

FOR NINETEEN YEARS SHE HAD NO PEP AT ALL

Suffered With Catarrh of Head, Nose and Throat All These Years.

CONSTIPATION ALSO BOTHERED THIS LADY

"I suffered from catarrh of head, nose and throat, stomach trouble and constipation and I had no pep at all. I had been in this condition for nineteen years and had tried everything and nothing did me any good," declared Belle Brown, 410 N. 5th St., Philadelphia, Pa. Continuing her statement, she said:

"I bought Earle's Hypo-Cod because I had heard so many of my friends speak of it, saying what it did for them, and my relief through the use of this tonic was as follows: The stomach distress has gone; am not troubled with catarrh in my head or nose; constipation doesn't worry me, and that endowment, tired feeling has left me. I feel better than I have for years. I feel that life is worth fighting for, and I now recommend Hypo-Cod because it has done more for me than all the other medicines that I have taken for 19 years, and I do believe it will cure me if I continue taking it. All this trouble was chronic. I feel like a new woman and have lots of pep and my condition is great. It is the best remedy that I ever used and I am telling all my friends the same as I am telling you," continued this lady, whose name and address is given above.

If you know of anyone troubled with a chronic cough and that are in a rundown condition, get them to give this new and modern tonic that druggists, chemists and experts assert is the most powerful reconstructive tonic of its kind made, a trial. Scores of people that thought their condition chronic have found real relief, according to their statements. You will be surprised at its pleasant taste and how nicely it will agree with a weakened stomach. (Read formula on a bottle at your druggist.)

Earle's Hypo-Cod is sold by all good druggists.—Adv.

France produces more than 250 varieties of cheese.

Garfield Tea, taken regularly, will correct both liver and kidney disorders.—Adv.

Your setbacks should set your teeth.

SYMPTOMS WOMEN DREAD

Mrs. Wilson's Letter Should Be Read by All Women

Clearfield, Pa.—"After my last child was born last September I was unable to do all of my own work. I had severe pains in my left side every month and had fever and sick dizzy spells and such pains during my periods, which lasted two weeks. I heard of Lydia E. Pinkham's Vegetable Compound doing others so much good and thought I would give it a trial. I have been very glad that I did, for now I feel much stronger and do all of my work. I tell my friends when they ask me what helped me, and they think it must be a grand medicine. And it is. You can use this letter for a testimonial if you wish."—Mrs. HARRY A. WILSON, R. F. D. 5, Clearfield, Pa.

The experience and testimony of such women as Mrs. Wilson prove beyond a doubt that Lydia E. Pinkham's Vegetable Compound will correct such troubles by removing the cause and restoring the system to a healthy normal condition. When such symptoms develop as backaches, bearing-down pains, displacements, nervousness and "the blues" a woman cannot act too promptly in trying Lydia E. Pinkham's Vegetable Compound if she values her future comfort and happiness.

To abort a cold and prevent complications take

The purified and refined calomel tablets that are nausealess, safe and sure. Medicinal virtues retained and improved. Sold only in sealed packages. Price 35c.

U. S. Maintains Air Leadership

Good Performances Offset Decreased Production and Contraction of Industry.

LONG FLIGHTS SUCCESSFUL

Clear Federal Policy to Aid Progress of Commercial Flying is Still Lacking—Year's Feats Are Recorded.

New York.—America has successfully maintained her leadership in the navigation of the air, so far as heavier than air craft are concerned, despite the lack of aerial laws, landing fields and other such handicaps, according to a review of the year 1920, issued by the Manufacturers' Aircraft Association. The review says:

"Decreased production and a general contraction in the aeronautical industry generally is offset by the more encouraging records of performance made in American aviation this year. While the last twelve months have not brought the carefully outlined policy of federal jurisdiction required to assure steady and economical progress in commercial aviation, they have witnessed many remarkable achievements by American pilots in American machines."

Year's Performances. Then follows a long, detailed list of performances, among them the following:

"Commander A. C. Read, hero of the transatlantic flight in the NC-4, commanded the same flying boat on a noteworthy expedition from Rockaway, L. I., down the Atlantic coast, along the gulf coast and up the Mississippi river to Cairo, Ill. When the NC-4 returned to Rockaway January 27 last it had flown 7,740 nautical miles. Three of the four Packard Liberty engines had operated without trouble during the 118 hours in the air, the fourth more than eighty-two hours. Along the Mississippi the motors were run on commercial gasoline picked up from point to point en route. Read reported that the greatest difficulty encountered was lack of proper maps.

