

Quaker Minister Is Grateful to Tanlac

Rev. Parker Moon

Nearly everybody in Southwest Missouri either knows or has heard of the Rev. Parker Moon, who for a full half century has devoted his life and talents to Sunday school and organization work for the Society of Friends or Quakers.

"Uncle Parker," as he is more familiarly known, came from fine old rugged Quaker stock, and there is not a better known or more highly respected citizen in that part of the state. In referring to his remarkable restoration to health by Tanlac, he said: "About five years ago I suffered a general breakdown. My principal trouble was nervous indigestion. My appetite was very poor and my food seldom agreed with me, and I had to live on a very restricted diet. I suffered a great deal from headaches and dizzy spells; I had severe pains across the small of my back and was badly constipated most of the time. In fact, I was so weak and rundown I was not able to attend to my duties. "This condition made me very nervous and I could not sleep at night. Frequently I would lie awake most all night and was in that condition more or less for five years. My physician said he could not do anything for me and suggested a change of climate. I then moved to Texas and went back and forth three times, but did not get the relief I had hoped for. Finally, I got so bad off I was not able to get around with any degree of comfort. I was also told I had heart trouble.

"I had read about Tanlac and, as it had been very highly recommended to me, I decided to try it. I got a bottle and had taken only a few doses until I could notice a marked improvement in my condition. I noticed especially that I was not troubled any more with sour stomach after eating, which was a great relief.

"I kept on taking Tanlac until I fully regained my health. My appetite is splendid; I enjoy my meals and I do not find it necessary now to take any laxative medicines of any kind. I can sleep much better and am not nearly so nervous.

"I take great pleasure in recommending Tanlac to anyone who needs a good system builder, or who suffers with stomach trouble. I have recommended Tanlac to a great many of my friends and am pleased to reach others by giving this statement for publication."

Tanlac is sold by leading druggists everywhere.

All that breed in the mud are not eels.

As we grow more sensible, we refuse drug cathartics and take instead Nature's herb cure, Garfield Tea.—Adv.

Most people endure winter and some pretend they like it.

Did you ever notice what a lot of friends you haven't got when you happen to need them?

Why buy many bottles of other Vermifuges, when one bottle of Dr. Peery's "Dead Bht." will act surely and promptly?—Adv.

Canals of a total of more than 3,000 miles are in use in England.

Stock Raising in WESTERN CANADA

is as profitable as grain growing. Successes as wonderful as those from growing wheat, oats, barley, and flax have been made in raising Horses, Cattle, Sheep, and Hogs. Bright, sunny climate, nutritious grasses, good water, enormous fodder crops—these spell success to the farmer and stock raiser. And remember, you can buy on easy terms

Farm Land at \$15 to \$30 An Acre

—land equal to that which through many years has yielded from 20 to 45 bushels of wheat to the acre—growing land convenient to good grain farms at proportionately low prices. These lands have every rural convenience: good schools, churches, roads, telephones, etc., close to live towns and good markets.

If you want to get back to the farm, or to farm on a larger scale than is possible under your present conditions, investigate what Western Canada has to offer you.

For illustrated literature with maps and particulars regarding railroad rates, location of land, etc., apply to Department of Immigration, Ottawa, Canada, or

FIREWOOD MAKES GOOD CASH CROP

Farmer Can Make His Farm Pay Substantial Profits by Producing Fuel.

USEFULNESS OF MACHINERY

Modern Apparatus Not Only Cuts Wood and Standing Trees, but is Used for Various Other Purposes About the Farm.

(Prepared by the United States Department of Agriculture.)

The farmer's problems appear, all of a sudden, to have become the leading national problem. Congress is talking of little else than legislation aimed to help the agricultural interests. The bankers are busy explaining why they can't lend the farmer the cash he needs. The plight of the farmer is the chief topic of discussion in railroad circles and among business men at all the big markets. Farmers themselves are organizing everywhere to force the prices of their products up to a point where selling will not mean a loss to them.

Meanwhile what the individual farmer needs is not talk, but cash. Certain things he must buy right along for himself and his family. He can't wait for the national debate to run down.

