SUNSHADES FOR LUCKY DOGS

Innovation That Was Brought About by the Protected Spell of Unusually Hot Weather.

One of the quaintest innovations of the recent heat wave in London was the introduction of sunshades for dogs. These consisted of light crepe-de-chine protections suspended over the animal's necks by light wire strands.

The "lucky" animals whose masters or mistresses bought the sunshades did not seem so pleased with them as perhaps the donors had hoped, remarked London Answers.

One dog found the heat so oppressive that he sought the shelter of a railway tunnel on the Highbury tube. Here he was, however, so frightened by the continual passing of trains that he shrank into a dark corner and remained there for two days, until his master, on the information of a railway man, fetched him.

Although sunshades for dogs made their first appearance, there was a strange absence of the straw hats that horses used to wear before the war. Have horses been so hardened by the great campaign that they do not need the consideration that dogs get?

Reverse English.

"Rather thoughtful of the people who sell ingredients for making beer in the home."
 "How's that?"
 "They tell you what not to do to make it intoxicating."

"Sly fellows. But for fear somebody might mistake their meaning they ought to put the 'not' in parentheses."
 —Birmingham Age-Herald.

A politician without patronage is like a cat without claws.

A shady past seldom has a silver-lined future.

GREW WHISKERS TO GET JOB

And Secretary of State Hughes Has Worn the Required Facial Adornments Ever Since.

Charles E. Hughes, secretary of state, gave little indication to his teachers and classmates at Brown university that he was to become a leader in the nation, though it is true that he had his bachelor degree before he was 21. It was his intention to make teaching his life work, and he did devote some years to that occupation. His first application for a job was as a teacher of Greek in a small eastern college. The head of the department received him kindly, but evidently regarded his youthful appearance as making him an impossibility in that line.

"Why," said he, "you have no more hair on your face than an egg."
 "If a beard is necessary I can raise one," said Hughes, who knew his own ability in that line, and soon was able to qualify for the job and got it. And, by the way, he has the same whiskers yet. He has never worn a clean-shaven face since.—Columbus Dispatch.

Scenery Has a Cash Value.

"American motorists are becoming more nomadic than gypsies," Secretary of the Interior Albert B. Fall declared. He was discussing the future of the national parks.

The parks are the best friends that the motorists have.

"The nation is rapidly learning that scenery is one of its most valuable resources. Italy, France and Switzerland capitalized their scenery before the war and the tourist income was a big business factor for them."

Mohammedanism has no form of excommunication.

Alfred the Great built England's first fleet in 878.

ORNATE GAS STATIONS MAKE BIG HIT IN ENGLAND WITH AUTOISTS

While this type of gas station is a familiar sight to the American automobilist, it has just been introduced in England, and bids fair to find favor with the motorist there. The photograph shows the new service station ready for business after its opening at Vauxhall.

CARE OF SPRING WILL SAVE TIRE

Improper Adjustment of Brakes, Careless Driving and Under-inflation Are Bad.

LUBRICATION IS NECESSARY

Oil or Graphite Between Leaves Will Enable Springs to Take Up Shocks of Road and Prevent Racking of Parts.

There is a very close relationship between proper care of the springs in an automobile and the mileage which the motorist receives from his tires. Properly adjusted, well lubricated springs will mean longer life to tires and to the entire car, while cracked or neglected springs will cause rapid deterioration of engine, body and tires.

Many motorists believe that if they make a cursory examination of the tread and outer sidewalls of a tire they are taking ample precautions against undue wear and tire trouble. Yet there are many other things to which the average driver pays little attention which have a direct bearing on the service he gets from his tires.

Improperly adjusted brakes, careless driving, overloading, underinflation and, last but not least, bad springs will all strip dollars off the tires every time the car is driven.

Springs are placed in a car not only to make it more comfortable to ride in, but also to take up a major part of the road shocks and prevent racking of the various parts. When there is a shock, such as comes when a wheel hits a rough spot in the road, the tires get it first. Then follow shocks to the wheels, axle, body, occupants and motor, with the springs in between to take up as much as possible.

When the springs fail to function properly, all the shock has to be taken up through the tires, both in the initial shock and in the natural rebound.

Lubrication of the springs is not difficult, and labor expended in this task will pay big returns. One of the best methods is dismantling the springs and lubricating them with graphite grease. First remove all the rust with an emery cloth. Another method is to lift the body of the car on jacks, and open the springs with a cold chisel inserted between each leaf, squirting oil and greases in freely.

A simpler method is to take an oil can and run it along the depressions in the springs, allowing the oil to flow out freely, and then rocking the car to open and close the leaves, working them back and forth, permitting the oil to work well back under each leaf.

AVTOMOBILE FINITS

Ohio has a registry of 877,000 motor vehicles.

Pennsylvania has 17,500 retail gasoline dealers.

There are 90 firms in the United States manufacturing gasoline tractors.

Highway accidents in Paris last year numbered 60,375—an average of 165 daily.

A light automobile has been invented in France that can be made to jump over obstacles not more than three feet in height.

When the owner removes a spark plug and finds the porcelain insulator broken, the portion which has fallen off may have made its way down between the piston and cylinder, where it will cause scoring of the metal.

Motor Odds and Ends.

The modern snow tractor is able to do the work of twenty-five men.

Harvard created an automobile club twenty years ago.

More than half of all the automobiles in Canada are found in rural districts.

Fifty per cent of the vehicles in the United States postal service are automobiles.

Seventy per cent of the passenger traffic in California is transported by motor buses.

In the city of Stockholm, Sweden, there are 2,135 automobiles and 1,015 motorcycles.

Every automobile in Paris must be equipped with an anti-splash or mudcatching device.

During the calendar year 1920, approximately 1,740,000 passenger automobiles were produced in this country.