"Compared to long-flight attempts conducted by European governments the American ventures were particularly successful. No less than four expeditions attempted to fly the 5,206 miles from Cairo to Capetown, South Africa. Colonel P. Van Ryneveld and Major C. J. O. Brand finally completed their flight on March 20, 1920, in a DH-9 plane sent up by the government of the Union of South Africa after their Vickers-Vimy machine had crashed. They had set but from Cairo February 10. None of the machines that started reached Capetown.

Old Castle of Ostia From the Air

A castle built in the middle ages at Ostia, near Rome, as seen from the air. Of unusual design and architecture, the pile is one of the sights of Ostia, the Brighton of the ancient Romans.

MERRY SEX WAR ON

Bureau of Engraving and Printing in Throes of Controversy.

Plate Printers' Union Charges That There Are Too Many "Trifling Girls" in the Bureau.

Washington.—A merry sex war is in progress in Uncle Sam's money factory.

The war started when the Plate Printers' union in the bureau of engraving and printing made formal charges that there were too many "trifling girls" in the bureau and that they were retarding the efficiency and the amount of production of paper money. In their charges the plate printers intimated that too much time was spent by girls employed in the bureau in administering "little dabs of paint and powder." In fact it was intimated that the plate print-

14-Year Tests of Plant Life

Reveal That Wild Flora Do Not Always Grow in Most Congenial Habitat.

ENVIRONMENT IS CHANGED

Flowers Taken From Mountain Tops Grow Much More Luxuriantly and Produce More Leaves, Flowers and Fruit at Sea Level.

Chicago.—At a lecture given before an assemblage of geographers and biologists representing several societies, Dr. D. T. MacDougal, director of the Botanical research department of the Carnegie Institution at Washington, described the results of a series of experiments extending over fourteen years and embracing 139 species of plants, the experiments tending to show that the wild plant is not always found in the environment most suited to it.

"A great many people think this," said Dr. MacDougal, "but it has been found to be absolutely false."

Grow More Luxuriantly. With stations established at four different altitudes, 8,000 feet, 5,200 feet, 2,300 feet and at sea level, plants have been transferred from one place to another, and the results of the cul-

ture experiments of fourteen years have now been compiled.

In these experiments plants from the mountain tops, some from a height of close to one and one-half miles above sea level, were found to grow much more luxuriantly, producing more leaves, flowers and fruits at sea level than they had in their native habitat. These plants were not cultivated, protected or fostered in any way in their new situations. Once placed, they were to all intents and purposes wild flowers and had to fight their own battles and take chances as before.

"One hundred and thirty-nine plants were used in these experiments, embracing forms of such wide divergence as grasses, wild lilies and oak and walnut trees, as well as cacti and other unusual plants.

"While a plant may thrive well in its new situation," said Dr. MacDougal, "it will sometimes display a behavior quite at variance with that by which it is ordinarily known. Thus the common witchhazel, which is known to bloom in the vicinity of New York when the frosts come, when taken to the equable climate of the Pacific coast reverts to the normal or summer-blooming habit. Other species show flower forms, fruits and leaves notably different from those previously displayed by them.

"Aquatic plants of the cress family were made to grow in soil on the mountain tops, where the roots formed small radishes, like their relatives. The radish is a cress. In other words, these plants came back to the ancestral habit of forming a radish.

Interest to Biologists. "The manner in which plants travel about the world or are distributed is a problem of great interest to biologists, and in this experimental work particular attention was given to obtaining evidence on some of the problems of dissemination or movement of plants across the face of the country."

It was found that rabbits and rodents which inhabit the oak zone at the top of the mountain range acted very effectively as a barrier to moving cacti and other plants from moving up or down the mountain slopes. To verify this a barrage zone was established and the plants protected in screened enclosures which kept off the little nibbling animals. The plants thrived and prospered and spread within the enclosed section. Out in the open, to either side of the barrage zone, they rapidly disappeared being eaten by the rabbits. This explained the mysterious sudden stoppage of some of these plants—not actual destruction through being eaten. The animals were like a fence.

The coastal laboratory at Carmel-by-the-Sea and the desert laboratory at Tucson, Ariz., are two of the experimental stations which were used in this work.

Cracow, Poland.—Four soldiers found guilty of having stolen nine sacks of American flour from army supplies were shot recently.

