

You must say "Bayer"

Warning! Unless you see the name "Bayer" on tablets, you are not getting genuine Aspirin prescribed by physicians for 21 years and proved safe by millions. Accept only an "unbroken package" of "Bayer Tablets of Aspirin," which contains proper directions for Colds, Headache, Pain, Toothache, Neuralgia, Rheumatism, Neuritis, Lumbago.

Handy tin boxes of 12 tablets cost but a few cents—Larger packages. Aspirin is the trade mark of Bayer Manufacture of Monocaceticacidester of Salicylicacid.

IS FAVORED LAND

Western Canada Country of Great Possibilities.

Soil, Climate, and Weather Conditions All Factors in the Production of Unrivaled Fruit, Vegetables and Flowers as Well as Grain.

As recently as last month—to be correct, it was the 18th of October, a time of year when one naturally looks for the "frost upon the pumpkin," and is inclined to wander through the woods in search of the ripened nuts, and admire the beautiful colorings that the autumn atmosphere has bestowed upon the leaves; when one goes to his closet, or maybe his pawnbroker, to find his heavy clothing—it was that I found myself the guest of a Western Canada housewife in her beautiful home on the outskirts of the pretty little town of Moosemin, Saskatchewan. The dinner! That's what Mrs. Wilde called it. I should have termed it a banquet. There were mullard ducks, cooked to a turn, baked potatoes—and such high-meaty fellows they were, too—cauliflower—and say, did you ever taste one of those Western Canada cauliflower?—then dessert. What was the dessert? I can see it now. Strawberries, strawberries that had been picked that morning. Help yourself to the cream—and it was cream that is cream. But what I wanted to write about was the strawberries picked on the 18th of October. As I ate, and turned my back while a second helping was placed in front of me, I could not but think how this goes to refute the once accepted idea that the climate of Western Canada is such that the ripening of strawberries at any season is one of the things that might be looked upon as next to impossible. Fortunately it is rapidly giving place to one which acknowledges that our sister nation to the north possesses a climate that makes it quite possible to develop and ripen strawberries even in October.

But there is more to add. On October 14, just a few days previous, Mr. A. B. Smith, near the same town, picked a splendid mess of green corn from his garden. Near Rocauville, Saskatchewan, wild raspberries were picked during the same week. The fact of ripening fruit at this date may seem of little moment, but when you are told that corn did not suffer from any vagaries of weather, more attention may be paid to it. The question of Western Canada's climate is no longer the bugaboo it once was, and not so very long ago, either, when it caused thinking people to think, and unquestionably prevented many from going to Canada who under other conditions would have gone.

In various parts of this country, at different state and county fairs, the government of the Dominion of Canada, during the past few weeks, installed exhibits of the grains and grasses grown in Western Canada, and at the same time showed fruits and vegetables that were grown there. None of these was placed in competition with the home-grown article. But to judges and others there came the

full understanding of what it would mean to the local exhibitor if they were. The Western Canadian—and many of the exhibits were grown by former Americans—does not lay claim to any special dispensation of intelligence in the matter of the culture of the articles placed on exhibition, but willingly gives credit to the soil, the climate, and such other indigenous conditions as the country as a whole possesses, as being factors that bring about the largest yields of the best or wheat, oats, barley, flax and rye, as well as vegetables. As is pointed out by the gentlemen in charge of these exhibits, and quite evident to all, the possibilities of growing vegetables and grain such as are shown can only exist where conditions such as have been mentioned exist.

In speaking of eating fresh strawberries and green corn in the middle of October I should not fail to refer to the beautiful bouquets that adorned the table, the sideboard, the window sills, and almost every other available vacant place in the room. Flowers!—there were asters, phlox, gladioli, peonies, poppies, and I can't remember the names of them all, but they were there. Taken right from the garden, having a fragrance that gave the room tropical colors, and filled it with marvellously delightful perfumes. It was a very pretty sight. Then I went out into the garden and took a photo of it. It was simply wonderful. I asked the good lady how she managed it. She said she had always been fond of flowers. In her old home, in one of the central states, she carried on garden horticulture, and had been acknowledged successful. "But my!" she said, "I never got such bloom, and such a variety as I do here." She admitted it was a lot of work, the watering, the weeding, the hoeing, but such work was a pleasure.

Thousands Have Kidney Trouble and Never Suspect It

Applicants for Insurance Often Rejected.

Judging from reports from druggists who are constantly in direct touch with the public, there is one preparation that has been very successful in overcoming these conditions. The mild and healing influence of Dr. Kilmer's Swamp-Root is soon realized. It stands the highest for its remarkable record of success.

