Crimson Clover

For Winter and Spring Grazing
—To Put Humus in the Soil

A crop of crimson clover plowed under is worth \$20 to \$30 in increased productivity. It adds humus without which the soil is like a little barrel and a leaky one at that. A field in which crimson clover is sown, absorbs moisture like a sponge, gives rains from below when there are none from above. It is an excellent winter and spring grazing crop—makes the best of early green feed and good hay. Get your supply now.

WOOD'S SEEDS

Plant some of Wood's Hairy Vetch—a wonderful nitrogen gatherer and soil improver—this gives even poor lands—give prodigious yields of best forage and hay—seeds itself—stands cold winters—saves of the fertilizer bill—prevents leaching.

Grain Pasture Mixture

Grows quick and provides winter and spring grazing—composed of best grazing varieties of wheat, winter rye, winter barley, oat, vetch, rape and Arctic grass. Nothing better for a quick-growing one season pasture. Write for full catalog and Wood's Crop Special giving new prices on field seed.

GOLD MEDAL BARLEM OIL CAPSULES

The National Remedy of Holland for centuries and endorsed by Queen Wilhelmina. At all druggists, three sizes. Look for the name Gold Medal on every box and accept no imitation.

Pesky Bed-Bugs P. D. Q.

Try just once P. D. Q. — Pesticide Quiescent—no odor, no smoke, no residue, no need for ventilation, no need to leave the room. Kills all bed-bugs, roaches, fleas, etc. in one day. P. D. Q. is not an insect powder, but is a new chemical that kills insects and their eggs. Each capsule contains free, a patent spirit, to enable you to get to the hard-to-get-at places and saves the juice. A 25-cent package makes one quart, enough to kill a million insects and their eggs. Your druggist has it or can get it for you. Mailed prepaid upon receipt of price by the Owl Chemical Works, Terre Haute, Ind.

COME TO FLORIDA

and look over our 20 and 40 acre PRODUCING FARMS. Land cleared, fenced and ready to plant. Ideal land for early potatoes, all kinds of truck, fruits, nuts and poultry. See what others are doing with this soil and wonderful climate by which 2 or 3 crops can be raised every year. Only 36 miles from Jacksonville, the great market and shipping center of the South-east, with which it is connected by fine roads. Good schools, churches, stores and telephone service and everything to make practical farming both pleasant and profitable. Very reasonable terms. Write today for particulars.

GROWING WINTER WHEAT IN NORTH

Hardier Varieties Introduced
That Give Better Yields
and Mature Earlier.

BETTER DROUGHT RESISTANT

Better Division of Labor Permits Fall Seeding and Earlier Harvesting—Careful Selection of Seed Will Aid Yield.

(Prepared by the United States Department of Agriculture.)

Since the introduction of the hardy varieties of wheat from southeastern Europe there has been a decided northward movement of the winter-wheat area. This movement has been rapid in recent years. The reasons therefor are the generally large yields of winter wheat due, first, to its earlier maturity, thus enabling it to escape hail, hot winds and disease; second, to its greater drought resistance; and third, to the better division of labor, which it allows through fall seeding and earlier harvesting.

The profitable production of wheat in the eastern part of the United States depends to a considerable extent on the choice of the best-adapted varieties. In general, the soft red winter wheats are grown, although soft white winter wheats are popular in the northeastern United States, especially in New York and Pennsylvania. In the extreme western portion of the eastern area, which is limited on the west approximately by the line of 30 inches of rainfall, hard red winter wheats of the Turkey type are grown. Along the line of 30 inches rainfall there is a transition zone in which hard and soft red winter wheats succeed about equally well.

Better Varieties for Many Farms.
Many farmers are doubtless growing poorer varieties of wheat than they might grow if they knew exactly what was adapted to their localities and farms. The United States Department of Agriculture has just issued Farm-

Harvesting Wheat.

ers' Bulletin 1168, Varieties of Winter Wheat, Adapted to the Eastern United States, which charts localities in which various types of wheat can be grown to advantage, and lists the varieties adapted to each particular locality.

The bulletin suggests that there is a large local demand in New England for wheat as a poultry or stock feed, and it should not be difficult for several farmers in almost every neighborhood to sell all the wheat they can raise at a good price to their neighbors. Winter wheat will doubtless produce better average yields, where it can be grown, than spring wheat, if proper cultural methods and suitable varieties are used.

Improve Wheat Yield.
Wheat can be improved in yield and in other desirable characteristics by the selection of good heads or good plants from the general field and growing the seed from each individual head or plant in separate rows. Continued selection will result in constantly improved seed. Another method of purifying a variety and increasing the yield is what may be called mass selection. This consists simply in picking out good heads from the field at large, sowing the selected seed in a small area, and reselecting it the next harvest time. The bulletin may be had on application.

