Broke Leg in Fall.
S. P. Hennigh, of Centre Hall, suffered a fracture of his left leg on Wednesday afternoon of last week, when he fell off a ladder while painting his new home. Mr. Hennigh fell a distance of twelve feet and might have escaped injury had it not been for a stick of timber lying on the ground, which he struck upon falling. The accident was due to his moving the ladder to a freshly painted part of the house, which caused the upper end to slip. The following day Mr. Hennigh was removed to the Bellefonte hospital where he is getting along as well as can be expected.

\$250 Reward for Arrest of Incendiarists.

Gifford Pinchot, the State's Chief Forester, has announced that the reward of \$250 offered by the Department of Forestry for information leading to the arrest and conviction of incendiaries starting forest fires, will be paid to any person except foresters, rangers, and others employed by the Department on a full-time basis. Forest fire warden, temporary laborers and others temporarily employed by the hour or day, are included among those eligible for the reward.

Wheat Outlook Excellent.

Indications are that Pennsylvania will have a bumper wheat crop this year, barring the unforeseen. On April 1, according to the Bureau of Statistics of Pennsylvania Department of Agriculture, the condition of the wheat was 98 per cent of a normal crop, eight per cent ahead of the corresponding date last year.

March is usually the critical month for the winter wheat crop and the mild weather this year did no damage of any kind.

The records show that there was a snow covering during the past winter of only 2.5 weeks, as an average for the entire state but the weather generally was so mild that the protection of a snow blanket was not necessary. The condition of the crop April 1, indicated yield of 29,905,000 bushels.

Hospital Installs Radium to Treat Cancer.

The Geisinger Memorial Hospital at Danville has completed arrangements for the purchase of \$10,000 worth of radium for use in establishing a radium clinic for central Pennsylvania.

The amount of radium that will be secured is 100 miligrams, or about enough to cover the point of an ordinary pocket knife. The life of this radium unit according to Dr. Ross, chief surgeon of the institution, is 3000 years and if all the energy it is capable of producing could be concentrated at one time it would be sufficient to lift a giant battleship out of the water.

Radium has been especially useful in the breaking down of tissue in the treatment of tumors and cancer.

The purpose to which it will be applied was announced last week in an article contributed by Dr. Dr. Foss to the Danville Evening News. The hospital authorities look to physicians of Central Pennsylvania to take advantage of the purchase of the radium in cases where it will be of service.

The unit of radium emanation has been named the "curie," in honor of Professor and Madam Curie, the discoverers of radium. The curie is that quantity of emanation in equilibrium with one gram of radium element. For practical purposes one one-thousandth part of a curie, or one "milli-curie" is the unit almost universally used.
