STATES HELPING TO ELIMINATE MENACE OF RAILWAY CROSSINGS

(Prepared by the United States Department of Agriculture.)

What can be done when a community sets out to rid itself of the menace of railroad grade crossings is shown by the plans for a federal-aid road to be constructed in Alabama between Arlton and Clayton. In a distance of about 25 miles the old road crossed the railroad 14 times. By good engineering 13 of these crossings have been eliminated, the remaining one being in the small town of Clio, where there are only three trains a day, and these move at slow speed as they approach the station.

Some months ago the bureau of public roads of the United States Department of Agriculture announced that grade crossings would be eliminated on all federal-aid highways wherever practicable. Officials of the bureau are receiving hearty co-operation from state highway departments and the general approval of the public.

It has been found possible to revise many plans, keeping the road entirely on one side of the track or finding a suitable place where the road can cross beneath or above the track.

In some states the highway departments on account of existing legislation are having difficulty in inducing the railroad companies to share the cost of placing the highway above or under the track.

GET IN AND OUT OF AUTOMOBILE

Many People Do Not Seem to Realize What a Moment's Forethought Will Do.

PROPOSITION QUITE SIMPLE

Doors Were Made to Enter and Leave Through and Not Bear Weight of Person—Hinges Are Made Comparatively Frail.

Getting in or out of an automobile is an awkward job for most people. They do not seem to realize that with but a moment's forethought that it can be made a very simple proposition, says Washington Post. To begin with

Getting into a Motor Car.

the average person when about to get into a machine proceeds to put the right hand, if entering from the curb side, well out on the door and to bear upon this hand and arm. Doors were made to enter and leave through, not to carry the weight of a person. They are supported to the side of the body by comparatively frail hinges secured to an upright post that forms one of the body supports. Once a door is sprung it is well-nigh impossible to repair it so that it will again assume its normal position as part of the body, fit snug and not rattle. The reason is because not only is the door itself sprung out of shape, but the body post

otherwise has been sprung and it is impossible to remedy this without rebuilding body posts and sills.

Getting into an Auto.

As illustrated in the first drawing the matter of getting into a motor car

is simple enough if one will but put the right foot on the running board, grasping the body of the car, one hand on each side of the door, and

as the weight is put upon the right foot exert a slight forward pulling motion with the hands and arms, at the same time lifting the left leg clear of the running board and placing it on the floor of the car as illustrated in the second drawing. With the body in this position as the right foot is drawn into the car the body can easily and naturally be turned using the left foot as a pivot and a sitting position on the seat of the car taken without awkwardness or inconvenience and likewise without bumping one's head against the top of the machine.

Getting Out.

In getting out of a machine if one will but grasp the side of the body with the right hand, at the same time placing the right foot on the running board, as shown in the third illustration,

Exit From Car Completed.

their body is in such a position that it is but a simple matter when the weight is put on the right foot, the head extended beyond the line of the top, to reach over and grasp the other side of the door opening with the left hand, at the same time putting the weight of the body on the right foot and two hands and arms, bringing the left foot out of the car and to the curb, as shown in the fourth drawing.

Disengaged Clutch.

The clutch is disengaged before each shifting of transmission gears to allow easy movement of gears and shifting lever and prevent grating and possible breaking of gear teeth while the shift is attempted. It is possible to change gears without first disengaging the clutch, but considerable practice and familiarity with them is necessary, and danger of stripping the teeth and strain on the entire driving system is greatly increased.

MRS. ABBEY PROUD OF HER BIG GAIN

Weight Increased 39 Pounds and Nine Years' Trouble Ended.

"I hardly see how I endured such awful suffering, and if it hadn't been for Tanlac I don't believe I would be here today," said Mrs. Mollie Abbey, of Jennings Lodge, Ore.

"For nine years everything I ate caused gas to form so that it almost drove me distracted. I didn't dare eat any fruit and for four years if I even drank a glass of cold water I would suffer dreadfully. No one who didn't see me can imagine the awful condition I was in.

"But Tanlac changed all this and now I'm simply feeling fine. My appetite is splendid. I eat anything I want, have actually gained thirty-nine pounds and have so much strength and energy I easily do all my housework. Tanlac is a wonderful medicine."

Tanlac is sold by all good druggists.—Advertisement.

Depends on the Result.

"Don't you admire determination in a man's character?"

"That depends. If it brings success I praise it as a splendid perseverance, if failure, I denounce it as confounded obstinacy."