TEMPORARY REPAIRS FOR AUTO LOW GEAR

What Can Be Done in Case Friction Band Burns Out.

Strips of Leather or Heavy Canvas Properly Inserted Will Hold for Several Days or Until It Can Be Fixed Permanently.

When the low-gear friction band, on a popular light automobile, burns out after a long pull, it will be found practically impossible to get the clutch into high gear. When such an emergency occurs, a temporary re-

pair, that will hold for several days, or until permanent repairs can be made, is easily effected.

The cover of the transmission case is removed with care, so that the gasket will not be broken. The band-adjusting screw, on the outside of the transmission case, is unscrewed until the low-gear friction band is released from friction. A strip of thick, tough canvas, is inserted between the low-gear band and the drum, as shown in the drawing. Another strip of leather, or heavy cloth, 2 or 3 inches long, is rolled up and inserted between the coil spring and the flat leather band, in the manner indicated. Tightening the adjusting screw, until the low-gear friction band is nearly tight, and replacing the transmission cover completes the repair.

—Leo C. Shinn, Portland, Ore., in Popular Mechanics Magazine.

OBSERVE NOISES IN ENGINE

Loose Connecting Rod Always Gives Plenty Warning and Careful Driver Notices It.

Keep your ear attuned to any noises from the engine so that the slightest change will be noticed. A loose connecting rod always gives plenty of warning and the careful driver will notice it and stop in time. The other man wrecks his engine and piles up a big repair bill.

WRIGLEY'S P-K'S

WRIGLEY'S Newest Creation
 10 for 5c

A delicious peppermint flavored sugar jacket around peppermint flavored chewing gum.

Will aid your appetite and digestion, polish your teeth and moisten your throat.

The Flavor Lasts

Fall and winter bring with them INFLUENZA, DISTEMPER, COUGHS and COLDS. Give your horse Spohn's Distemper Compound at the first sign of sickness. Better still, give it as a preventive before he shows signs of sickness. "SPOHN'S" acts equally well as preventive or cure. By reason of its germicidal qualities, it hastens recovery by expelling the disease germs, abating fever and restoring the appetite. 40 cents and \$1.20 per bottle at drug stores. SPOHN MEDICAL COMPANY GOSHEN, INDIANA

Radio Time.

How useful it would be to watch-makers and repairers to have a simple wireless telephone outfit with which to receive the daily time signals, is brought out by H. Gernsback in the Radio News, New York. He says: "If once the jeweler sees how simple it is to work a time-receiving radio outfit he will soon become enthusiastic, and, as many of his tribe have done, will even go so far as to put the outfit in a show window in order to attract trade. We know a jeweler in the South who uses a loud talker outside his window, where everyone for half a block around can hear when N. A. A. seconds out the time at noon."

Checking Up.

The sultan of Zanzibar and his wives have landed at Durban. We understand that the captain asked him to count them carefully, as mistakes could not be rectified after leaving the ship.—London Punch.

The surface soil of Florida is rich in phosphates.

It Worked, "Anyhow!"

Bobby will be six next month and is very proud of the fact, but he isn't much larger than a child of four.

The other day mother and daddy went to buy tickets to Detroit and found that youngsters more than five years of age had to have \$5 fare. So they went home and instructed Bobby to say: "I'll be five years old next month."

Bobby is wise and obedient. A few moments later mother heard him shouting in his high, sweet treble to his pal:

"Billy, do you know what you must say on the train when you go to Detroit? You must say when the man asks you: 'No, I'm not even going to be five until next month. I won't be six at all.'"—Indianapolis News.

Darwinian.

The war on bathing suits is well come if it means a survival of the best fitting.—Life.

The call of a katydid can be heard for a quarter of a mile.

The Man Who Said:
 "The proof of the pudding is in the eating"—
 was only half through

He started a good pudding-proof, but he didn't finish it.

There's a lot of trouble in the world from puddings that taste good but don't do good.

They "eat" well, but that ends the recommendation.

Sanitariums are full of pudding-eaters who stopped the test taste and forgot to inquire whether their food gave the body what it needed—until the body rebelled.

Grape-Nuts is a food that tastes good and does good. The proof of Grape-Nuts begins in the eating and goes on through the splendid service which Grape-Nuts renders as a real food. Grape-Nuts is the perfected goodness of wheat and malted barley—delicious to taste, easy to digest, and exceptionally rich in nourishment for body and brain.

"There's a Reason" for Grape-Nuts

Do You Look Forward To a Good Night's Rest?

Do you regularly anticipate a refreshing sleep? Or do you dread going to bed, only to stare, sleepless, at the walls? The difference between sleeping and staring is simply a matter of nerves.

When your nervous system is in a sound condition, you are certain to sleep well. But when your nerves are worn out and beyond your control, your rest is broken and your awakening leaves you languid and irritable.

Doctors know that much of the nerve disorders result from tea and coffee drinking. The drugs in these drinks over-stimulate, often causing the serious ills which result from disturbing the regular bodily functions. It is for your health's sake that many doctors now say you should quit tea and coffee. Drink Postum, the delicious meal-time beverage instead! In flavor it is much like coffee.

Postum is fundamentally a nerve strengthener because it lets you get sound, restful sleep. Postum is a skillfully-made cereal beverage, and the secret of its popularity is its protection to health and its delicious flavor.

Ask your grocer for Postum. Drink this hot, refreshing beverage in place of tea or coffee for 10 days and see what a wonderful difference it will make in the way you feel.

Postum comes in two forms: Instant Postum (in tins) made instantly in the cup by the addition of boiling water. Postum Cereal (in packages of larger bulk, for those who prefer to make the drink while the meal is being prepared) made by boiling for 20 minutes.

Postum for Health
 "There's a Reason"
