

In a new size package

10 for 10 cts MANY smokers prefer it. They'll find that this compact package of ten Lucky Strike Cigarettes will just suit them.

Try them—dealers now carry both sizes: 10 for 10 cts; 20 for 20 cts.

It's Toasted

Just So. Luck. "We ordinary people never get invited to a house party." "Yes, we have a lot of luck that we don't appreciate." Edith—I have only two girl enemies and they don't speak to each other. Mabel—How fortunate!

"Run Down" People Easy Prey To Serious Disease

When you get "run down" it merely means your system is disordered,—working poorly. If the disorder stays small, you may remain just "run down." But if it gets worse, you are downright sick. Don't wait until your "run down" condition develops into real illness. Start today toning your system with an A-1 blood remedy to drive out the impurities, a vegetable medicine like S.S.S., which has served thousands thus in the last half century. Get S.S.S. from your druggist right now. Then write us about your condition, addressing Chief Medical Advisor, 848 Swift Laboratory, Atlanta, Georgia. We'll send you medical counsel free.

JUST MATTER OF DEDUCTION NOT IN WHOLESALE BUSINESS

As the Boy Explained It, the Finding of Horse Was Really Quite Simple Matter. Speaking of the development of the story-telling talent in youth, Richard Bennett, the actor, is fond of relating this incident: Some years ago a prominent citizen of a town lost a horse. It was not much of a horse. In fact, it was blind in one eye and spavined. But, perhaps as a relic Bennett says, the prominent citizen wanted the horse. So he advertised, offering \$5 reward for its return. The town half-wit, a boy of nineteen, with a harelip, came one afternoon leading the horse, with a strap about the size of a shoestring, to the prominent citizen's door. The horse's owner was pleased. "Now," said he kindly, scenting a good narrative and perhaps an adventure, "now, my boy, here's your \$5; and I'll give you another \$5 if you'll tell me just how you found my horse." "Well, all right," said the boy. "I jus' thought if I was that old horse where I would go, and I did and he was." He got the extra five.—Kansas City Star. Nothing succeeds like success—in stirring up detraction.

Almost as Easy as Wishing

Your breakfast cup is ready without trouble or delay when

INSTANT POSTUM

is the table beverage.

To a teaspoonful of Instant Postum in the cup, add hot water, stir, and you have a satisfying, comforting drink, delightful in taste—and with no harm to nerves or digestion. As many cups as you like, without regret.

"There's a Reason"

Your grocer sells Postum in two forms, POSTUM CEREAL (in packages) made by boiling full 20 minutes. INSTANT POSTUM (in tins) made instantly in the cup by adding hot water. Made by Postum Cereal Co. Inc., Battle Creek, Mich.

HOW TO GROW AN ACRE OF TUBERS

Department of Agriculture Issues Bulletin to Aid Boy and Girl Club Members.

EVERY STEP CLEARLY GIVEN

Gravelly or Sandy Loam Soils, Well-Drained, Are Generally Considered Well Adapted to Production of Potatoes.

(Prepared by the United States Department of Agriculture.) When a boy or girl in a potato-growing club succeeds in raising tubers at the rate of 300 to 600 bushels per acre, as many of them have done, it is a source of inspiration to other members of the club who are less fortunate, and, what is perhaps of greater importance, an object-lesson to their elders as to what can be accomplished when the crop is given proper attention. To guide boy and girl club members, as well as their elders, in pro-

Garden Club Boy in His Patch of Potatoes.

ducing bigger potato yields, the United States Department of Agriculture has recently published Farmers' Bulletin 1190, "How to Grow an Acre of Potatoes." It is prepared especially for use in boys' and girls' club work, and every step from the selection of the potato soil to the harvesting, grading, and storing of the crop is discussed.

Best Potato Soils. Gravelly or sandy loam soils are generally considered especially well adapted to the production of large crops of potatoes, provided they are well drained and well supplied with plant food, says the bulletin. A very light sandy soil or a stiff clay soil should be avoided. The ideal soil is one that does not run together with rains, that works easily, is well supplied with humus, and, while well drained, is naturally supplied with moisture. Clover and alfalfa are regarded as the best preparatory crops for potatoes.

