What's the use of lamenting that the Arbuckle pictures have been put onto the dead list. Aside from the Arbuckle party escapade, the public by this time wants something of more real value than the "Fatty" stuff. And yet we must admit his screen antics were popular.

**Mora Mystery in Town.**

Some time ago it was rumored that a woman in black was seen walking to and fro near the R. R. station, and last Sunday evening between the hours of 9 and 10 o'clock, a young lady in brown was seen walking waddlingly near the central part of the town. Very soon a Dodge car, with a winter top, approached, and the car stopped; the door was opened and the girl mounted. In a few seconds the car was out of sight. Where they went or what was their mission is a mystery that comes pretty near to a fact. The car was watched and in less than an hour it returned and deposited the feminine part of the cargo, and then went north to Church street and turned down the Brushvalley road. Some time ago this same scene was enacted, and several months ago a Ford car from Spring Mills was seen to do the same trick. The observer wasn't quick enough to catch the license number, but has a clue to the situation as the girl was easily recognized before boarding the car. Such things are not to the good of society or our town, happening at that hour of the night. A police or a night watchman might be a good thing in Centre Hall.

Mr. Stover was a man who was held in high esteem in the section of the county in which he lived. He followed threshing for a number of years and always enjoyed a large patronage. He also owned a stone crushing outfit.

**Annual Cattle Feeders' Day**

Steer feeding results to be discussed at the Annual Cattle Feeders' Day meeting, at State College, Thursday, May 4th, will be of unusual interest to the feeders of Centre county, says County Agent J. N. Robinson, who is planning to accompany a group of farmers to the college to attend this annual event, conducted by the Animal Husbandry Department. A varied and instructive program has been arranged including a discussion of the proper grading of feeder steers, the profitable type of feed lot steer, and lastly, an explanation of this year's experimental results which have an important bearing on present day problems of the cattle feeder.

All persons who expect to attend this meeting should meet at the stock judging pavilion at 9:30 sharp, standard time.

**Frosts and freezes.**

The latter part of last week the temperature was quite out of season, mercurial having dropped to twenty-three degrees above zero, nine degrees below the freezing point. The ground on Thursday, Friday and Saturday nights was frozen to the depth of an inch or more, depending upon the soil conditions.

Locally the small fruit was much damaged if not entirely destroyed by the frosts and freezes. The apple crop may not have been hurt, except, perhaps, the early varieties. It will require a few days of sunshine to determine to what extent injury was done to this particular fruit.

Frost occurred from the Atlantic coast westward to Indiana and Ohio and as far south as northern Virginia. Officials expressed the belief that generally little damage was done to fruit. Temperatures around the freezing point were reported from the whole northeastern quarter of the country, ranging as twenty-four degrees at Northfield, Vermont, and Binghamton, New York.

Belief was expressed by some officials that considerable damage was caused in orchards on high land. The weather bureau's reports showed temperatures of 26 at Scranton, 28 at Pittsburgh and 32 at Elkins and at Parkersburg, W. Va.

**CATARRHAL DEAFNESS**

is greatly relieved by constitutional treatment. HALL'S CATARRHAL MEDICINE is a constitutional remedy. Catarrhal Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed, Deafness is the result. Unless the inflammation can be reduced, your hearing may be destroyed forever. HALL'S CATARRHAL MEDICINE acts through the blood on the mucous surfaces of the system, thus reducing the inflammation and assisting Nature in restoring normal conditions. Circulars free.
