Bonfires.

The burning of rubbish, trash, dry leaves, and other waste accumulation is pronounced fire hazard.
The State Bureau of Fire Protection points out that at this time of the year the practice is most frequently followed, and is cautioning the people that no bonfires should be started unless someone is in charge while the rubbish is burned, and that all embers and burned fragments are later quenched with water. Care should be taken that fires are not near building or fences, and that high winds are not in evidence. Many cities and boroughs prohibit the outside burning of rubbish.
The Bureau suggest as a precautionary measure that where accumulations of this kind are found the same be hauled to garbage disposal land, thereby eliminating and avoiding the dangers that always exist in the burning of rubbish in the open.

"HOW WELL YOU LOOK!"

When Your Blood is Rich and Red, People Notice Your Good Health.

PEPTO-MANGAN BUILDS HEALTH

Pale Face, Dull Eyes, Drooping Shoulders, Result from Clogged Blood.

If your blood is in bad shape it shows up in your looks and feeling. When your blood is rich with red corpuscles your color is better—your lips are red, eyes wide open and bright; your good feeling shows in your actions.

Common sense will tell you that if weak, thin blood makes you look lifeless, it lowers your vitality. If your vitality is low you have little power to resist disease germs. Men, women and children with rich red blood are able to fight off the germs which bring severe illness.

When you feel run down and weak, with no appetite and no ambition, take Pepto-Mangan for awhile. It is a great blood building tonic. You should begin to feel better within a few days.

Pepto-Mangan is put up in both liquid and tablet form. Take either kind you prefer, because they have the same medicinal value. But be sure you get the genuine Pepto-Mangan—"Gude's". The full name, "Gude's Pepto-Mangan," should be on the package.