In this situation farmers who are hard pressed for cash may be overlooking the fact that all around them "money is growing on the trees," and the crop is just waiting to be picked. This is almost literally true. In other words the farmer can harvest another crop—his timber. All over the country thousands of farmers are turning to this immediate source of

Modern Machinery Reduces Hand Labor in Filling the Woodshed.

cash. In money value, firewood ranks as America's sixth crop. Government statistics show rank of crops in this order: Wheat, corn, cotton, hay, oats, firewood.

Money in Producing Fuel.
With one of the practical, low-priced power log saws now on the market, the farmer can make his farm pay substantial profits by producing fuel—a commodity that has held up well in price and for which there is an almost unlimited demand. Then, too, there is always a steady market for ties, fence posts and timbers that can easily and quickly be cut with these lightweight, portable machines. In this way the farmer, with little work or expenses, can realize good profits and still hang on to his grain and live stock if he wants to, until prices get better.

On nearly every farm in most sections of the country there is timber in more than sufficient quantities for home use. There are live trees that need to be taken out to give room for younger ones to grow, or to clear the land for cultivation; there are dead trees that are allowed to decay; and on thousands of farms, the banks of rivers and creeks are lined with great logs and other drift wood.

For many years the farmer has been interested in, and has readily accepted, machinery that would save him time, labor and money. Now he is seizing upon a machine that actually makes money for him—as well as saving him time and labor. Those who have used the 1921 improved model log saws say these machines come near to being perfect sawing outfits. They do the work of ten to fifteen able-bodied men—cut down trees and saw up logs and branches of any size—at an average cost of about 1 1/2 cents a cord. Cutting 35 cords of wood is an easy day's work, and it is possible to cut as much as 50 cords in that time.

Machine Cuts Standing Trees.
One of the most popular log saws makes over 300 strokes a minute, and its engine pulls over four horsepower. This particular machine cuts down standing trees, too. By attaching this clever device, trees can be cut down with the level of the ground, so there will be no stump, or higher up, as desired. By attaching a circular saw the outfit is quickly turned into a buzz saw, which rapidly slips up limbs and branches, those parts of the tree which usually go to waste, yet which produce fully one-third of the wood.

HOG-PROOF GATE IS HANDY ARRANGEMENT

Cattle and Horses Permitted to Pass at Will.

Two Low Fences, About 18 Inches High, Serve to Keep Swine in Their Own Pasture—Other Animals Can Step Over.

A farmer uses this arrangement to keep the hogs in one lot, while allowing his cattle and horses to pass unrestrained into another pasture. The gate was removed from the hinges, and the space from post to post was boarded up solidly to a height of 18 inches from the ground. About 18

Two Low Fences Across the Gateway Will Stop the Hogs, but Allow Horses and Cattle to Pass.

inches from each gatepost, inside the lot where the hogs were confined, a short post was driven. Long boards nailed from one to the other of these posts made another panel of board fence, 18 inches high and parallel with the boarded-up gate, with an 18-inch space between the two low walls. When a hog comes to this detached panel, it will go to the end and pass round into the narrow passage between the two board walls, continuing on through and out at the other end till it tires of the performance. One that is short enough to turn in the 18-inch passage is too small to jump or climb over the boards before it, and one that cannot turn is unable to face the wall and make the attempt to climb.

All other stock, except small calves or colts, will step over the low walls. No wide cracks, offering footholds, should be left between the boards.—H. F. Grinstead, Columbia, Mo., in Popular Mechanics Magazine.

FARM SELECTION PERPLEXING

Study of Several Intricate Topics Called For—Knowledge of Basic Principles Needed.

(Prepared by the United States Department of Agriculture.)

In choosing a farm one has the options of buying with the intention of operating the place as his entire business, buying a small farm and renting enough additional land to meet his needs, or renting a farm either on the share or cash basis. One's choice in the matter is usually determined by the funds available.

If one has only a small amount of capital and wishes to undertake farming as a business from which to derive his entire income, he should, in nearly all cases, begin as a renter. However, if he wishes to buy a farm on which to live, deriving a part of his income from other sources, then, possibly, purchasing is desirable, even if capital is limited.

Whatever course is followed, it is highly desirable that one thoroughly understand the basic principles governing the farm business before deciding some of the finer points. A disregard of these basic principles is responsible for a large proportion of farm failures.

