

THANKFUL FOR A LITTLE CHILD

Mrs. Mertz Tells How Lydia E. Pinkham's Vegetable Compound Helped Her

Kutztown, Pa.—"I wish every woman who wants children would try Lydia E. Pinkham's Vegetable Compound. It has done so much for me. My baby is almost a year old now and is the picture of health. She walked at eleven months and is trying to use her little tongue. She can say some words real nice. I am sending you her picture. I shall be thankful as long as I live that I found such a wonderful medicine for my troubles."—Mrs. CHARLES A. MERTZ, Kutztown, Pa.

Many cases of childlessness are curable. Perhaps yours may be. Why be discouraged until you have given Lydia E. Pinkham's Vegetable Compound a faithful trial?

Spoken and written recommendations from thousands of women who have found health and happiness from its use have come to us. We only tell you what they say and what they believe.

We believe that Lydia E. Pinkham's Vegetable Compound is so well adapted to the conditions which might cause your trouble that good will come to you by its use.

Merit is the foundation of Lydia E. Pinkham's Vegetable Compound. It has behind it a record of nearly fifty years.

SLOW DEATH

Aches, pains, nervousness, difficulty in urinating, often mean serious disorders. The world's standard remedy for kidney, liver, bladder and uric acid troubles—

GOLD MEDAL HARLEM OIL CAPSULES

bring quick relief and often ward off deadly diseases. Known as the national remedy of Holland for more than 200 years. All druggists, in three sizes. Look for the name Gold Medal on every box and accept no imitation

Let Cuticura Be Your Beauty Doctor

Some men spend half their time framing promises and the other half in making excuses.

ASPIRIN INTRODUCED BY "BAYER" IN 1900

Look for Name "Bayer" on the Tablets, Then You Need Never Worry.

If you want the true, world-famous Aspirin, as prescribed by physicians for over twenty-one years, you must ask for "Bayer Tablets of Aspirin."

The name "Bayer" is stamped on each tablet and appears on each package for your protection against imitations.—Advertisement.

Look forward to the joys of each day and equally to the vexations. Be prepared.

A rich man is often jolly—and has reason to be.

The easiest job on easy street has many requirements.

WHY THAT BAD BACK?

Does spring find you miserable with an aching back? Do you feel lame, stiff, tired, nervous and depressed? Isn't it time then, you found out why you are unable to enjoy these fine spring days? Likely your kidneys have weakened. Winter is hard on the kidneys. Colds and chills and a heavier diet with less exercise tax them heavily. It's little wonder spring finds you with backache, rheumatic pains, headaches, dizziness and bladder irregularities. But don't be discouraged. Use Doan's Kidney Pills. Doan's have helped thousands and should help you. Ask your neighbor!

A Virginia Case Mrs. L. B. Mays, 11 Ridgeway St., Clifton Forge, Va., says: "I was troubled with my kidneys. I had dull pains through my back and sides that at times killed me at night. My rest was broken on account of these pains and during the day I didn't feel like doing my work. Doan's Kidney Pills cured me of the attack."

Get Doan's at Any Store, 60c a Box DOAN'S KIDNEY PILLS FOSTER-MILBURN CO., BUFFALO, N. Y.

TO KILL RATS and MICE

STEARNS' ELECTRIC PASTE It forces those pests to run from the building for water and fresh air. Bats, mice, cockroaches, water-bugs and ants destroy food and property and are carriers of disease.

USE OF MILKING MACHINES GAINS

Increased Number Being Employed Makes Cleaning Methods of Much Importance.

HOT-WATER METHOD IS BEST

To Keep Mechanical Devices Sweet and Clean All Parts Should Be Scrubbed at Least Once Every Week.

(Prepared by the United States Department of Agriculture.) The increasing use of milking machines in the United States makes the method of cleaning and caring for them an important one. In studies of dairy sanitation the number of bacteria which survive various methods of cleaning and care enables investigators to determine the relative merits of various systems of cleaning machines.

