

THIRTY-FIVE YEARS AGO

Paragraphs of News Taken from the Files of the Reporter of 1886.

August 25, 1886. We are inclined to believe that the next move toward church improvement will be by the Reformed people of our town.

Picnics to Long's cave, a short distance east of Centre Hall, are all the go now.

Spring Mills is now a postal money order office.

Harry Connor, of Philadelphia, is visiting at the home of D. C. Keller.

The boro school directors have cut down the session of public schools from eight months, as previously announced, to seven.

Byron Garis had his thumb smashed by a large stone falling on it, while at work on Mingle's cistern, on Monday.

The buildings for the new distillery about a half mile below Coburn, along Penns Creek, are nearly completed and the institution will be put in operation this fall.

Large quantities of iron ore are being shipped from the railroad station at Lemont.

Sept. 8.—The apple crop throughout the county will be small this year.

John Dauberman has put up a large stable on his lot in this town, and will follow it up with a new house, and then come and live here.

J. Will Dinges, of this place, was a candidate for admission as a naval cadet at Annapolis, and passed the mental examination.

Planning for a "Better State College."

That State College has a live wire organization in her Chamber of Commerce may be gathered from a program outlined by that body at a recent meeting, which is planned to be carried through.

Here are a few things planned for a "Better State College," and the progress made toward some already begun: An ash dump.

Street name signs for the entire town. Aid for the State College Library Association.

Protection against pollution of the town water supply.

Progress on garbage disposal for the town, and suggested aid for a borough ordinance regulating the disposal of refuse.

Adoption of plans for the ten new dwelling houses to be erected on Gill street through the activity of members, and authorization for bids for same.

This looks like a big program for the college town, but it is easily within the bounds of possibility, and the town has the right sort of citizens to put it through.

HEALTH SCHOOL

Pennsylvania State Department of Health.

Answers to Health Questions.

Question 1.—What is the Regulation of the Advisory Board in regard to kitchen or laundry water?

Answer.—No kitchen or laundry water should be allowed to flow into any gutter, roadway or public place.

Question 2.—Before what officer is a case of infringement brought?

Answer.—A Justice of the Peace.

Question 3.—What does the State do when Boards of Health are inefficient?

Answer.—Discharge the local Board of Health and take over the local health administration, charging all expense to the Borough in question.

MILLHEIM.

(From The Journal) Rev. Augustus C. Forscht, of McClure, who was to preach trial sermons on the Aaronsburg Lutheran charge this week, is suffering with pneumonia, and of course was unable to fulfil the several appointments.

A dead male deer was recently found on the mountain, north of the home of H. C. Frankenberger, Game Protector Harry Wingard, of Ingleby, was notified and he and Ira Gramley, special game protector, of Millheim, one day last week went to investigate. They found the young buck, which from all appearances had been killed by dogs.

For several years the building of new houses in Millheim was curtailed owing to the fact that desirable building lots could not be bought. To remedy the situation Jos. W. Reifsnnyder has finally consented to lay out the field lying between his residence and the home of W. S. Maize, and sell the lots at nominal prices.

One night last week Dr. M. P. Fiedler, the local veterinarian, was called to make a professional visit to a farm near Penns creek. After treating the animal the farmer paid the bill and Dr. Fiedler mounted his car and started for home, but before he got out of the farmer's lane the car swamped and the veterinarian had to call the farmer and get him to hitch a team to the car and pull it out on solid ground, and for the service the farmer also made his charge.

Only a few persons in this community who were accustomed to storing natural ice during the winter for use during the summer, had the opportunity this winter to store ice, but now comes the good news that the Coburn Products company has received a new 20 ton refrigerating machine, which will be installed as soon as possible. The company expects by the time real summer weather sets in they will be abundantly able to supply all demands for artificial ice.

Farm Calendar.

Timely Reminders from The Pennsylvania State College

FARM ACCOUNTS.—Did you experience any difficulty in preparing figures for your income tax return? The farmer who maintained his farm account books had no trouble at all. April first is a good time to start farm accounts. Obtain a book from the county agent.

CLEAN SEED.—Seed for all small grains, grasses and clover should be cleaned with a good fanning mill before planting. It makes for freedom of weeds, a better stand and a larger yield for the crop grown. Clean your seed now before the rush of seeding time arrives.

DAIRY PASTURE.—If you are likely to be short of pasture for dairy cows next July or August, plan now to sow oats and Canada field peas at the rate of one and one-half bushels per acre, during the latter part of April for July feeding. For August feeding soybeans should be sown during the latter part of May at the rate of one bushel per acre.

POULTRY.—In operating the incubators, one can do no better than follow the manufacturer's directions. To open the machine before the hatching is complete may result in a severe loss. To increase the temperature in the incubator to 105 degrees during the last two days may increase the per cent hatch.

OAT SMUT.—Diseases of oats carried over on surface borne fungi, such as smut, can be largely controlled by the "dry method" of formaldehyde spraying. Spread the oat seed on a dry, clean barn floor, and give each shovelful a good spraying as it is turned over. Use commercial formaldehyde in a fifty-fifty solution with water.

W. A. HENNEY GARAGE

I have opened my shop and am now ready to do work in the following lines:

- Auto Repairing & Painting

WHEN NATURE COLORS THE CHEEKS

She Applies It From Within, Not From Outside.

PEPTO-MANGAN, NATURE'S BEAUTIFIER

It is the Coloring Matter of Pure Blood That Makes a Good Complexion.

Beauty is more than skin deep. No one can have a clear, delicate skin, glowing with health, if the blood is impure or lacking in the vitally necessary iron that gives the coloring matter to the "life fluid." Neglect of regular and necessary waste elimination helps to render the blood impure and reduce its iron contents. The best cosmetic in the world is pure, healthy, iron-rich blood.

Doctors, realizing the importance of enriching and improving the blood, have for years prescribed Gude's Pepto-Mangan, the pleasant and proved blood builder and tonic.

Pepto-Mangan contains just the elements needed to change thin, watery blood to good, red blood. Pepto-Mangan builds rich, red blood, enabling it to carry strength and vigor to every part of the body.

Gude's Pepto-Mangan has become so well known, by reason of doctors recommending it, that you can get it in tablet or liquid form at any drug store. Instead of trying to cover up a poor complexion, get a bottle of Gude's Pepto-Mangan and note how soon you feel better, sleep better, work harder, play with more zest—and how your skin and complexion are improving.

Only make sure to get the genuine. It has "Gude's" on the package.—Advt.

Children's Ailments

DISORDERS of the stomach and constipation are the most common diseases of children. To correct them you will find nothing better than Chamberlain's Tablets. One tablet at bed time will do the work and will make your child bright and cheerful the following morning. Do not punish your children by giving them castor oil. Chamberlain's Tablets are better and more pleasant to take.

Chamberlain's Tablets