Prepare the Land Thoroughly. Potato soils should be plowed as deeply as possible, but always remember not to turn up more than an inch of the subsoil. The fall is the best season to plow. When the land is plowed at this time it should be disked and harrowed as early in the spring as possible to conserve the moisture and to prevent weed growth. Spring-plowed land should be disked immediately, in order to prevent the possible packing of the newly turned soil. In preparing the seed bed spare no pains to put it in good condition. If the crop is planted on land that is poorly prepared, no amount of subsequent cultivation will entirely remedy the defect.

Select the variety that is known to be adapted to the section. Use the best seed obtainable, and, if possible, make sure that it has been produced from strong, healthy plants that have developed a goodly number of tubers of even, marketable size and uniform shape. Before planting, the seed should be disinfected with formalin solution to prevent potato scab. Better yields are obtained by the use of from 15 to 18 bushels of seed per acre, though the average for the United States is 8.6 bushels. Cut blocky seed pieces, weighing from one to two ounces each.

After planting, keep the surface of the ground loose until the plants appear, then deep cultivation should begin, but as the crop develops shallow tillage is recommended. Insects and diseases should never be allowed to get established, but should be controlled by suitable fungicides and insecticides such as are described in the bulletin. When the crop is being harvested, a systematic effort should be made to select desirable tubers for next year's seed.

ROAD MARKERS ARE COSTLY

Disappointed Hunters Should Not Vent Their Spite on Signs Placed on Highways.

Hunters who cannot find anything to shoot at should not let out their spite on road markers. These markers have cost, as in the case of the Lincoln highway signs, \$7 each. According to the Iowa highway commission, the destruction of such signs is punishable by law, as they are public property. Also next summer some wild hunter might feel the need of an extra sign when touring, which some other enthusiast has shot up.

FREEZING FRUIT TO HELP PRESERVATION

Method Has Passed Experimental Stage in West.

Practice Is to Be Recommended in Sections Where There is Surplus and Sufficient Cold-Storage Space Available.

(Prepared by the United States Department of Agriculture.) Preserving fresh fruit by freezing has passed the experimental stage in the Middle Western and Pacific states. The office of preservation of fruits and vegetables, bureau of markets, has been investigating the new method for several years and the investigators report that such fruits as strawberries, raspberries, logan berries, blueberries, currants and cherries are now being frozen and held in commercial lots.

So far as the process is concerned, this method of preservation has all the merits of simplicity. The fruit is frozen in the same crates in which it is marketed. The temperature required is about 10 degrees F., though soft fruit is usually subjected to a lower temperature than that of better quality. So long as the temperature is maintained the fruit can be kept in storage. The frozen product must be used as soon as it is thawed, however, as thawing breaks down the tissues and allows the fruit to decay rapidly.

In ice cream, or when made into pies and preserves, the frozen fruit is in every way comparable to the fresh product. In preparing their report the representatives of the United States Department of Agriculture state that the practice is to be recommended in sections where there is a surplus of production and sufficient cold-storage space available to accommodate the fruit. Only fresh, sound fruit should be frozen. Freezing does not do away with mold, though mold will not develop as long as the fruit remains at the temperatures employed.

TREATMENT OF BROODY HEN

Large and Unnecessary Loss in Summer Production of Farm Flock Can Be Prevented.

There often is a large and altogether unnecessary loss in the summer production of the farm flock, due to the

Coop for Broody Hens.

idleness of numbers of broody hens which are permitted to remain on the nests indefinitely and so are unproductive for many weeks. If such hens are removed from the nest as soon as broodiness develops, are placed in a comfortable coop, and well fed and watered, they usually can be broken up promptly.

There is nothing better than the coop shown here. It is made of pine boards. The floor should be about a foot from the ground. The sides and floor are made of slats spaced one-half to three-quarters of an inch apart.

CULTIVATION IS IMPORTANT

Work Neglected in Garden Often Means Poor Vegetables and Then Very Few of Them.