The executions were carried out under a law passed by the diet last year, making it a capital offense to steal from the army. A fifth soldier, also court-martialed, in connection with the flour theft, was sentenced to prison, as it was shown that he had taken a minor part in the affair.

Hall's Catarrh Medicine

Those who are in a "run down" condition will notice that Catarrh bothers them much more than when they are in good health. This fact proves that while Catarrh is a local disease, it is greatly influenced by constitutional conditions. HALL'S CATARRH MEDICINE is a Tonic and Blood Purifier, and acts through the blood upon the mucous surfaces of the body, thus reducing the inflammation and restoring normal conditions. All druggists. Circulars free. F. J. Cheney & Co., Toledo, Ohio.

Those who possess the highway to the East have the treasures of the world.

To Have a Clear Sweet Skin Touch pimples, redness, roughness or itching, if any, with Cuticura Ointment, then bathe with Cuticura Soap and hot water. Rinse, dry gently and dust on a little Cuticura Talcum to leave a fascinating fragrance on skin. Everywhere 25c each.—Adv.

Weigh some heavy people and they will be found wanting in everything but weight.

A torpid liver condition prevents proper food assimilation. Tone up your liver with Wright's Indian Vegetable Pills. They act gently and surely.—Adv.

Character is a diamond that scratches every other stone.—Bartol.

Tonic Fruit Jellies
Benefit the System

The use of fruit in the diet is beneficial. Fruits introduce into the system salts and acids which improve the quality of the blood. They serve as laxatives and anti-scurbutics. They are refreshing, stimulate appetite and add a pleasing variety to the diet. Gelatine makes good dinner or twice as far, preserving all the atoms, taste and nutriment.

"PURITY"

The Menace. "Oh, yes," she admitted, "I keep a diary." And he never called again.

Spanish toreros are on strike for a higher wage. There is talk, we understand, of a six-hull week.

Unless you see the name "Bayer" on tablets, you are not getting genuine Aspirin prescribed by physicians for 21 years, and proved safe by millions.—Say "Bayer"!

say **BAYER** Aspirin

SAFETY FIRST! Accept only an "unbroken package" of genuine "Bayer Tablets of Aspirin," which contains proper directions for Headache, Earache, Toothache, Neuralgia, Colds, Rheumatism, Neuritis, Lumbago, and pain generally. Strictly American!

Handy tin boxes of 12 tablets cost but a few cents—Larger packages. Aspirin is the trade mark of Bayer Manufacturer of Monoclonalacetate of Salicylic Acid.

MAN OF OPTIMISTIC STRAIN WAS VICE PRESIDENT AT 36

Millionaire Bought "Laundry" Instead of "Launch," but He Refuses to Be Discouraged.

Millionaires are supposed to lean toward a philosophic pessimism, but there is one who is evidently a genuine optimist.

He met a friend, and said: "Come and see my new steam laundry."

"I didn't know you went in for that sort of thing," he said.

"I don't, as a rule," replied the millionaire. "I bought this one quite by mistake. It was the auctioneer's fault. I hadn't time to get a catalogue, and I thought he said steam launch! So I nodded, and they landed me with it."

That millionaire is going to make that laundry pay!

The Life of a Song. "This music dealer advertises that 'Two Loving Hearts in a Little Bungalow' is a song that will live forever."

"What does he mean by that?" "About six months."—Birmingham Age-Herald.

The Writer and the Reader. Care should be taken, not that the reader may understand if he will, but that he must understand, whether he will or not.—Quintilian.

John Cabell Breckenridge of Kentucky the Youngest Man Ever to Hold the High Office.

Franklin D. Roosevelt, Democratic candidate for vice president, was asked whether, if elected at thirty-eight, he would be the youngest vice president of the United States. He did not know, but hoped some of his friends would look the matter up.

John Cabell Breckenridge was elected vice president on the Democratic ticket with James Buchanan in 1856. He assumed office March 4, 1857, when he was thirty-six years one month and fourteen days old. When Breckenridge completed his term he was candidate for President as representative of the slave-holding interests, but was defeated by Lincoln. The same year he was elected to the United States senate, but soon afterward joined the Confederate army. From January to April, 1863, he was secretary of war in the cabinet of Jeff Davis. He died in Lexington, Ky., May 17, 1875.

A Surprise. A boy, after growing up, is always greatly surprised to find that the members of a brass band don't play for the fun of it.

Cypress and walnut, when used in contact, cause each other to rot.