An examining physician for one of the prominent Life Insurance Companies, in an interview on the subject, made the astonishing statement that one reason why so many applicants for insurance are rejected is because kidney trouble is so common to the American people, and the large majority of those whose applications are declined do not even suspect that they have the disease. It is on sale at all drug stores in bottles of two sizes, medium and large.

However, if you wish first to test this great preparation send ten cents to Dr. Kilmer & Co., Binghamton, N. Y., for a sample bottle. When writing be sure and mention this paper.—Adv.

No man has the courage to tell a woman what her mirror does.

Kill That Cold With

Neglected Colds are Dangerous. Take no chances. Keep this standard remedy handy for the first onset. Breaks up a cold in 24 hours—Relieves Grippe in 3 days—Excellent for Headache. Quinine in this form does not affect the head—Cascara is best Tonic Laxative—No Opium in Hill's. ALL DRUGGISTS SELL IT

RIGHT CARE OF BREEDING EWES

Animals Should Be in Thrifty Condition to Produce Most Profitable Lambs.

LITTLE GRAIN IS NECESSARY

Mixture of Corn, Oats and Bran is Satisfactory When Flock is Rather Thin in Condition—Exercise is Important.

Flockmasters are urged to see that their breeding ewes are receiving the proper kind of attention at this time in order to produce the most profitable lambs. The ewes should be in good thrifty condition.

It is not necessary to feed a large amount of grain to breeding ewes which are receiving good, clean, mixed clover and timothy hay, clover hay, or alfalfa. Where bright corn fodder is available in conjunction with some leguminous feed very good results can be obtained from feeding what the ewes will clean up nicely in the middle of the day at one feed. When the breeding flock is a little thin in condition a grain mixture of equal parts of corn, oats and bran by weight, fed

Adequate Winter Protection is Afforded by Inexpensive Open Sheds.

at the rate of one-fourth to one-half pound per head daily, will be found most satisfactory and will increase the profits, as the ewes will be better mothers and better milkers when the lambs come.

Provide Dry Quarters. It is not necessary to provide close quarters for the breeding flock, according to United States Department of Agriculture specialists. They should be kept in a clean, dry place, which is dry overhead and underfoot and free from drafts. Plenty of exercise is very important and the breeding ewes should be out every clear day. Where forages are fed and winter pastures are not available it will be found beneficial to spread the forage over the ground some distance from the shed, and as the ewes feed back and forth over it they will thus gain plenty of exercise.

The flock which is in good thrifty condition, properly housed and properly fed, and receives adequate exercise, will lamb out much better and will cause the shepherd far less difficulty.

APPLY STANDARDS PROPERLY

Information Desired in This Connection May Be Secured of Federal Supervisor.

By familiarizing themselves with the grain grades under the federal grain standards act, farmers can be sure when selling their grain that the standards are being properly applied. Any information in this connection may be had by writing or visiting the nearest office of federal grain supervision. In case any person desires to check up his determination of the grade of the grain when no licensed grain inspector is located in the community, he can mail a representative sample to the nearest licensed grain inspector and have it officially inspected. The sample should be at least two quarts in size. While the grade applies to the sample only, the parties to a transaction involving the sale of grain at country points may agree that the grade of the sample will apply to the entire lot to be sold.

OATS SOWN IN FALL SEASON

More Than 60 Per Cent of Acreage is Planted in Six of Extreme Southern States.

Special reports received by the bureau of estimates, United States Department of Agriculture, show that in the fall-out area, embracing the states from Maryland, West Virginia, Kentucky, Arkansas and Oklahoma southward, about 45 per cent of the oats grown are fall sown. The states in which more than 60 per cent of the acreage is sown in the fall are North Carolina, Georgia, Florida, Alabama, Mississippi and Louisiana.

RECORDS AID TO EFFICIENCY

To Achieve Success Farmer Must Be Business Man as Well as Grower of Crops.

Adequate records are necessary to the efficient management of any business. The farmer, to be successful, must be a business man as well as a grower of crops and producer of live stock. As a business man he should have suitable business records.

IMPROPER SHIPPING HARMFUL TO TUBERS

Potatoes Damaged by Freezing While in Transit.

Protection From Cold Depends Largely Upon Constant Circulation of Warm Air Around Load—Cars Should Be Lined.