ANALYSIS MADE OF MANURES

Dry Material Contains Large Amount of Nitrogen, Phosphorus and Potassium.

The average of analysis of manures from cattle, horses and mixed, shows that a ton of dry manure contains 38 pounds of nitrogen, 7.6 phosphorus and 304 pounds of potassium. A ton of fresh farm manure consists of about three-fourths water but it contains ten pounds of nitrogen, two pounds of phosphorus and eight pounds of potassium.

HOW DISEASE IS INTRODUCED

Unwholesome Foodstuff That Is Decayed or Moldy Should Never Be Given to Fowls.

Disease is often introduced into a flock by unwholesome foodstuff that is decayed or moldy, but good food may be easily spoiled by placing it in dirty troughs or neglected feeding places, especially in hot weather when soft food or milk is given.

WELL-BRED POULTRY AROUSING INTEREST

Poultrymen Help Better Sires—Better Stock Movement.

Nebraska Live Stock Owners Enrolled in Campaign Report Standard-Bred Fowls—Plymouth Rocks and Leghorns Lead.

(Prepared by the United States Department of Agriculture.)

In the absence of census data on the quality of farm poultry, information being received by the United States Department of Agriculture in connection with the Better Sires—Better Stock movement is believed to be of interest to poultrymen. For instance, of 75 livestock owners in Webster

Barred Plymouth Rock.

county, Nebraska, who in one day enrolled in the better sires drive, 65 reported standard-bred fowls. The flocks averaged 94 birds. The principal breeds reported are, in the order stated, Plymouth Rocks, Leghorns, Rhode Island Reds, Orpingtons and Wyandottes. Barred Plymouth Rocks were more numerous than other varieties in the breed. Of the Leghorns the White Leghorns were raised in largest numbers, while of the Wyandottes the white variety was somewhat more popular than the Silver-Laced Wyandottes, which were second. Buff Orpingtons were the only variety of that breed reported.

The facts stated are believed to show interest in the keeping of well-bred poultry, especially since the Better Sires—Better Stock blanks merely call for the number of poultry kept; and in all cases the live-stock owners volunteered the facts about breeds and varieties. It is also noteworthy that, whereas the better-sires drive is aimed chiefly at the improvement of breeding males, in the case of poultry a large majority of females likewise are standard bred.

FARM CHIMNEYS NEED STUDY

They Should Start From Ground and Not Be Placed on Brackets—Make Foundation Solid.

All chimneys for farm buildings should start from the ground. Those placed on brackets are unsafe and often increase the rate of insurance. In a properly designed house of moderate size, one or at most two chimneys, each containing several flues, will serve every purpose. If possible, a flue should be provided for each stove, as much better drafts are thereby obtained, say specialists of the United States Department of Agriculture.

The chimney should have a solid foundation of brick or stone, and if of brick, of course, an extra footing should be laid. The exterior walls should be two bricks thick and the division walls one brick thick. In case the chimney is lined with one of the patent fire-clay linings now on the market one brick will prove of sufficient thickness for the exterior walls.

In case it is necessary to carry a stovepipe any considerable distance inside a partition to reach the chimney, a terra cotta tangle should be used, and where a pipe passes completely through a partition it should be protected with a ventilated tangle.

PLAN TO WEAN CALVES EARLY

Much Time and Annoyance Saved if Youngster Is Taken Away When Quite Young.

The cow owner who neglects to wean his calf because it is too much trouble in making ten times the trouble for himself by letting it nurse its mother. It is surprising how soon a calf can be taught to drink from a bucket, if one is determined enough. And the freedom from bothering with a hungry young bull a few weeks later, charging down, trampling one's feet and insisting upon having his way, is worth a lot.

COVER OR BLANKET FOR COW

Good Way to Keep Flies From Bothering While Milking—Obviates Tail Switching.

To keep flies from bothering while milking, make a cover or blanket for the cow from a large gunny sack, ripped open, and provided with strings for fastening under forelegs, and string across back to hold in place over the rump. If both the cow being milked and the one behind the milker are so protected there will be very little tail switching.

NO DIFFERENT.

The regular conductor of the advice to the love-lorn column being away, the red-headed office boy had been temporarily promoted to that job, under the general supervision of the sporting editor.

"Here's a gluck who wants to know how long girls should be courted," the office boy reported. "What'll I tell him?"
"Use your own brains, boy!" the sporting editor growled. "Tell him just the same way as short girls, of course."

The Tripping Tongue.