USEFUL for all the little ailments—bumps, bruises, sores, sunburn and chafing. Keep a bottle in the house. It's safe and pure. It costs very little.

AS BOBBY HAD IT FIGURED

Quite Satisfied That Auntie's Appearance Must Have Undergone Considerable Change.

I am rather proud of my looks and always take pains to appear my best for company.

One morning I was just finishing the sweeping when my brother and his family, whom I had not seen for a couple of years, drove in the yard. With them were a couple of well-dressed women, and I was naturally embarrassed to have them find me with hair disheveled and dust streaked face. However, I welcomed them graciously and we sat down to talk.

I noticed that Bobby, my small nephew, was studying me intently, and during a lull in the conversation he said: "Auntie, you must have been good looking when you were young."

"Yes," I beamed, with my pleasant, est smile, scenting a compliment, "what makes you think so, dear?"

"Because," answered Bobby, "uncle would never marry you the way you look now."—Chicago Tribune.

Childish Wisdom.

"Mary, if you misbehave like that you will make your mother angry at you."

Powerful.

"Old Rip Ridges, that's been walerin' in his sins for forty years, was converted at the revival last night," said Gap Johnson of Rumpus Ridge, Ark. "That there evangelist is a powerful preacher."

"He shore is!" returned an acquaintance. "I live half a mile away, and right when he got to the top of his hollerin' at Satin last night, b'dogged if the clock at my house didn't stop!"

SAFE PLACE FOR VALUABLES

Harassed Citizens of American Cities Should Welcome Idea That Comes From Buenos Aires.

In these days of lawlessness, when the honest citizen cannot take a walk around the block with any certainty that he will not be held up by a bandit, the novel idea of Antonio Monaco, a citizen of Buenos Aires, ought to be of value.

He suggests suspenders with pockets attached to them—two pockets, that is to say, each of them being fastened with a buckle to the loop of the "gallus" at the front. The lower end of each pocket has two button-holes, which button onto the ordinary buttons of the waistband of the trousers, thus making the pocket flatly secure against the body of the wearer. To prevent escape of its contents, each pocket is provided with a buttoned flap.

Few bandits would think of looking for loot beneath a man's waistcoat, and so the suspender pocket should afford excellent hiding places for money. Against pickpockets they ought to furnish a perfect protection.

STORK MADE LONG JOURNEY

Bird Flew From Africa to Germany With a Message From Exile to the Fatherland.

The population of Liskau, Germany, noticed one day recently that one of the many storks which annually return to the neighborhood from distant southern zones to rebuild their nests was carrying something about its neck which only human hands could have fastened there.

Repeated efforts to approach the bird had failed, but one of the villagers finally lured the stork into his barn and then and there learned that the bird carried a little leather case in which a note was inclosed. The note revealed that the stork had come all the way from East Africa, where a German colonist, Willi Bucha, has his little farm near Victoria lake.

Bucha must have anticipated that the bird spent his annual vacation in his beloved fatherland, so he wrote: "Just a greeting to the fatherland," and used the stork to convey his message.

A TRUE RAT STORY

Auburntown, Tenn., June 22, 1912.

Stearns Electric Paste Co.,
 Chicago, Ill.

Dear Sirs:

Mr. Robert T. Donnell of Auburntown, Tenn., came in our store the other day and wanted something to kill rats, so I sold him a box Stearns Rat Paste. And he put some paste on six biscuits that night and the next morning he found fifty-four big rats. And the second night he put out four more biscuits with paste on them, and the second morning he found seventeen more rats, making a total of seventy-one rats in two nights, and there were lots more that he did not find.

This is some big rat tale, but, nevertheless, it is so. Just thought you would like to let you know that your rat paste is good.

Respectfully yours,
 KENNEDY BROTHERS.

Western Canada Land of Prosperity

offers to home seekers opportunities that cannot be secured elsewhere. The thousands of farmers from the United States who have accepted Canada's generous offer to settle on FREE homesteads or buy farm land in her provinces have been well repaid by bountiful crops. There is still available on easy terms

Fertile Land at \$15 to \$30 an Acre

—land similar to that which through many years has yielded from 20 to 45 bushels of wheat to the acre—oats, barley and flax also in great abundance, while raising horses, cattle, sheep and hogs is equally profitable. Hundreds of farmers in Western Canada have raised crops in a single season worth more than the whole cost of their land. With such success comes prosperity, independence, good homes and all the comforts and conveniences which make life worth living.
