COUPONS

USE RIPE SEEDS TO START TREES

Few Varieties of Seed Such as Elm, Maple, Willow and Poplar Ripen in Spring.

LOAMY SOIL IS PREFERRED

Proximity to Farm Dwelling Is Desirable Because Rodents Are Not Abundant—Transplant Seedlings When Ten Inches High.

(Prepared by the United States Department of Agriculture.)

Perhaps the cheapest and frequently the best way to start a forest plantation is to collect seed from hardwood trees and grow seedlings, say forest specialists of the United States Department of Agriculture in Farmers' Bulletin 1123, Growing and Planting Hardwood Seedlings on the Farm, just published by the department. The collected seed, says the bulletin, will be fresh and the seedlings grown from it should be thoroughly acclimated so far as climate is concerned.

Should Be Collected in Autumn.

Seed should not be collected before they are ripe, and this means for most kinds of seed that the work should be done during autumn, usually after frost. Collecting may be extended into the winter for such species as ash, catalpa, honey locust, sycamore and others which retain the seed on the trees until that time. A few varieties of seed, such as elm, silver maple, red maple, willow and poplar ripen during the spring and summer and should be gathered promptly before they are scattered.

Middle-aged trees growing in the open, where they have been permitted to develop broad, spreading crowns, ordinarily produce seed in greater abundance than trees growing in a dense forest. The fruit of some hardwood trees requires special treatment to separate the seed from the fleshy covering, pod or hull before they are planted.

The best time to sow seed, either in the nursery or in the permanent planting site, is soon after it is ripe, but when this is not possible the seed must be stored until spring. If this is done, the seed must not be allowed to dry out excessively, because this impairs its power to germinate. Seed should be stored in a cold place.

Loamy Soil Preferred.

When the seed are to be planted a good, well-drained, preferably loamy soil should be selected. Proximity to the farm dwelling is desirable, because rodents are less likely to be abundant there. Preparation of the seed bed should be similar to that of getting the soil ready for a vegetable crop. Except on commercial plantings, where the seed are sometimes sown broadcast, it is best to plant with a drill in rows sufficiently far

WELL-KEPT DIARY IS VALUABLE TO FARMER

Profit Gained From Record of Daily Happenings.

Many Farm Problems Encountered Every Year That Might Be Solved More Easily If History of Property Was Handy.

(Prepared by the United States Department of Agriculture.)

A well-kept diary is the most interesting and valuable volume in its owner's library. For the farmer, the diary will preserve a record of farm happenings and personal experiences which will be valuable in the future conduct of his business. If, when he finds his alfalfa field swarming with grasshoppers, he can look back in his diary to a summer ten years before and find the poison-bait formula that controlled the insect then, he will save much valuable time. He may wish to know the exact location of a tile drain that was laid down when he was a youngster. If the event was noted in his own, or his father's, diary, a ten-minute perusal will give him more definite information than a day's digging with a spade. There are dozens of farm problems encountered every year that might be solved more

Preserve Farm Records—They May Prove Valuable.

easily if the farmer had access to a complete chronological history of his property.

The diary may be given a prominent place in the bookkeeping records of the farm business. Generally speaking, there are three purposes to be served by farm accounts:

- (1) To determine the farm investment, receipts, expenses, and the net income of the business.
- (2) To furnish the net returns from any individual farm enterprise and to supply specific information as to its details.
- (3) To obtain a memorandum of what other people owe you and what you owe them.

The blank forms necessary for a simple accounting system can be worked out by the farmer himself, or he can apply a system recommended by his county agent. He also can obtain information direct from the office of farm management and farm economics, United States Department of Agriculture. The chief advantage of a farm accounting system, which is a part of the farm diary, is in the additional interest furnished by the personal items. The diary supplies items of supplementary interest which usually are left out of the accounts. Without the diary the task of keeping the books of the farm business becomes dry and uninteresting. Only persistency and practice will make one an adept at writing a diary.

HONEST FIGURES OF BENEFIT

Farmer Gains Nothing by Using Estimates Too High or Low—Best to Stick to Facts.

Good judgment, coupled with experience, should enable a farmer to come fairly close to the right figures in making a farm appraisal, say farm management specialists of the United States Department of Agriculture. A middle course is the safest, since the results of an appraisal either far too high or far too low will be of little or no value. False appraisal, to make the figures show up well, is labor thrown away, since the one who indulges in this practice is only fooling himself. Stick to facts. Use market values, adding expense of getting to the farm all those things the farmer buys, and subtracting the probable expense of marketing from the market value of all those things he has to sell.

DECREASE IN CROP ACREAGE

Total in 1920 Fell to 346,462,000 Acres, or Less Than 2 Per Cent Below Previous Year.

Crop acreage for all crops for which the bureau of crop estimates, United States Department of Agriculture, estimates acreage, had the total of 300,622,000 acres in the census production year 1909, and 352,332,000 acres in 1918, the second year of this country's participation in the World War. This acreage remained almost exactly the same in 1919, but in 1920 the total fell to 346,462,000 acres, or less than 2 per cent. The acreage of these estimated crops in 1920 was only 11,000,000 acres below the total acreage of all crops in 1909.

ASPIRIN

Name "Bayer" on Genuine

Warning! Unless you see the name "Bayer" on package or on tablets you are not getting genuine Aspirin prescribed by physicians for twenty-one years and proved safe by millions. Take Aspirin only as told in the Bayer package for Colds, Headache, Neuralgia, Rheumatism, Earache, Toothache, Lumbago and for Pain. Handy tin boxes of twelve Bayer Tablets of Aspirin cost few cents. Druggists also sell larger packages. Aspirin is the trade mark of Bayer Manufacture of Monacetylacetic Acid of Salicylic Acid.