Of 5,805 cars of potatoes inspected by agents of the bureau of markets, United States Department of Agriculture, during the year ended July 1, 1920, more than 2,000 cars showed damage from freezing in transit amounting in some cases to 40 per cent. This loss would not have occurred with the use of proper loading and heating methods, say the bureau's specialists.

Protection from cold depends largely upon a constant circulation of warm air around the load. Heated air from a stove in the center of car rises to the top, spreads along the ceiling between the potatoes and the roof, thence down through the open spaces at the ends, then back underneath a false floor coming out at the stove.

Cars should be carefully lined with paper. In box cars, false floors, false side and end walls should be constructed of boards and studding so as to provide for air circulation around the load. In refrigerator cars, false floors should be provided and care should be taken that bunker bulkhead openings are not blocked, either in papering or loading.

Cars should be heated at least six hours before loading. In loading, sacks should not come closer than eight inches from the ceiling. The potatoes at the floor should be loaded not less than six inches from the sides and ends of car.

Complete details regarding the prevention of freezing in transit and proper loading methods can be had upon application to the Bureau of Markets, United States Department of Agriculture, Washington, D. C. Ask for Farmers' Bulletin 1091.

PLACE FOR POTATO STORAGE

Cellars and Pits Should Be Carefully Cleaned, Opened to Sun and Disinfected.

Storage places for potatoes or fruit should be carefully cleaned. Barrels or boxes, if second-hand, are sure to be dirty and probably infested with the germs of decay. Cellars and pits should be swept clean, opened to sun and bin disinfected with lime. Also close all openings and burn formalin to destroy lice, rats and other vermin, writes J. E. Sweet of Colorado in Farm and Home. Cleanliness is a first principle in storage.

Potatoes will not rot so freely if stored where live air circulates around them. Dead air, absence of ventilation, promotes dampness and rot. My

Ventilated Storage for Potatoes.

bins, Fig. 1, are built so that sides are a foot out from the cellar wall, and the bottom is raised six inches above the floor.

The cellar windows are screened so mice can't get in, and until cold weather are left open. This gives fresh air until the potatoes have cured or sweated, after which there is less danger from rot. Sprinkling with lime lessens rot.

FEED FOR HOGS IN TRANSIT

Minimum Requirements of Animals Have Been Determined by Department of Agriculture.

The minimum feed requirements of hogs in transit have been determined by the United States Department of Agriculture as follows:

Not less than two bushels of shelled corn or its equivalent in ear corn or other grain per single deck of not more than 17,000 pounds weight and not less than two and one-half bushels of shelled corn or its equivalent in ear corn or other grain, per double deck of not more than 21,000 pounds weight. Carload lots of hogs in excess of these weights should be fed an additional amount in the same proportion.

Where amounts very greatly in excess of those specified are fed it is quite probable that feed will be wasted.

GUARD AGAINST CHINCH BUGS

Pests Exact Toll of Several Million Dollars Each Year Through Destruction of Crops.

Chinch bugs have been especially active in the corn crop of eastern Missouri this year, according to crop reports received by the United States Department of Agriculture. Ravages have been extensive also in some portions of southern Illinois. The department has several bulletins describing the chinch bug and methods of exterminating it. The bug exacts a toll of several million dollars each year through the destruction of corn and wheat crops.

IT GAVE HIM NEW STRENGTH

Built Up My Husband. His Appetite, Nerves, Digestion and Whole System Are Fine Now.

WONDERFUL TONIC

"My husband was in a weak, run-down, nervous condition and at night he could get very little real rest on account of a cough he had which was especially bad at night. His appetite was poor and he lacked energy and strength. Mornings he would cough up great chunks of mucus and phlegm and nothing he took or was told to take did him any good.

"Thank goodness we heard about Earle's Hypo-Cod and the first bottle stopped that horrid cough. Then this tonic began working a wonderful change in his system. You could just see it building him up all over. His appetite came back. His nerves became steady and he started sleeping just fine. He eats anything and everything that I set on the table and relishes his meals. His strength and old time vigor came back and he looks better today than he has looked in a long, long time," declared Mrs. A. L. Goodall, 427 10th St., S. W., Washington, D. C.

There are thousands of men who need a tonic. Men are just naturally slow about taking medicine even though they are half sick. Wives should remember this and when they see their husband, brother or father 'sn't feeling especially good they should set about building them up. Just good food isn't enough sometimes. A tonic helps the digestion get all the good out of food. It spurs up the appetite and helps to enrich the blood.

Drop in at the drug store tonight and take home a bottle of the genuine Earle Hypo-Cod that thousands say is so good. Read formula on bottle.—Adv.

