**CARRIER PIGEONS IN WARFARE.**  
The use of carrier pigeons is very ancient in the Orient and was brought to the attention of Europe at the time of the First crusade, when the Saracens were found to have the birds in regular use for the conveyance of information. The Christian commanders employed falcons to chase and intercept this pigeon post on several occasions, and on others caught the tired birds, substituted misleading messages for those they were carrying, and sent them on to deceive the enemy. The Mohammedan sovereign Nureddin used carrier pigeons for welding together the scattered parts of his empire. Although the use continued, it was not until the Franco-Prussian war of 1870 that pigeons were again of conspicuous public service. During the siege of Paris constant communication was maintained between the besieged city and the outside world by means of the carrier birds. Subsequently the German, French and other European governments established regular pigeon corps and thousands of birds were trained and kept for use as messengers.

**ZEALOUS OPPONENT OF DYES**

Objection Made by English Quaker Was That They Led to Concealment of Dirt.

John Woolman, the Quaker, refused to wear any clothing that had been dyed. He carried his scruples so far that he wore a hat that was of the natural color of the fur, thereby presenting, as one of his biographers remarks, the aspect of a sort of Robinson Crusoe. One of John Woolman's objections to dyes was that they concealed dirt. Traveling often in wet weather through narrow streets, he was frequently distressed by various impurities—especially when his journeys took him to places where cloth had been dyed, so that at sundry times he had to "walk over ground where much of their dyestuffs had drained away." This produced in his mind a great longing "that people might come into the world with a cleanliness of person and cleanliness about their houses and garments." As a further reason against dyes he argued that the spirit that would hide dirt leads to the concealment of anything that may be materially or morally disagreeable, and is therefore contrary to sincerity, and is therefore devoted to the promotion of cleanliness much good in every way would result.

**Finger Prints of Every one.**

The Argentinians have carried the use of finger prints further than perhaps any other nation, writes Harry A. Frank in the Century Magazine. Even school children taking formal examinations must decorate their papers with thumb print as a protection against forgery. Both photograph and "cedula" are produced by a well-trained public staff in well-arranged public offices, in which the prints of all ten fingers of the applicant are filed

away under the number inscribed on his "libreto" (identification papers—every citizen of Buenos Aires has a booklet of identification), and where courteous attendants bring him into contact with the lavatory facilities which he requires before again displaying his hands to a putchritudinous public.

— ALWAYS RELIABLE —

**Is your wife "too tired to go"?**

When your wife is too tired to enjoy good times it's not always her fault. Don't expect her to do work of a sort that you wouldn't do.

If your wife has to do her own housework, first of all she should have a vacuum cleaner. Hand-sweeping with a broom is not only unnecessary hard work—it's inefficient.

**Torrington**  
ELECTRIC VACUUM  
**CLEANERS**

Come in yourself and let us show you the Torrington Electric Vacuum Cleaner, as one business man to another. You will readily understand its superiority when you see the revolving carpet-sweeper brush in its nozzle and hear the hum of its high-speed, suction-generating motor.

Surprise your wife with a Torrington. You will cut the cost and necessity of outside maid service, and lengthen the life of your rugs and hangings.

There is a Torrington Dealer near you. If you do not know him write at once to
