

FARMERS DO WELL

Record Prices Paid Wheat Growers of Western Canada.

Will Get Above 40 Cents Over the Fixed Scale Set—World Looking to the Dominion for its Grain.

It will be of interest to many readers to learn that their farmer friends in Canada will do so well out of the wheat they grew on western Canada's prairies last year.

There was a fixed price of \$2.15 per bushel paid for their wheat last season.

Not knowing the price at which it would be possible to market the crop, the Canadian grain board, which organization handled the whole of the crop last summer, fixed \$2.15 as a minimum price for No. 1 wheat, and arranged that each farmer should be given certificates for the quantity of wheat he delivered. The amount received over and above the fixed price which was paid to the farmers when selling their wheat was to be divided pro rata at the end of the season, and the holders of these certificates will, therefore, participate in the extra price received according to the quantity of wheat sold.

The latest advices are that the wheat board will pay at least 40 cents a bushel over the fixed rate of \$2.15 a bushel for their wheat of last season. This means that about \$40,000,000 will be distributed among the farmers of Alberta, Saskatchewan and Manitoba. This sum represents the difference in the price at which the wheat crop was sold and the price that was fixed for last season's crop.

Canadian Wheat in Demand.
A declaration that Canadian wheat would in all probability sell this year at between \$3 and \$5 per bushel, was made recently before a conference of western supporters of the government by Dr. Robert Magill, who was one of a deputation from the Winnipeg grain exchange.

Dr. Magill argued in favor of open trading from the aspect of world conditions. He stated that no wheat could be exported from Russia owing to internal troubles.

Roumania would have absolutely none to export, India was prohibiting export, while Australia's acreage would fall from 12,000,000 to 7,000,000. The result would be that Australia would scarcely have enough to feed herself, and there would be absolutely no wheat for Europe, except from the Argentine and North America.

Dr. Magill, according to formal announcement, though it would be impossible to secure as good a price for the producer by control as by the open market. The United States market was now open, and, according to present prospects, there would be mighty little to spare from that quarter. The net result would be that Canadian wheat would undoubtedly go to a record figure.—Advertisement.

Certainly Not.

INVENTIVE GENIUS ROBS CALOMEL OF NAUSEA AND DANGER

Doctors' Favorite Medicine Now Purified and Refined from All Objectionable Effects. "Calotabs"—the New Name.

What will human ingenuity do next? Smokeless powder, wireless telegraphy, horseless carriages, colorless iodine, tasteless quinine—now comes tasteless calomel. The new improvement called "Calotabs" is now on sale at druggists.

For biliousness, constipation and indigestion the new calomel tablet is a practically perfect remedy, as evidenced by the fact that the manufacturers have authorized all druggists to refund the price if the customer is not "perfectly delighted" with Calotabs. One tablet at bedtime with a swallow of water—that's all. No taste, no nausea, no griping, no salts. By morning your liver is thoroughly cleansed and you are feeling fine, with a hearty appetite. Eat what you please—no danger—go about your business.

Calotabs are not sold in bulk. Get an original package, sealed. Price, thirty-five cents.—(adv.)

Injuring the Profession.
"Here's a man says the freak business is falling off." "He's right. Too many outside of sideshows."

One dose of Dr. Peery's "Dead Shot" expels Worms or Tapeworm. Its action upon the Stomach and Bowels is beneficial. No second dose or after purgative necessary.—Adv.

PREPARING SILO FOR FUTURE USE

Every Farmer Should See That Structure Is in Proper Condition for Corn Crop.

BEST COATING FOR INTERIOR

Go Over Huge Receptacle Carefully and Seal Cracks With Tar and Oakum—in Filling Prevent Air Pockets by Packing.

(Prepared by the United States Department of Agriculture.)

Corn-canning time—that period when a portion of the corn crop is prepared and sealed in the silo—will soon be here. Every silo owner should see that the structure is in best condition to receive the succulent corn crop.

