

\$5,000 Awards in Picture Play Title Test.

The New York American is conducting a \$5,000 Picture Play Title Test in which a main award of \$1,000 is offered to the person who can identify the largest percentage of drawings representing photoplay titles.

There is a second award of \$750, and a third award of \$500. The other 216 awards range from \$400 down to \$5. The test begins Sunday, April 17, and lasts sixty days.

Every resident of any city or town in the following states is eligible to participate:

New York, New Jersey, Connecticut, Pennsylvania, Delaware, Maryland, Virginia, West Virginia and District of Columbia.

Each day during the test there will be printed in the New York American a picture representing the title of a photoplay produced in the United States. With the picture will be printed a list of photoplay titles. The correct title is always to be found in the printed list.

Local motion picture theatres are given an opportunity to tie up with this unique test. The New York American will furnish free upon request a daily slide showing the picture printed that day in the American. The newspaper will also supply gratis a colored poster telling of the feature.

Theatre managers wishing to cooperate are asked to write to the Picture Play Title Editor, New York American, No. 238 William street, New York.

SPRING SEASON IS THE BLOOD TONIC SEASON

Be Sure About Your Blood Condition. If You Are Pale and Run-Down You Need Gude's Pepto-Mangan, the Best Blood Tonic.

MAKES BLOOD RICH AND RED

Foremost as a Blood Builder for 30 Years. Begin Taking It Today and Notice the Improvement

Find out just where you stand this Spring. Is your health good or bad? There is no half way. You may think you are well enough if you are able to get around every day. But are you enjoying robust health? Are you as full of vigor as you should be?

Spring is the time to ask yourself these questions. You are not able to overhaul the human system the way you can an engine. But you can tell whether you are not in good trim.

For example, if you are like so many people now, feeling drowsy and listless and tired—if you find no pleasure in living, little interest in your work, and if you are pale and wan, you'll find your blood is not good. You need a blood tonic.

Gude's Pepto-Mangan is the best you can take. It gives new life to the red corpuscles in your blood by increasing the supply of oxygen to all the cells in your body. The poison or waste matter is thrown off and your blood is purified and strengthened.

The result is that you put your health on a sound basis and you have no doubts about how you feel. You know you are well. It is unmistakable, because you eat heartily, sleep well, and feel full of vigor.

Get Gude's Pepto-Mangan from your druggist. He sells it in tablet or liquid form, so that you can take whichever is most convenient. They have the same medicinal value. Be sure you get the genuine Gude's Pepto-Mangan, with the name "Gude's Pepto-Mangan" on the package. Advertisement.

For repair work or building new, nothing makes a better job than Lehigh cement. We can take care of large or small orders; a car just unloaded.—Bradford & Co., at the Station.

MILLIONS LOST THROUGH FLOODS

STEPS TO BE TAKEN TO TURN LOSSES INTO BENEFITS.

GOVERNOR SPROUL TO ACT

Chief Executives Of New York And New Jersey To Join Him In Plans To Develop Streams In Public's Interest.

Millions lost annually through floods in Pennsylvania has caused Governor Sproul to take steps looking to the stopping of such losses, as well as the development of water-power, which in even greater value has been permitted for centuries to waste into the sea.

GOVERNOR SPROUL

Because of the unusual topography of the State, Pennsylvania is among the greatest sufferers from flood losses, the many rivers having their head waters in the mountains, over 2,000 feet above sea level, and rushing down to within one, two or three hundred feet of sea level, inside the boundary lines of this State alone. For the same reason, the water power potentialities are great.

One hundred and sixty of the principal towns in the State, situated on these rapidly running rivers, are accordingly subject to heavy flood damages, while even greater damage is visited upon the rural communities and vast agricultural areas, which are annually inundated.

The people of the State are called upon to pay a quarter of a million dollars each year for the replacement of bridges alone. A vastly larger sum is paid annually by Pennsylvanians because of the loss to crops and soil fertility. The depreciation of farm land values due to their susceptibility

to flood damage is said to be enormous.

In Western States, where irrigation is required for the raising of food crops, the business of river utilization has long been appreciated and productively carried on. In the East, where water is more abundant, it is only here and there that the rivers have been developed, and then only under the pressure of some great local necessity like the impounding of water for the supply of cities.