A man may unconsciously work all his life against some economic barrier when success would have been comparatively easy if he had selected a farm where the economic principle would aid him instead of working against him.

AGRICULTURE A NATIONAL PROBLEM

A sober national thought with regard to the importance, the absolute necessity, of a sustained agriculture in this country is imperative. There is, perhaps, no single solution for the situation which the farmers are now facing, but there are many steps which can be and should be taken to place our agriculture on a more satisfactory basis and to stabilize the business of farming, not in the interest of the farmers alone but in the interest of the nation as a whole. The matter is of such tremendous importance to our entire population that it should be recognized everywhere as a national problem and dealt with as such.—Annual Report of the Secretary of Agriculture.

DRY PLACE FOR SEED BEANS

Moists Will Quickly Attack Crop if Moisture Gets to Them, Killing Germinating Qualities.

Beans for seed should be kept in a dry place or molds will readily attack them. Beans will heat if the least bit of moisture gets to them and destroys their germinating qualities. Shoveling them over will help keep them dry.

If You Need a Medicine You Should Have the Best

Have you ever stopped to reason why it is that so many products that are extensively advertised, all at once drop out of sight and are soon forgotten? The reason is plain—the article did not fulfill the promises of the manufacturer. This applies more particularly to a medicine. A medicinal preparation that has real curative value almost sells itself, as like an endless chain system the remedy is recommended by those who have been benefited, to those who are in need of it. A prominent druggist says "Take for example Dr. Kilmer's Swamp-Root, a preparation I have sold for many years and never hesitate to recommend, for in almost every case it shows excellent results, as many of my customers testify. No other kidney remedy has so large a sale."

According to sworn statements and verified testimony of thousands who have used the preparation, the success of Dr. Kilmer's Swamp-Root is due to the fact, so many people claim, that it fulfills almost every wish in overcoming kidney, liver and bladder ailments; corrects urinary troubles and neutralizes the uric acid which causes rheumatism.

You may receive a sample bottle of Swamp-Root by Parcel Post. Address Dr. Kilmer & Co., Binghamton, N. Y., and enclose ten cents; also mention this paper. Large and medium size bottles for sale at all drug stores.—Adv.

Every day 350 persons arrive in New York to make the city their permanent home.

Take care of your health, and wealth will take care of you. Garfield Tea promotes health.—Adv.

The Night Before Christmas.

"Twas the night before Christmas, and all through the house not a creature was stirring—except Lilly, the cook, preparing to take the 10 a. m. as a holiday surprise. And Uncle Horace, in the guest room, who has just discovered that sprig of holly that the boys put between the sheets. And the boys, who, having surreptitiously opened their presents and found them all "useful," are contemplating sabotage. And sister Maybelle, who has saved her doll gifts of the year before and is trying to redistribute them. And mother, who is going to get that red ball on top of the tree or die in the attempt. And father, sitting up with a sick check book and a sheaf of newly arrived bills. And Florence, the cat, somewhat the worse for having sampled the Christmas punch to which father consecrated his last bottle of Scotch.—From Life.

A New Gas.

A new gas has been developed from the manufacture of alcohol which can be compressed to 3,500 pounds to the square inch and stored safely in steel tanks.

She Had an Object.

Benham—"Why do you wear your hair over your ears?" Mrs. Benham—"So that I won't hear your clothes."

History will repeat itself except when you are trying to remember dates.

States' Debts Increase.

In 31 of the 48 states the revenues exceeded the expenditures for governmental costs, including interest on indebtedness and outlays for permanent improvements, by \$50,192,314, or 71.8 cents per capita. In the remaining 17 the revenues fell below the expenditures by \$15,378,246, or 43.8 cents per capita, and in five of these 17 states sufficient revenues were not collected to meet current expenses and interest. Taking the 48 states as a whole, the excess of revenue over expenditures was \$34,814,068, or 33.1 cents per capita. These are among the interesting facts brought out in a report entitled "Financial Statistics of States, 1919," issued by Director Sam L. Rogers of the bureau of the census, Department of Commerce.

Grocers Used To Wonder why some of their tea and coffee trade switched to

INSTANT POSTUM

Many of them understand now They use Postum in their own families and find a big gain in health, and some economy, with no loss in satisfaction