Artist (meeting friend at exhibition)—Well, how do you like Brown's picture?
She—That one? Why, I thought it was yours—but since it isn't, I can speak freely. Miserable daub, isn't it?

And it wasn't until an hour later that she realized that she had given him a back-hander.

Conservatism.

"What sort of business is Glipping in now?"

"He says he's doing a little something in oil."
"Remarkable!"
"Why so?"
"That's the first time I ever heard of an oil operator who didn't claim to be juggling with millions."

Not Very Deep.

He (calling)—Reading poetry are you?
She—Yes, I'm wading through Tennyson.

He (glancing at page)—Ah! And you've just got to the middle of 'The Brook.'

NO INDEED
"Do you wouldn't want to marry an old guy, eh?"
"Not if that was his only qualification."

A Trial Then.

A motor car
is lots of fun
Unless the blamed thing
Will not run.

Hoping for a Benign Review.

First Show Manager—Do you believe in the influence of environment?
Second Ditto—Yes; on my first nights I always put the grumpiest critic in Seat B9.

What It Cost.

"Your wife looks stunning tonight, her gown is a poem."
"What do you mean," replied the struggling author. "That gown is two poems and a short story."

Preserving an Appetite.

"When I was a boy my parents did not allow me to read dime novels," remarked a serious citizen.
"Neither did mine," replied Miss Cayenne. "I'm very grateful to them for not allowing me to indulge in sensational fiction to an extent that might spoil my taste for the modern motion picture thriller."

And Then the Storm.

Modiste—Really, madam, this gown makes an entirely different woman out of you.

Customer's Husband—Take it, Helen—never mind the price!

Human Dynamo.

"That judge is a human dynamo. He electrified the courtroom during the trial."

"And what is he doing now?"
"Charging the jury."

Fine for Writers.

Inspiration ink—It flows freely. This is a sign we have never seen, but we hope to see it some day in a notion store.

Importance of Little Things.

She—Just think of it! A few words mumbled by the minister and people are married.

He—Yes, and, by George, a few words mumbled by a sleeping husband and people are divorced.

A Mere Trifle Nowadays.

"The largest contributor to our campaign fund wants his money back."
"Have you spoken to our candidate about that?"

"Yes. He wants to know what's a million between friends."

Shave With Cuticura Soap

And double your razor efficiency as well as promote skin purity, skin comfort and skin health. No mug, no slimy soap, no germs, no waste, no irritation even when shaved twice daily. One soap for all uses—shaving, bathing and shampooing. Advertisement

A Courteous Formality.

"I have sent word to my constituents that I will welcome advice at any time," remarked Senator Sorghum.

"But you'll get so much you can't remember it."
"All I am saying is that I will give it a polite welcome. I'm not promising to stay awake and listen."

Chop Suey Romance.

"You admit writing these letters to this young lady of the chorus?"

"Yes," said the millionaire defendant in a breach-of-promise suit.

"Ah! And these hieroglyphics at the bottom of each letter are kiss marks, no doubt?"

"No," said the millionaire, with a grim smile, "what you see is merely Chinese for 'Yours sincerely.'"—Birmingham Age-Herald.

Y. W. C. A. in Constantinople.

In the presence of a large number of distinguished guests both in political and educational circles, a new service center was opened recently in Stamboul, the old city of Constantinople, by the Y. W. C. A. Speeches were made in both English and Turkish. The house and garden obtained for the center are both attractive and well adapted to their new use, as well as conveniently situated. Another meeting and recreation place which the Y. W. C. A. has provided for Constantinople girls is a spacious garden on the beautiful sea of Marmora. It has been rented from a wealthy pasha to serve as a summer camp.

POSSIBLY HER LAST CHANCE

At All Events, the Object of His Affections Perfectly Agreed With Her Fiance.

For several minutes the young man did not speak. His heart was too full. It was enough for him to know that this glorious creature loved him; that she had promised to share his fate.

With a new and delightful sense of ownership he feasted his eyes once more upon her beauty, and as he realized that henceforth it would be his privilege to provide for her welfare and happiness, he could have almost wept with joy.

His good fortune seemed incredible. Finally he whispered tenderly:
"How did it ever happen, darling, that such a bright, shining angel as yourself fell in love with a dull, stupid fellow like me?"

"Goodness knows," she murmured absently; "I must have a screw loose somewhere."

The Most Chipper Man.

"Who was it said that life is like a poker game?"
"Dunno, but he was wrong, anyway. In poker it's the gayest man that has the blues."

No Hope for Him.

He—Can you give me no hope?
She—None whatever; I'm going to marry you.—Boston Transcript.