Opposing Inclinations. "That man has horse sense." "Perhaps that is why he is after the grass widow."

BOSCHEE'S SYRUP

Allays Irritation, Soothes and Heals Throat and Lung Inflammation.

The constant irritation of a cough keeps the delicate membrane of the throat and lungs in a congested condition. Boschee's Syrup has been a favorite household remedy for colds, coughs, bronchitis and especially for lung troubles, in thousands of homes all over the world, for the last fifty-four years, giving the patient a good night's rest, free from coughing, with easy expectation in the morning. For sale everywhere.—Adv.

The harder a man labors the less time he has to whine.

A single application of Roman Eye Balsam on going to bed will prove its merit. Use it for inflammations of the Eyes.—Adv.

HE NEEDED NO INTERPRETER

Up-to-Dateness of Chinese Official Rather Surprised This Pittsburgh Banker.

A banker who had visited China several times on important financial missions thinks the "heathen Chinese" is not only intelligent but that he has a delicate sense of humor, as well. He tells this one on himself:

"I called on an important Chinese official for a conference and, supposing, he knew no more of English than I did Chinese, I took an interpreter. When we arrived at the office of the official I told my business to the interpreter, expecting him to translate my statement to the Chinaman and then to repeat the reply to me in English. However, I had hardly finished speaking to the interpreter when the Chinaman, with a humorous twinkle in his eyes, leaned over and said to me, in perfect English: 'Mr. Jones, please tell me who is pitching for Pittsburgh this year.'—Wall Street Journal.

The Cost. "Her mother says that Nell's engagement ring cost \$500, but it is only a little bit of a stone—couldn't possibly have."

"Oh, I guess she means that that was the amount they spent entertaining the chap before Nell could get him roped."

DYE RIGHT

Buy only "Diamond Dyes"

Each package of "Diamond Dyes" contains directions so simple that any woman can diamond-dye worn, shabby skirts, waists, dresses, coats, gloves, stockings, sweaters, draperies everything, whether wool, silk, linen, cotton or mixed goods, new, rich fadeless colors. Have druggist show you "Diamond Dyes Color Card."—Adv.

The Inquisitive Mind. "When this man arrives," said the earnest orator, "we may expect glad times with all our wishes granted." "Who's he talking about, father?" asked the boy who is large for his age; "the candidate, or Santa Claus?"

16799 DIED

In New York City alone from kidney trouble last year. Don't allow yourself to become a victim by neglecting pains and aches. Guard against this trouble by taking

The world's standard remedy for kidney, liver, bladder and uric acid troubles. Holland's national remedy since 1895. All druggists, three sizes. Guaranteed. Look for the name Gold Medal on every box and accept no imitation.

All Run Down Now Feels Fine

Eatonic Ended His Troubles

"Eatonic is the only thing I have found to stop my heartburn and I think it has been a great help in nervous spells," writes G. C. Johnson. An upset stomach may cause lots of suffering all over the body. Eatonic helps in such cases by removing the cause of the misery, because it takes up and carries out the excess acid and gases and keeps the digestive organs in natural working order. A tablet after meals is all you need. Big box costs only a trifle with druggist's guarantee.

Ladies Keep Your Skin Clear, Sweet, Healthy With Cuticura Soap and Cuticura Talcum

ORIGINATED IN DAINTY VERSE

Expression That is Considered Slightly Vulgar Today Traced to Poet Cowper.

Some of the crudest expressions in the English tongue had their origin in poetry, and even religious commands. Among these the phrase, "to go the whole hog," is a striking example. Today it is looked upon as a vulgarism. Yet the words were obtained directly from a poem by Cowper, whose title is the pretty term, "Love of the World Reproved." The poem is the versifying of an Arabian story that seems well founded in fact.

Mohammed in giving forth his laws declared that a certain part of the pig should not be eaten, but he forgot to mention just what part it was that he thought unclean. His followers, to make sure of not violating his commands, debarred the whole pig. As there were many, however, who were deeply fond of pork, they met and agreed that one would eat the steaks, one the chops, one the feet, and so on, until the whole pig had been eaten, and thus but one of the feasters could be made to suffer for a sin. As Cowper says: "They thought it hard from the whole hog to be debarred," and adds: "With sophistry, their saute they sweeten, till quite from tail to snout, 'tis eaten."

Made From Our Native Grains

Grape-Nuts

Rich and Nourishing

A blend of wheat and malted barley that costs but little, yet provides a food of most attractive flavor, ready to serve direct from the package.

Grape-Nuts Needs No Sugar
