FIGHT AGAINST CATTLE PLAGUE

No Idle Dream of Overoptimistic Veterinarians, but a Practical Possibility.

EXAMPLE STIMULATES OTHERS

Work Directed Toward Eradication of Tuberculosis Now Being Carried On in 28 States—Nebraska Making Strides.

(Prepared by the United States Department of Agriculture.)

Since the area plan of tuberculosis eradication has gained headway, the end of the fight against the great cattle plague seems to be no idle dream at overoptimistic veterinarians, but a practical possibility.

Oregon in Lead. A dozen states, according to records kept by the United States Department of Agriculture, now have one or more counties in which all of the cattle have been tested one or more times.

One hundred and twenty-eight counties in 22 states are now doing intensified work directed toward the eradication of tuberculosis. Some of these states are going at the problem

CONSERVE MANURE BY SPREADING ON FIELD

Not Generally Understood That It Saves Nitrogen.

Certain Forms of Bacterial Life Find Conditions in Usual Manure Pile Favorable to Development—Heating Also Occurs.

It is not generally understood just why spreading manure in the open field checks the loss of nitrogen which commonly takes place through the formation of ammonia in barnyard waste.

The Right Way to Care for Manure Produced on the Farm—Conserve the Plant Food Which It Contains to Increase the Fertility of the Soil.

find in the usual manure pile conditions favorable for their development. Through their operations organic matter is broken down into simpler chemical forms, one of which is ammonia.

When manure is spread evenly in the open field not only are the conditions which make for the activity of the bacteria overcome, but new factors tending to check their continued operation are introduced.

MANURE WILL HELP PASTURE

Top Dressing Often Will Bring About Improvement Where Grasses Are Undeveloped.

When pasture begins to fail it may often be improved without ploughing by topdressing the land liberally with barnyard manure or acid phosphate with lime.

Where there is a decided dearth of good grasses, liberal applications of manure may be combined with plowing and reseeded. Where it is necessary to plow as well as topdress with a manure and fertilizer, it is a good idea to grow a crop of potatoes or oats or perhaps buckwheat.

FALL PLOWING FOR INSECTS

Multitude of Pests May Be Killed After They Have Gone Down and Prepared Winter Homes.

There are a multitude of field insects that may be killed by fall plowing if it is done after they have gone down and prepared their winter home, which they do before frost.

SHIPPING SWINE IN SUMMER

Fat Hogs Are Liable to Suffer More or Less En Route to Market During Hot Weather.

Hogs, if fat, are likely to suffer when shipped to market during hot weather. It requires considerable care to ship during the summer, but it can be done if the owner uses good judgment and is able to secure service from the transportation company's officials.

NERVOUS AND HALF-SICK WOMEN

These Letters Recommending Lydia E. Pinkham's Vegetable Compound Will Interest You

For Your Own Good Please Read Them

Youngstown, Ohio.—"Last fall I began to feel mean and my back hurt me and I could hardly do my little bit of housework. I was played out when I would just sweep one room and would have to rest. I would have to put a cushion behind me when I would sit down and at night I could not sleep unless I had something under my back. I had awful cramps every month and was just nearly all in. Finally my husband said to me one day, 'Why don't you try Lydia E. Pinkham's medicine?' and I said, 'I am willing to take anything if I could get well again.' So I took one bottle and a second one and felt better and the neighbors asked me what I was doing and said, 'Surely it must be doing you good all right.' I have just finished my eighth bottle and I cannot express to you how I feel, the way I would like to. If you can use this letter you are welcome to it and if any woman does not believe what I have written to be true, she can write to me and I will describe my condition to her as I have to you."—Mrs. ELSA HEALD, 141 S. Jackson St., Youngstown, Ohio.

would often sit down and cry, and was always blue and had no ambition. I was this way for over a year and had allowed myself to get into quite a serious condition. One day I saw your advertisement in the daily paper and began to take Lydia E. Pinkham's Vegetable Compound at once. I have improved ever since taking the third bottle and find it is the best medicine I have ever taken."

Benefited by First Bottle

"I was completely run down and not able to do my housework. I just dragged myself around and did not have energy to get up when once I sat down. I read advertisements of Lydia E. Pinkham's Vegetable Compound in our paper 'The Indiana Daily Times,' and learned all about it. I received results from the very first bottle and now I am doing all my own work, even washing and ironing, and I never felt better in my life. I tell all my friends it is due to you."—Mrs. ELIZABETH REINHOLD, 403 N. Pine St., Indianapolis, Indiana.

You should pay heed to the experiences of these women. They know how they felt before taking the Vegetable Compound, and afterwards, too. Their words are true.

AT LEAST GUILTY OF LYING

Truly Clergyman Had Refrained From Blasphemy, but He Had Sinned in Another Direction.

A clergyman who years ago settled in Massachusetts once reproved a workman for swearing while he was plowing a new field.

"Swear!" said the man. "I guess you'd swear!" Whereupon the preacher took the plow and hurried after it, indignantly denying the charge.

"I never saw the like! I never saw the like!" When he had gone once round the field he stopped, breathless, and added:

"There, you see I didn't find it necessary to swear."

"No," said the other, "but you've told more'n 50 lies. You said you never did see the like, and you saw it all the time I was plowin'."

"I'm sorry to see you are deaf!" bawled the sympathetic gentleman in a hotel lobby.

"I'm not deaf," replied the old gentleman who had an ear trumpet in his hand.

"Then why do you carry that thing around?" "There's a convention of uplifters going on here. Whenever one of the glad-eyed delegates corners me and starts to talking about the 'cause' I hoist this horn and he backs off."—Birmingham Age-Herald.

W. S. Inglis, the well-known coal operator, told a railroad story at a railroad men's banquet in Scranton.

"There used to be a little line," he said, "a branch line about 12 miles long, that was notorious for its bumps, general discomfort and dirt."

"A train on this line pulled into town one morning, late half an hour, as usual, and a man said as he rose and brushed himself off:

"Well, thank goodness, the worst part of my journey is over."

"Goin' far?" said another man.

"Hong Kong, China," said the first chap.

COULD DO WITHOUT UNIFORM. Youthful Fijian Proved Anew That Necessity is the Fertile Mother of Invention.

A traveler from Fiji in the old days reports that at times in the past when the game was first introduced there the Fijians used to get waves of cricket madness, and in some outlying villages—where it was not so readily quelled by law—a match would be kept up for weeks, on end. Incidentally, they wore their pads strapped on their naked, bootless legs with a very ludicrous effect. But evidently the Fijians have no sense of the ludicrous, for our traveler further reports: "Another distinguishing mark that rather amused me once upon country was when my house boy, Esan, came in one day with his hair cut away from one side of his head, looking like a somewhat weird 'parting' for the remainder stood up as usual like a bass broom with bristles five inches long. I asked him what on earth he had been doing and he replied: 'Sir, I am now a member of the Lomoloma "A" team, and we have agreed to cut our hair like this, as the score cannot get 11 slashes all the same color.'"—London Tit-Bits.