As the farmer gives the silo the thorough "once over" he must look out, first of all, for proper protection for the interior. The annual application of a mixture of coal tar and creosote, both inside and outside, adds greatly to the life of a wood silo, as it protects the wood against decay. The coal-tar creosote solution is relatively inexpensive and the cost of treating the silo with this material is so slight that no silo owner should allow his silo to stand without this protection. It is also essential that he tighten loose hoops in order that no cracks or crevices allow air seepage. If the hoops have been kept tight, however, during the period that the silo is empty, they should be loosened just before filling to prevent buckling or breaking of hoops due to swelling when the dry staves absorb moisture from the green silage.

Look for Cracks in Old Silos.
In the case of wooden silos it may be advisable to cement around the bottom of the silo where the foundation joins the superstructure. In the case of old silos it will be profitable for the farmer to go over them carefully to look for cracks, and where he finds them to seal with tar and oakum, wood filler, or other effective material. If the bottom of the silo has decayed slightly, the owner may saw off whatever amount is necessary, and then, by the use of blocking, gradually lower the silo to the foundation again, cementing around the base as previously described.

When the silo is air-tight and able to stand the most rigid inspection, the owner may consider the actual work of filling. A wise precaution is to place several feet of straw in the bottom of the silo to act as a protective blanket between the bottom of the

permit, and prepare a thoroughly pulverized and compacted seed bed. Conserve moisture against a period of drought at seeding time. Use good seed. Fertilize. Sow wheat during the fly-free period, as advised by your farm advisor or state experiment station. Adhere to these practices every year whether the fly is abundant or scarce. They will help to keep it scarce.

ORDER FERTILIZERS AT ONCE
Avoid Transportation Difficulties by Acting Quickly—Phosphate Increases Yield.

Filling the Silo With Corn—More Corn Roughage Is Needed, Especially in Regions Where Legumes Do Not Thrive.

silo and the feed, as ordinarily silage juices collect there unless proper facilities for drainage are provided and the straw acts as a valuable absorbent for this excess of moisture which otherwise might damage the bottom silage.

Must Tramp It Down Well.
In the actual operation of filling the silo it is of paramount importance that no air pockets be left; this is prevented by sufficient tramping. It depends largely on the diameter of the silo how many men should be used to tramp the ensilage, but even in silos as small as 12 feet in diameter, if sufficient help is available, at least three men should be used with an increase in the force as the size of the silo increases.

The proper sealing of the silo also is important, because where the silo is correctly topped off there usually is a minimum loss of the succulent feed. A good plan is to snap the ears from the last three or four loads of corn which are run into the silo. Straw or coarse hay may also be used as a topping. Then oats should be sown over the top of the contents after it has been thoroughly moistened, if necessary, although as a rule the corn, if cut at the proper stage, is moist enough without extra watering.

MOULTING PERIOD IS TRYING
Little Extra Feeding and Provision for Physical Comfort of Fowls Will Be Repaid.

Don't forget the prosperity of your birds during the moult. It is a trying period, when a little extra feeding and provision for their physical comfort will be rewarded by an early return to productive laying at the old stand.

DESTRUCTIVE ENEMY OF OUR WHEAT CROP

Suggestions Made for Fight on the Hessian Fly.

Specialists Recommend Crop Rotation and Not Sowing on Stubble Where Possible to Avoid—Plow All Land Early.

The Hessian fly, one of the oldest and at times one of the most destructive enemies of the wheat crop in the United States, is again on the increase. Specialists of the United States department of agriculture make the following suggestions for combating the pest:

Practice crop rotation. Do not sow wheat on stubble if it is possible to avoid doing so.

Plow under all infested stubble and ruined wheat, where practicable, soon after harvest.

Destroy all volunteer wheat by harrowing, disking, plowing, or some other method.

Plow all land to be sown to wheat as early and deeply as existing conditions

Hessian Fly.

permit, and prepare a thoroughly pulverized and compacted seed bed. Conserve moisture against a period of drought at seeding time. Use good seed. Fertilize. Sow wheat during the fly-free period, as advised by your farm advisor or state experiment station. Adhere to these practices every year whether the fly is abundant or scarce. They will help to keep it scarce.

