PUT BABY IN SECOND PLACE

Small Sister Would Be All Right, Said Little Miss, but @h You Flayer-Plano!

A five-year-old Wallburgh miss is enamored of the baby next boor. Yes She asked: "What does that 2 cents terday she interwiewed her mother; mean?" subject, the practicability of having a baby sister of her own. The mother your ice cream and 2 cents luxury was sympathetic, but pointed out that tax." babies are expensive.

"How much would a bahy cost?" asked the five-year-old. "Oh, I don't knew just hew much.

but a great dead," her mother an-"As much as a player-plano?" the

voungster pursued. "Yes, more than a player-plano," was luxury."

Then said the young miss decisively.

Fairy Tale.

piano."-Newark News.

Once upon a time, as:all good stories begin, there was a Fairy, and the of a tree when the Fairy came by and said, waving her wand:

"Woodsman, spare that tree and get a regular job being President of your country."

And so the Woodsman moves to Washington and one day the Fairy called again and said, w. her w.; "Is there anything more I can do

for you?" And the President said: "Yes, you little son-of-a-gun! Eou

can take me back where I came from and hand me my ax, and beat it!"-Richmond Times-Dispatch.

Another Goiden Rule. Let us be very gentle with our

neighbors' faitings, and fargive our far!" friends their debts as we shope ourselves to be forgiven .- Thackeray.

Satur is willing to let men go to church on Sunday if they will work for him the remainder of the week.

Are Corns & Luxury? When is a tuxury tax? Representa-Mive Aaron & Kreider tells this story: A woman went into a restaurant and ordered a plate of age cream, and when she came to pay she had a check for 15 cents and 2 cents was added to at.

"Well," stae was told, "15 cents for

She paid it, and then she walked across the street to the drug store and asked for a corn plaster, and she got a check for 10 cents, and 1 cent added. She said. "What is the 1 cent for?" "That is the waury tax."

"Well," she said, "this is the first time I ever knew that corns were a

MARKETING LOSS CAN BE AVOIDED

Ruinous Conditions Can Be Averted in a Measure by More Careful Distribution.

TELEGRAPHIC REPORTS HELP

Effective Work Accomplished by Imperial Valley Melon Growers and Shippers in Co-operation With Bureau of Markets.

(Prepared by the United States Depart-

ment of Agriculture.) Market gluts are one of the principroducts, especially those of a highly perishable nature, such as soft fruits adjust themselves. Avoidance of these rulnous conditions is possible in large measure by more careful and widespread distribution, but all predacts are not marketed mest advantageously by the same system, and the marketing plan varies somewhat in different areas from season to sea-

Knrow Daily Distribution. With respect to fruits and vegetables, and more especially those of high perishability, perhaps are more effective work in broadening distribution has been accomplished than that of the Imperial valley melon growers and shippers in co-operation with the bureau of markets, United States Department of Agriculture. The department opens a temporary office at Brawley, 'Cal., at the beginning of the shipping season. By means of a large chart in the temporary office of the department shippers are able to know the daily distribution of each day's shipments and diversions.

Shipper Has Information. by the department's representatives in get the total cost. the East and telegraphed to its Braw-

1 xpical Farmers' Curb Market.

to distribute his shipments accordingty. There is no discrimination-every stripper has full knowledge of the entire situation. The day has passed when one shipper has advantage over another by reason of more complete infermation.

Widespread and accurate distribution cannot be accomplished without dependable information as to conditions of supply and demand.

Southern Live Stock Owner Even Discards Mediocre Roosters, Canines and Cats.

The excellent spirit with which livestock owners are co-operating with the United States Department of Agriculture in live stock improvement is shown by numerous reports from persons who dispose of inferior sires. One of the most thorough clean-ups is reported by a live stock owner in Webster parish, La.