The mistake of waiting till one has time to spare to cultivate the garden has too often meant poor garden vegetables, and few of them. The garden should be cultivated when the soil is in the proper condition and when the vegetables need it. It should not wait; it is as important as any other farm work and more important than most of it.

HARMFUL TO PASTURE WOODS

Practice Has Been One of Chief Causes of Deterioration—Young Growth Destroyed.

Pasturing of woods has been one of the chief causes of their deterioration. The severity of the damage depends largely on the number of stock and the size of the woods. One characteristic of a heavily pastured woods is the almost complete absence of young growth, or its existence only in small ragged patches as broken or scrubby stuff.

GIVE BREEDING FLOCK CARE

Watch Fowls Carefully and See That They Are in Good Condition, Advise Specialists.

Watch the breeding flock carefully and see that the fowls keep in good breeding condition, the United States Department of Agriculture advises, in Farmers' Bulletin 1116, on the selection and care of poultry breeding stock. The birds and houses should be examined to see that they are not infested with lice or mites.

CASTORIA
For Infants and Children.
Mothers Know That Genuine Castoria Always Bears the Signature of *Dr. J. C. Hathorn* In Use For Over Thirty Years **CASTORIA**

Net Contents 15 Fluid Ounces
900 DROPS
ALCOHOL—3 PER CENT
A Vegetable Preparation for Assimilating the Food by Regulating the Stomachs and Bowels of INFANTS & CHILDREN
Thereby Promoting Digestion, Cheerfulness and Rest. Contains neither Opium, Morphine nor Mineral. NOT NARCOTIC.
A helpful Remedy for Constipation and Diarrhoea, and Feverishness and LOSS OF SLEEP resulting therefrom in Infancy.
The Genuine Signature of *Dr. J. C. Hathorn*
THE CASTORIA COMPANY, NEW YORK.
At 6 months old 35 Doses—40 CENTS
Exact Copy of Wrapper.
THE CASTORIA COMPANY, NEW YORK CITY.

Good Bye!—Malaria!

TAKE DR. J. J. RUDOLPH'S **ANTIPLASMA** MALARIAL CURE

GUARANTEED 7-DAY CURE OR MONEY BACK

Recommended for Adults and Children Because It Does Not Contain Alcohol, Arsenic, Narcotics, Quinine, Mercury or Habit-Forming Drugs In Capsules Absolutely Tasteless

Although Antiplasma is a 7-day guaranteed cure, the majority of malaria sufferers taking this treatment, which is in capsule form—hence tasteless—report relief and seemingly normal condition at the end of the third and fourth day!

If your druggist doesn't sell it, mail \$2.00 to the Viro Medical Co., 200 West Houston St., New York, N.Y., and one bottle containing complete seven-day cure will be immediately sent you postpaid. Antiplasma is Malaria Insurance at a cost of \$2 per year

SARAH HAD GENTLY HINTED SYSTEM DID NOT WORK WELL

Remark Might Have Led Beau to Imagine She Disapproved of His White Clothes. Englishwoman Found Some Disadvantages in Giving Instructions in the Sign Language.

Mrs. Morgan had a colored maid named Sarah. One Sunday afternoon the mistress saw Sarah's lover leaving the house clad in a suit of white flannel. A little later, when the maid appeared, her mistress said: "Sarah, that bean of yours should never wear white. He is so black that white clothes makes him appear all the blacker. Why don't you give him a hint?" "Why, Mis' Morgan," said Sarah, with animation, "I done give him lots of hints, but he jes' natterly ain't got no sense an' didn't take 'em." "Probably you didn't make the hints strong enough," said the mistress. "Well, no'm, dat's jes' what I think myself," agreed Sarah, reflectively; "I don't believe I did. I jest looks at him right hard, an' I says, 'Nigrah, yo' sho' do look like a black snake crawlin' out ob cream, you do!' The's jes' all I says to him, Mis' Morgan. Dat's all."

Minds of too many men are filled with useless knowledge.

Ready to Eat and Every Bit Eatable Grape-Nuts
is convenient, free from waste, and moderate in price.
Skilled blending and long baking bring out the full flavor and richly-nourishing qualities of this cereal food, and make it easy to digest.
