AIR

Soil Particles Are Broken Up and Plant Food Made Available for Rootlets-Dust Mulch Will Retain Moisture.

(Prepared by the United States Department of Agriculture.)

Most people have an idea that gardens are cultivated solely for the purpose of killing weeds. As a matter of fact, the killing of weeds is just one object of garden cultivation, say the specialists of the United States department of agriculture. The roots of plants require air just the same as do the tops, and if the ground is packed or hard or is sunbaked over the surface after a beating rain, the roots of the plants will turn yellow, and if not cared for will die. The same thing is true where the land is poorly drained and waterlogged. The water keeps out the air and the roots cannot feed the plants.

Cultivation has another object, in that it breaks up the soil particles makes plant food available for the feeding rootlets of the plants.

Some Gardens a Wheel Hoe Can Be Used to Good Advantage.

Many persons, however, make the mis take of cultivating too deeply, and by so doing cut off or injure the feeding rootlets and deprive the plant of its source of nourishment and support. Frequent shallow cultivation during dry weather results in the formation a mulch or blanket to retain moisture.

Cultivating After Rains. just as soon as it is sufficiently dry to the tracks made by the horses or to be safely worked after heavy rains. If it is not cultivated, a crust forms, the surface bakes and the crops are injured. The same will apply where irrigation is used, and it has been found best to give the soil a thorough soaking, then cultivate as soon as it is dry enough, and apply no more water until absolutely necessary.

The hoe and the steel rake are the most important tools for cultivating the small garden. On a larger scale a wheel hoe and a horse cultivator may be used to advantage. Even where horse-drawn tools are occasionally used, the greater part of the work, especially during dry weather, may be performed by means of a common steel rake. It is not necessary to go very deeply into the soil, but merely to stir the surface.

A Tool That Helps. A handy little tool for loosening the soil can be made from a piece of thin board two inches wide and fourteen inches long, with one end whittled down to form a handle and the oppo site end provided with three No. 6 or No. 3 box nails or wire brads. This little home-made implement can be used very soon after a rain to loosen the surface, so that any small seeds can break through. The wheel-hoe outfits are provided with a number of different shovels and scratchers adapted for the different types of work to be performed. These implements have the advantage that one can go over the garden very rapidly and break up the surface of the soil in a comparatively short time. It is generally necessary, however, to follow with the hoe to remove any weeds that have been destroyed by the wheel cul-

Kill Weeds Young. It should be borne in mind that the time to kill weeds is when they are just coming through the ground. If allowed to become established, it is much more difficult to get rid of them than if they are taken in time. If the top two inches of soil is kept continuously and thoroughly loosened, no serious difficulty in keeping out weeds is probable.

BATTLE ON BARBERRY IS BEING CONTINUED

Approximately 2,000,000 Plants Destroyed in 1919.

Federal and State Authorities Combine to Protect Wheat Against Black Stem Rust-Other Crops Are Attacked.

(Prepared by the United States Department of Agriculture.)

Approximately 2,000,000 common barberry bushes were dug up and destroyed during 1919 in connection with the combined efforts of federal and state authorities to protect wheat against black stem rust which cannot survive unless it is able to spend one period in its life cycle on the leaves of the common barberry. For this work the past year the federal government appropriated \$150,000. The territory in which the fight was carried on comprises Colorado, Indiana, Illinois, Iowa, Ohio, Michigan, Minnesota, Montana, Nebraska, North Dakota, South Dakota, Wisconsin and Wyoming, which states supplemented the federal funds to a considerable degree. The combined expenditures were small in comparison with the size of the menace to wheat production by this disease. Cereal disease experts in the United States department of agriculture estimate that the wheat crop of 1919 in the United States was reduced 53,000,000 bushels by black stem rust alone in addition to damage by scab and other diseases. This damage by black stem rust has only been exceeded in one previous season namely in 1916, when the total reduction of the wheat crop by this disease was 200,000,000 bushels. In addition to the 1919 loss of 53,000,000 bushels of wheat due to ravages of black stem rust, there was a loss of 17,400,000 bushels of oats and 4,700,000 bushels of barley due to the same cause.

DON'T FORGET CLOVER

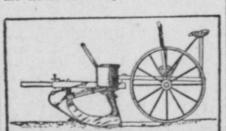

Corn, wheat, and clover. That is the most important rotation in America. Where clover is no longer grown, yields are beginning to

SMOOTHS SURFACE OF FIELD

Planter Attachment Permits Depositing Seed at Uniform Depth-Device Is Simple.

The Scientific American, in illustrating and describing a planter attachment, the invention of F. I. Class-

on of Ottawa, Ill., says: The invention relates to planter of a layer of fine dust which serves as attachments and one of the principal objects is to provide a means for evening and smoothing irregularities The soil should always be cultivated in the surface of the ground due to

A Side Elevation of a Corn-Planter Equipped With the Device.

uneven harrowing and thereby allowing the drill to deposit the seed at a uniform depth beneath the surface The device is characterized by its simplicity, durability and economy ir manufacture and maintenance.