"Within the last three months," he writes to the department, "we killed off seven roosters ranging from four to six years old. They were related to the female stock, and the offspring were weaklings and deformed. For the same reason we castrated two scrub boars, and killed off two cur dogs, and are going to get rid of scrub

The present sires on the farm now include a purebred boar, four standard-bred Rhode Island Red roosters, and purebred Airedale dog. Cattle and horses also are raised, and, although no sires are owned, the cows and mares are being bred only to pure-

AVOID OVERCROWDING CHICKS Wyandotte fowls.

Growing Fowls Need Plenty of Room in Sleeping Quarters-Ventilation Is Needed.

After the chickens are a few weeks old special attention should be given to see that their sleeping quarters are not overcrowded. Brooders that provided plenty of room when the chicks were first hatched will now be seriously overcrowded, and the chicks will be time they may cause little or no damstunted and permanently injured if age; but, if allowed to grow large and more room is not given. Until they increase in number, trouble and loss can be transferred to larger houses provide all ventilation possible.

TO FIGURE COSTS OF PRODUCING POTATOES

Investigations Made by Experts in Several States.

Simple Problem to Ascertain Various Items Figuring In Expense Column-Charge for the Use of Land Must Be Added.

(Prepared by the United States Depart-

ment of Agriculture.) Man labor, horse labor, fertilizers, and seed constitute about 80 per cent of the total cost of potato production in average practice, according to investigations by the United States Department of Agriculture experts in Minnesota, Wisconsin, Michigan, New York and Maine. These items can

pai causes of loss in marketing farm easily be ascertained by any farmer who wishes to keep a check on farm profits, and it is a simple problem, usand wegetables, which cannot be held ing them as a basis, to find out the until conditions of supply and demanf total operating expenses. including

Harvesting Potatoes.

This information, in conjunction overhead, taxes, etc. To this must be with the telegraphic report compiled added the charge for use of land to

Labor and material costs are found tey office, showing receipts, prices, and by multiplying the number of man and conditions in from 20 to 25 of the iteam hours by the prevailing local major markets of the country, enables rate and adding fertilizer costs the shipper to have before him each (manure at approximately \$1.50 per day a complete picture of the market iton) and seed at current market price situation with respect to melons, and at time of planting, whether purchased or produced at home. Since these costs are, roughly, 80 per cent of aperating expenses, the total expense, ncluding spraying, machinery, storage, taxes, insurance, and overhead expense, may easily be figured. In estimating the use of land the local cash rent basis should be used, if available, and, if not, the interest at mortgage rates on the conservative acrevalue may be taken.

FEED LITTLE CHICKS OFTEN

No More Moistened Material Should Be Given Than Young Fowls Will Eat Up Clean.

Young chicks should be fed a tittle at a time and often. They should be fed early in the morning and just before going to "bed" at night, and not less than two times in the intervening period. For the first two weeks they may be fed three meals of soft feed and two of hard, and after that age two of soft and three of hard, feeding less soft feed as they grow older.

No more moistened soft feed should be given at one time than they will eat up clean. Poultry specialists in the United States Department of Agriculture say if any feed is left it should be removed or it will grow sour and cause bowel lopseness and dysentery. The DISPOSE OF INFERIOR SIRES finely cracked grains may safely be used from the start, but the chicks do not as a rule grow as rapidly as when a part of the feed is ground. When the chicks are from four to six weeks old the frequency of feeding may be decreased to three times a day.

From the very first chicks should be induced to exercise; activity is a prime factor in promoting health and growth. Feed grain in the litter, and make them scratch for it. A little fine chaff or finely cut clover makes a good

PUREBRED MOST PROFITABLE

Louisiana Dairyman Finds Registered Stock Superior to Grade Cows for Family Use.

Developments in the "Better Sires, Better Stock" crusade continue to show that there is a trend not only from scrubs to beter stock but even from grades to purebreds. "I had three extra-good grade cows for family use," a dairyman in Iberia parish, La., writes to the United States Department of Agriculture, but, he added, "I concluded to get registered animals, since such stock is better and more profitable." This dairyman is also a breeder of standard-bred White

PLAN TO EXTERMINATE RATS

1? Allowed to Grow and Increase in Number Trouble and Loss Are Sure to Follow.