ORDER FERTILIZERS AT ONCE
Avoid Transportation Difficulties by Acting Quickly—Phosphate Increases Yield.

So valuable has acid phosphate been found in growing wheat, the Ohio station calls attention to the fact that farmers will profit by ordering their fall fertilizers at once. Transportation difficulties may become more acute during the summer and since the manufacture and transportation of acid phosphate are of a seasonal nature the orders should be placed early.

It may be necessary to use considerable fertilizer next fall to combat the Hessian fly, which has been quite destructive during this season. In some cases it is necessary to plant the wheat late and fertilize heavily, depending on the fertilizer to give the wheat a start equal to that of early sowing. At the Ohio station and on many of the county experiment farms the use of 100 pounds of acid phosphate to the acre has increased the wheat yield by five bushels per acre, while the residual effect of the fertilizer is also noted for several years the increase in the hay crop following the wheat paying the entire cost of the fertilizer application in many experiments.

USE SULPHUR AS FERTILIZER
Demonstrated in Many Cases That It Is Valuable Agent, Especially on Alfalfa.

Much evidence has been accumulated during the past five years to show that sulphur in many cases constitutes a valuable fertilizer agent and in many cases gives remarkable results when applied in the presence of lime. In particular, remarkable results have attended its use on alfalfa. Amounts of 100 pounds to the acre have in many cases given remarkable increase in crop.

POULTRY MANURE IS RICHEST
One of Best Fertilizers Made on Farm—Valuable for Its Large Amount of Nitrogen.

Poultry manure is the richest manure made on the farm, but on the ordinary farm not much attention is given it, simply because of the small amount usually made. Poultry manure is valuable chiefly for its large amounts of nitrogen and phosphoric acid, as it contains about three times as much nitrogen and five or six times as much phosphoric acid as ordinary farm manure.

LATE HATCHING NOT FAVORED
Evil Effects Are Strikingly Shown in Culling—Large Per Cent Must Be Thrown Out.

The evil effects of late hatching are strikingly shown in practical culling work among farm flocks. The trained observer can pick out the late-hatched flock by the lack of size, early moulting tendency and poor body capacity of the hens. In a flock of late-hatched birds a large per cent of the hens must be thrown out as culls.

SAY "DIAMOND DYES"

Don't streak or ruin your material in a poor dye. Insist on "Diamond Dyes." Easy directions in package.

"CORNS"

Lift Right Off Without Pain

Doesn't hurt a bit! Drop a little "Frezzone" on an aching corn, instantly that corn stops hurting, then shortly you lift it right off with fingers. Truly! Your druggist sells a tiny bottle of "Frezzone" for a few cents, sufficient to remove every hard corn, soft corn, or corn between the toes, and the calluses, without soreness or irritation.

After Ten Years—Eatonic Proves the Best

"I say, God bless Eatonic," writes Mrs. Della M. Doyen. "I can truthfully say, after suffering with stomach trouble for ten long years, that I have never had anything do me so much good as this one box of Eatonic."
We print these grateful words from this dear lady, so that sufferers everywhere may have hope and a little faith—just enough to give Eatonic a trial. Why, folks, last year over half a million people used Eatonic and found relief.

This is the secret: Eatonic simply takes up the excess acids, poisons and gases, and carries them right out of the body. Of course, when the cause is removed, the sufferer gets well. Stomach trouble causes about seventy non-organic diseases, so, if you are suffering any kind of misery, not feeling well, go right to your druggist today and obtain a big box of Eatonic; cost is a trifle. Use it and find quick, sure relief.

Make this test—you will see, and then, if you are not satisfied, your druggist will hand your money back. He does not want one penny unless Eatonic pleases you. Adv.

The Lord loveth a cheerful giver, and so does every man, woman and child on earth.

END OF EIGHT YEARS MISERY

Used Lydia E. Pinkham's Vegetable Compound and Recovered.

