LETTERS FROM SUBSCRIBERS.

W. H. Potter Tells of Big Oil Steal in Wyoming.

W. H. Potter, son of J. T. Potter, of Centre Hall, is the manager of the Big Horn County Oil Company, at Manderson, Wyoming. Read his interesting letter to the Reporter of a big transaction of questionable character which had the official sanction of the present administration:

Manderson, Wyoming, June 13, 1922
Editor Reporter:

After reading your article, "When Harding Wishes He Were Not President," you could add another good reason. You, in the East, may not know much, if anything, about this. Wyoming has the richest oil fields in the United States in the Salt Creek Field. The Government had an oil structure there called "Teapot Dome," reserved for future navy needs. The present Administration leased this rich oil deposit to the Sinclair or Mammoth Oil Co. of N. J. Sinclair is the head of the Mammoth, which is part of the Standard Oil Co. This lease was made without asking for bids from independent oil companies. The Denver Post, independent in politics, calls it a "\$100,000,000 Steal." Senator Kendrick of Wyoming and LaFollette of Wisconsin, fought it, but no use. Everything is signed and Mr. Harding o. k.'d the deal.

Many Republicans of this state have told me they could not vote for a continuance of such tactics. In fact, this state sure is riled up over the deal.

We did not get oil in the well we drilled, but lots of water. Oil in Wyoming is found in structures or domes. The nearer the top, the more chance to get oil. We are quite a way down one side. Now the directors of our company are debating whether to sell out or employ a geologist and put down a deep hole to a sand below where we stopped. This will mean an expense of approximately \$50,000 more. Our company is a private stock company—not an advertising stock selling company.

With best wishes, I am,
Yours truly,
W. H. POTTER.

P. S.—Would write more but it is too hot—102 degrees in the shade!