In addition to laboratory observations, the United States Department of Agriculture has tried out methods of cleaning and sterilizing mechanical milkers on a number of farms.

On 13 farms where only ordinary care was given, the highest bacteria count was more than 2,000,000 per cubic centimeter, and the average was more than a quarter of a million. After the machines had been kept clean and sterilized by the hot-water method, the average of 261 samples showed less than 20,000 bacteria per cubic centimeter, and one sample showed only one thousand.

Of course, with careless methods, milk produced by hand milking may be badly contaminated; but the milking machine, being an additional piece of apparatus between the cow and the consumer, should receive special care.

Milking Machine in Operation.

Hot-Water Method Best. Sterilizing milking machines with a chlorine solution has been done on a good many farms, but the tests made by the department have shown that much better results come from the use of the hot-water method.

Just after milking, the machines are rinsed with cold or lukewarm water drawn through by vacuum, the steam being broken occasionally by pulling the teat cups out of the water and immersing them again.

This is done 10 or 12 times. The process is then repeated with hot soda solution, and the cups and tubing are washed with a brush at the same time. Then the parts are rinsed by drawing clean water through by vacuum.

After this cleaning, the long milk tubes with the teat cups attached are detached from the head of the pail, the air tubes (on inflation types of machines) plugged, and the whole immersed in a tank of clean water.

The water is then heated to 160 degrees or 170 degrees F. This may be done by setting the tank on a stove; by setting it up and building a fire under it; or by introducing steam from a boiler.

The effect of heating upon the rubber parts has not yet been fully determined, but so far the temperatures used have had little effect on the life of the rubber.

Clean Thoroughly Each Week. To keep the machines sweet and clean they must be taken entirely apart once a week and all the parts scrubbed with brushes and hot soda solution. The vacuum line should be cleaned every two weeks by drawing hot soda solution through it, but if milk is accidentally drawn into it the pipe should be cleaned immediately after milking.

Pails and covers need to be washed and sterilized with steam or boiling water after every milking. It is important that the development of mechanical milkers should not be handicapped by improper methods of cleaning them.

CUCUMBER DISORDER SPREAD BY INSECTS

Mosaic Disease Is Widespread in the United States.

Wild Cucumber Vine and Common Milkweed Are Principal Host Plants of Malady—Eradication Is Strongly Urged.

Mosaic Disease of Cucumber.

Prepared by the United States Department of Agriculture.) The wild cucumber vine and the common milkweed, as shown by investigations by the United States Department of Agriculture, are the principal wild host plants of the cucumber mosaic, or "white pickle" disease. This disease is widespread in the United States, but is most general and serious in the Middle West, where the major portion of the pickle-growing industry is located.

CORN FOR SILAGE PURPOSES

Early Planting of Well-Matured Seed of Large Variety Is Often Most Profitable.

In the north an early planting of well-matured seed of a large variety of corn is often most profitable when the crop is intended for silage purposes. Of course, if a grain crop is desired, the corn variety must be chosen that has the best chance of maturing a good yield of grain.

BIG DANGER IN USING LIME

When All Acidity of Soil Has Been Used Up There Is Trouble in Raising Some Crops.

A test was made covering 15 years of growing truck crops with manure, at the rate of ten loads to the acre, and with other fertilizers. The fertilized plots yielded good crops for a few years and then failed.

BIG VALUE OF ALFALFA

Alfalfa pasture is worth \$25 to \$35 per acre when it will feed 20 pigs per acre that will gain 200 pounds each during the season.

HOME TOWN HELPS

WOULD DIVIDE UP INDUSTRY

Prominent Manufacturer Believes Congestion in Large Cities Is in Nature of an Evil.

Have the great industrial centers of the United States reached their maximum growth? A leading manufacturer believes that they have, and that the time has come to break up the congestion of workers in large cities, and to get back to the small communities with industry.

His theory is that the massing of industrial workers in a large city is bad for the country, and that anything which is bad for the country is in the long run bad for industry. He announces that he has demonstrated to his own satisfaction that industries can be taken to the people who live close to the soil, and that he expects to expand his own industrial activities along this line.