The rivers of the Keystone State so destructive in floods include the Delaware, with its tributaries, such as the Lehigh, Schuylkill and Lackawana; the Susquehanna with its North and West branches, and such tributaries as the Lackawana, Juniata and others; also the Monongahela, Allegheny, Youghiogheny, Beaver and the upper portion of the great Ohio itself.

The greatest loss, however, is not from flood damage but the loss of the energy generated by the rivers in rushing from the mountains to the sea—power which if harnessed would far exceed in value the property losses occurring annually through flood damage, and which would in the course of a few years pay for the cost of harnessing these rivers.

To prevent the enormous flood damage requires the construction of reservoirs which would retain the waters in flood time and which could be used in giving a more steady flow to the streams and a more stable water supply for the generation of water power. At the same time, with the construction of these reservoirs, the installation of the necessary power-generating machinery becomes a comparatively easy matter.

While this would have great economic value with special reference to public utilities and industrial activity, it is of general interest because of the inter-dependence which exists between the various phases of activity within the state—agricultural, mining and manufacturing.

More and more is machinery tending to lighten the work of the farmer, who is thus becoming more keenly interested in power development, not only because it is needed in the production of machines, and cheaper power means cheaper machines, but in the operation of these machines on the farms as well.

The utilization of farm machinery is said to be in its infancy and vast strides toward the machining of farm operations are expected within the next decade or two. A most startling statement was recently made by Henry Ford, that through the utmost use of machinery, the operation of his 8,000 acre farm required but twenty days of work each year.

Since much of the water power wealth of the State lies in rivers which either flow through or are contiguous to New York and New Jersey, Governor Sproul expects shortly to arrange a conference with Governor Miller and Governor Edwards, at which will be discussed mutual measures for flood prevention, and the development of water power and the navigability of the rivers.

Better than Pills

YOU WILL NEVER wish to take another dose of pills after having once used Chamberlain's Tablets. They are easier and more pleasant to take, more gentle and mild in their action and more reliable. They leave the bowels in a natural condition, while the use of pills is often followed by severe constipation, requiring a constant increase in the dose. Every bottle guaranteed by your druggist.

SPRING MILLS, PA.

A BUSINESS RUSH!

We have never in our business history experienced such an early rush of business as we have witnessed this season. Hardly a month elapsed before our first purchases for the Spring Season were almost all disposed of. This ready response in buying from the people in our vicinity urged us to make a second trip to the Eastern markets for a complete replenishment of our stock.

We are pleased with the patronage thus far given us because we know our trade is beginning to realize and appreciate the care and taste of our selection in buying. They are beginning to realize the full values received for lowest prices paid, but our initial purchases were only a forerunner to the newly arrived merchandise. We have made some truly wonderful purchases of new merchandise and want to convince everyone of what we term as wonderful.

A "Corking" New Line of Apparel In Our Second Buying. The LOW PRICES Will Be Your Big Surprise.

A FEW EXAMPLES:

SILK, SATIN & CANTON CREPE DRESSES \$10 and upward

LADIES' SUITS--SERGE, TRICOTINE AND JERSEY \$14.50 and upward

COATS (ALL THE LATEST MATERIALS) \$8.50 and upward

SHOES & OXFORDS, former price \$10 and \$12, NOW \$3.98 to 6.50

MEN'S ALL-WOOL SUITS (NEWEST MODELS) \$15 and upward

You'll Want This Combination

It is the Case 10-18 kerosene tractor and a two-bottom Grand Detour plow. It is an ideal plowing outfit for either small or large farms.

The tractor weighs about 3,500 lbs., just a trifle more than a big team of horses. It burns kerosene economically, developing full power on the same.

The Tractor has a four-cylinder valve-in-head motor, mounted crosswise on a one-piece frame. A Case Siphon Thermostat controls the cooling system and insures complete combustion. The all-steel gears, with teeth cut and hardened, are enclosed and run in oil.

The Grand Detour 2-bottom Automatic Lift Rigid Beam Plow will fill the plowing requirements of the most particular farmer. Grand Detour plows are strictly quality plows. They are light in draft, yet so well constructed that they will give years of faithful service at a low cost of upkeep.

We would greatly appreciate the opportunity of telling you more about Case tractors. Drop in and let's talk it over.