Newark, N. J.—"The doctor said I had an organic trouble and treated me for several weeks. At times I could not walk at all and I suffered with my back and limbs so I often had to stay in bed. I suffered on and on for eight years. Finally I heard that Lydia E. Pinkham's Vegetable Compound was a good medicine and tried it with splendid effect. I can now do my housework and my washing. I have recommended your Vegetable Compound and your Blood Medicine and three of my friends are taking them to advantage. You can use my name for a testimonial."
—Mrs. THERESA COVENTRY, 75 Burnett St., Newark, N. J.

No other medicine has been so successful in relieving woman's suffering as has Lydia E. Pinkham's Vegetable Compound. Women may receive free and helpful advice by writing the Lydia E. Pinkham Medicine Co., Lynn, Mass. Such letters are received and answered by women only and held in strict confidence.

Some More Truths.

WOULD you use a steam shovel to move a pebble? Certainly not. Implements are built according to the work they have to do.

Would you use a grown-up's remedy for your baby's ills? Certainly not. Remedies are prepared according to the work THEY have to do.

All this is preliminary to reminding you that Fletcher's Castoria was sought out, found and is prepared solely as a remedy for Infants and Children. And let this be a warning against Substitutes, Counterfeits and the Just-as-good stuff that may be all right for you in all your strength, but dangerous for the little babe.

All the mother-love that lies within your heart cries out to you: Be true to Baby. And being true to Baby you will keep in the house remedies specially prepared for babies as you would a baby's food, hairbrush, toothbrush or sponge.

Net Contents 15 Fluid Drachms
900 DROPS
CASTORIA
ALCOHOL—3 PER CENT.
A Vegetable Preparation for Assimilating the Food by Regulating the Stomachs and Bowels of
INFANTS & CHILDREN
Thereby Promoting Digestion, Cheerfulness and Rest. Contains neither Opium, Morphine nor Mineral. NOT NARCOTIC.

Children Cry For Fletcher's CASTORIA

Are You Prepared?

A doctor in the house all the time would be a good idea. Yet you can't afford to keep a doctor in the family to keep baby well or prevent sickness. But you can do almost the same thing by having at hand a bottle of Fletcher's Castoria, because it is a wonderful remedy for indigestion, colic, feverishness, fretfulness and all the other disorders that result from common ailments that babies have.

Fletcher's Castoria is perfectly safe to use. It is a harmless substitute for Castor Oil, Paregoric, Drops and Soothing Syrups. Children cry for Fletcher's Castoria, and mothers recommend it because they have found it a comfort to children and a mother's friend.

If you love your baby, you know how sweet it is to be able to help baby when trouble comes. You cannot always call upon a doctor. But doctors have nothing but good to say of Fletcher's Castoria, because they know that it can only do good—that it can't do any harm—and they wouldn't want you to use for baby a remedy that you would use for yourself.

MOTHERS SHOULD READ THE BOOKLET THAT IS AROUND EVERY BOTTLE OF FLETCHER'S CASTORIA.

SQUEEZED TO DEATH

When the body begins to stiffen and movement becomes painful it is usually an indication that the kidneys are out of order. Keep these organs healthy by taking

GOLD MEDAL HARLEM OIL CAPSULES

The world's standard remedy for kidney, liver, bladder and uric acid troubles. Famous since 1895. Take regularly and keep in good health. In three sizes, all druggists. Guaranteed as represented. Look for the name Gold Medal on every box and accept no imitation.

Why Has the Price of Gasoline Advanced?

The answer is furnished by economic principles: The demand is greater than the supply. The companies having the supply at the present time are making enormous profits. Wonderful investment opportunities present themselves in such companies, especially those having the four big features of the oil business—Production, Refining, Transportation and Distribution.

Would you like to get some of these profits? Of course you would. We believe there is no industry in the country in which the margin of risk is so small and the average returns from invested capital so great as in the oil refining business.

Our booklet "CO" goes more into detail regarding this great industry, also how you personally can participate in its enormous profits. Fill in your name and address and mail attached blank, which will bring you this booklet free.