Kinds of Berries.

One kindergarten teacher was instructing the class in nature study, and was asking the children to name as many kinds of berries as they could. Raspberry, strawberry, gooseberry and huckleberry were mentioned, but the list was not complete without the last "berry."

Johnny stood up in his anxiety to be the first to name it.

"Library, library is another one," he announced.

Cuticura Comforts Baby's Skin

When red, rough and itching with hot baths of Cuticura Soap and touches of Cuticura Ointment. Also make use now and then of that exquisitely scented dusting powder, Cuticura Talcum, one of the indispensable Cuticura Toilet Trio.—Adv.

More Disarmament

pay the taxes without grumbling.

Makes Hard Work Harder

A bad back makes a day's work twice as hard. Backache usually comes from weak kidneys, and if headaches, dizziness or urinary disorders are added, don't wait—get help before the kidney disease takes a grip—before droopy, gravel or Bright's disease sets in. Doan's Kidney Pills have brought new life and new strength to thousands of working men and women. Used and recommended the world over. Ask your neighbor!

A Virginia Case

J. A. Eley, 166 W. Washington St., Suffolk, Va., says: "I was in very bad shape with my kidneys. I couldn't lie on my side, the pains were so severe. My back felt as though it had a pair of knives were being thrust into me. The kidney secretions were highly colored. I tried everything, but nothing did me the good Doan's Kidney Pills did."

Mephisto Paints Your Old Car New. Brilliant. Black varnish, enamel, leather, motor, wood, metal. Dries 10 min. Price, \$1.00. 112, prep. E. Boyd, 248 W. 83rd St., N. Y.

FOUNDED—Four ply hand knitting worsted, all shades, direct from mill. 134c ounces. Think of the saving. For samples write OLD COLONY MILLS, Manayunk, Philadelphia.

Jobs to Pay Two to Three Hundred monthly for men in overall. Don't exist. Live. E. WOLFE, Berne St., Schuylkill Haven, Pa.

HER REALLY BRIGHT THOUGHT

Mary Ellen Had Shrewd Scheme for Making Sick Children Satisfied With Their Lot.

Little Mary Ellen McKee is, as she terms it, "just half past four," and lives around the corner from the Union hospital in Terre Haute, says the Indianapolis News. Recently she received a tricycle, which she rides morning, noon and night. At first her rides were confined to her own street, but the other day she wished to ride around the corner.

"But the little sick children at the hospital will see you, and then they'll be unhappy because they can't ride, too," her mother told her.

Mary Ellen was silent a minute. Then she said earnestly: "Well, then, mother, I won't ride past the hospital. When I get in front of it I'll get off and push it like it was hard work, and then they won't be unhappy. They'll be glad they can lie in bed and not have to push things like tricycles."

Willing to Serve. "Want to go on an investigating committee?"

"If it is headed in the right direction. I don't mind investigating ice conditions in Havana harbor."—Louisville Courier-Journal.

Ideals are better than idols.

MADE QUEER HIDING PLACE

Sleeping Appearances Proved Effective in Concealing Elongated Individual in Lady's Bedroom.

Lord Rossmore, who has just died in England, was a great sportsman and hunter and had many good stories not only of the hunting field but of life in many other phases. One of these concerned his friend, Bay Middleton, whom he describes as one of the best riders to hounds that ever lived, and runs as follows:

"Bay once bet a lady that he could hide so effectually in her bedroom that she could never discover him. She hunted high and low, but never a trace of the hidden one could she see.

"The lady was completely at her wits' end, and at last, when she had literally gone all over the room inch by inch, she was startled out of her seven senses by hearing Bay's voice exclaiming, 'Hullo! I can see you.' This was a puzzler and no mistake, but the mystery was at last solved, for Middleton, who was long and thin, had got inside the bolster!"

Inseparable. "Waggle and his young wife are inseparable, aren't they?"

"Yes; he calls her his altar ego."

Prosperity smiles on the few and gives the many the horse laugh.

Well-Managed Timber Stand Is Source of Fuel and Shelters Farmstead From Severe Winter Winds.

apart to permit horse cultivation. With small or thin seed, such as that of birch, elm or sycamore, best results will be obtained by sowing broadcast rather thickly over the beds, pressing the seed into the loose soil with a board and covering it very lightly with soil and a light mulch of leaves or straw. When the seedlings are ten or more inches in height they are large enough to be transplanted to the field. Most of them reach this size in one growing season. In digging their care should be taken to injure the roots as little as possible. Injured portions of the roots should be cut off with a sharp knife. The seedlings should not be dug until the time for planting them in their permanent location, for exposure of the roots to the air for any length of time will kill them.

GROW SOY BEANS WITH CORN

Combination Will Produce Larger Amount of Dry Matter Per Acre Than Corn Alone.

There is a decided advantage in growing soy beans with corn for silage purposes. The combination will produce a larger amount of dry matter per acre than corn alone, and the beans, being rich in protein, help materially in improving the feeding value of the silage. Less high-priced oil meal or cottonseed meal will be needed to balance the ration when the silage contains a goodly proportion of soy beans.

It's Really Amazing

the amount of nourishment you'll find in a small dish of Grape-Nuts

with cream or good milk added

Sweet with its own sugar, developed from the grains in the making, this sturdy blend of wheat and malted barley contains, in compact form and at low cost, the nutritive and mineral elements needed to build health and strength.