SORE SHOULDERS IN SPRING

One-Half Ounce of Sweet Niter, 25 Drops of lodine, Mixed With Oil, Is Favored.

When horses begin to get sore shoulders in the spring, try one-half ounce of sweet nitre, 25 drops of tineture of iodine, mixed with three ounces of lard or olive oil. Clean the sore spots thoroughly with water and apply this mixture at night after collar has been removed. It is very cooling and healing.

WINDBREAK FOR AN ORCHARD

Windstorms Break Limbs of Trees When Loaded With Fruits-Evergreens Give Protection.

An orchard often needs the protec tion of an evergreen windbreak. Windstorms break the limbs when loaded with fruit or scatter unripened fruit on the ground. By lessening the force of the wind against the orchard it is sometimes possible to reduce the in. jury during storms.

FALLEN LEAVES AID GARDEN

They Should Be Dug Into Soil to Rot and Assist in Growing Better Crops in Later Years.

Many people burn fallen leaves, DRIVE MALARIA OUT OF THE SYSTEM which is a very wasteful practice, as Soils have much to do with the these leaves, besides containing a considerable amount of plant food, are heavy or of gumbo type, choose the of the greatest value in loosening hardiest varieties. Also plant a few heavy soils. They should be dug into of the native fruits that may be grow- the garden to rot and help to grow better crops in later years.

Chronic Cough--Poor Appetite--Sleepless

Montrose, W. Va.—"Thirty-one years ago I took cold which brought on my old trouble, a cough. I had one every winter for years, but always before with the return of spring and war m weather it would I eave me, but this time everything failed to help me, and with the return of spring I did not gain any or find any relief. I was thin, had poor appetite and spent restless nights. We became discouraged as some had a I ready expressed themselves by saying they thought the cough had gone so far there was little chance of my recovery. But a neighbor had all this time been advising me to use Dr. Pierce'r Golden Medical Discovery, stating how far gone her husband was with a cough and when everything had failed he began to use the 'Golden Medical Discovery,' which restored him to health. That was several years ago and his health is still good, so my husband got me a bottle of the 'Discovery.' I left it at my bedside that night and just took a little sip from the bottle often, and it soon allayed the irritation in my throat and I got some sleep. I continued its use and the change was great indeed. I began to gain in flesh, my appetite returned and by the time I had completed two or three bottles I was sound and well, and that dreadful cough that I had endured so many winters has since that time, only been slight when I have a cold. My weight then was about 125 pounds and now after \$2 years I am enjoying good health, weigh about 170 pounds, the mother of 12 children, and I am doing my own housework. I thank the good Lord that there is such a medicine as the 'Golden Medical Discovery' which was the means of restoring me to health when I seemed to be going hastily to the grave."—Mrs. Elizabeth S. Annon, Route I, Box 25.

Richmond, Va.—'T can highly recommend Dr. Pierce's Anuric Tablets to any-

Richmond, Va.-"I can highly recom mend Dr. Pierce's Anuric Tablets to any-one troubled with excess of uric acid and, also, those who have any sort of bladder weakness. I have had greater relief from 'Anuric' (anti-uric-acid) than any kidney remedy I have ever taken, and it is a pleasure to recommend it."-Mrs. J. J.

Often Caused by **Acid-Stomach**

stomach, who is constantly beiching, has heartburn and suffers from indigestion have anything but a bad breath? All of these stomach disorders mean just one thing—

Acid-Stomach. EATONIC, the wonderful new stomach Acid-Stomach.

EATONIC, the wonderful new stomach remedy in pleasant tasting tablet form that you eat like a bit of candy, brings quick relief from these stomach miseries. EATONIC sweetens the breath because it makes the stomach sweet, cool and comfortable. Try it for that nasty taste, congested throat and "heady feeling" after too much smoking. If neglected, Acid-Stomach may cause you a lot of serious trouble. It leads to nervousness, headaches, insomnia, melancholia, rheumatism, sciatica, heart trouble, ulcer and cancer of the stomach. It makes its millions of victims weak and miserable, listless, lacking in energy, all tired out. It often brings about chronic invalidism, premature old age, a shortening of one's daya. You need the help that EATONIC can give you if you are not feeling as strong and well as you should. You will be surprised to see how much better you will feel just as soon as you begin taking this wonderful stomach remedy. Get a big 50 cent box from your druggist today. He will return your money if you are not satisfied.

FATONIC FOR YOUR ACID-STOMACH)

For pimples, black-heads, freckles, blotches, and tan, as well as for more serious face, scalp and body cruptions, hives, eczema, etc., use this scientific compound of sulphur. As a lo-tion, it soothes and heals; taken internally tion, it soothes and heals; taken internally—
a few drops in a glass of water—it gets at the
root of the trouble and purifies the blood.
Physicians agree that sulphur is one of the
most effective blood purifiers known. Remonths a good complexion isn't skin deep nember, a good complexion isn't skin deep it's health deep Be sure to ask for HANCOCK SULPHUR COMPOUND. It has been used with satisfactory results for over 25 years.