KEEP TOWN LOOKING RIGHT

Appearance Is Inseparably Connected With Business Success and Prosperity of Community.

The physical appearance of a town has much to do with its business success and progress. People are not attracted to a disorderly town. It looks like the kind of a place where inefficiency is the rule.

Visitors have the feeling that that spirit would prevail in the stores in their dealing with the public. But a town whose business and home buildings are kept in good repair and well painted, looks like a winner.

What Zoning Does.

Some of the things that zoning laws do for a city are summarized by Charles B. Ball: Zoning substitutes method for chance, symmetry for confusion, progression for patch work, and order for chaos in city development.

Zoning affords for the poor man such security from nuisances and invasion as the rich may provide at great expense.

Zoning is a flexible harness in which city expansion works; it may be adjusted in case it galls or frets at any point.

Zoning will flatten out the human pyramid which congestion has created in a crowded portion of the city.

Zoning sells a town. An unzoned town is like a dead stock of goods on the shelves.

Restorer of Cemeteries. Miss Marion Eaton of Old Sudbury, Mass., has succeeded in an unusual field for a college woman, that of restoring old graveyards.

To city people graveyards do not mean much," stated Miss Eaton, "but to the countryman—it holds his loved ones. It is where he goes for his Sunday afternoon stroll, or his after-church smoke, and it should be beautiful. That is what I mean to make it."

Building Up a City. Build the bungalows, boys, and fill the back yards with chickens and the front yards with flowers and children. The skyscrapers will take care of themselves.—Houston Post.

Carlyle's Estimate of Painting. It was only by the expenditure of much tact and trouble that Lord Houghton induced Carlyle to give sittings for the fine portrait by Millais which is now in the National portrait gallery.

CROPS AND PROFIT

PROBLEMS JUST NOW PRESSING ON AGRICULTURISTS

Farmer on Low-Priced, Fertile Lands, Still to Be Had, Is in Best Possible Position.

The economic problems connected with the advantageous marketing of farm crops and the financing of the movement of those crops are pressing upon agriculture most severely. They will be solved, however, and while that solution is being worked out it is simply good sense on the farmer's part to make his efforts toward production tell to the very maximum, as best carrying him through the period of depression and hard times and placing him in the best position to take the greatest possible advantage of the better times to come.

We may repeat that the cheapest farm crop, whether from fields or from live stock, is almost invariably the largest crop which can be obtained. Or in other words, the greater the crop, the greater the net profit.

To attain such crops and to place himself in the advantageous position referred to above, the farmer must study, and must apply the results of his study to such problems as soil fertility, its conservation and increase; soil moisture, its control; cultural methods, suitable and productive varieties, etc., etc.

The question is how can you best accomplish and secure these things? Can they be done on high-priced lands, by paying high rents, with the prices you get for your produce no greater than may be had from that grown and raised on much cheaper lands, whose production is fully as great as that of the high-priced lands? The answer is unquestionably in favor of the low-priced lands, when they are selected because of their soil fertility and the other requirements necessary. It is not the purpose here to point out merely that the lands of Western Canada would prove a splendid and ready solution, but to emphasize the fact that in order to overcome your present difficulty, to remove some of the burden that you are laboring under, you must secure some line of cheaper operation, whether it be removal to other parts in your own country where such opportunity may offer, or take advantage of that which Western Canada affords.

For information regarding these advantages apply to any Canadian government agent.—Advertisement.

As the bride and what she married leave the church trouble gets busy and follows them home.

ATLAS PORTLAND CEMENT

The man who builds a home hopes his children's children will enjoy it. The man who remodels his old home intends a permanent improvement.

Stucco, properly made of Atlas White Portland Cement, is as permanent as concrete because it is concrete. Such stucco gives a wide variety of attractive finishes to suit the particular type of home.

Your building material dealer can show you samples of these finishes, and can obtain Atlas White for you even in small quantities. Ask him about your plans—for permanent construction he will advise Atlas Portland Cement, "the Standard by which all other makes are measured."
