We are authorized to announce that L. L. SMITH, of Centre Hall Borough, will be a candidate for Treasurer of Centre county, subject to the decision of the Democratic voters as expressed at the primaries to be held on Tuesday, September 18th, 1923.

Every farmer should realize that to a large degree he raises his own insect pests by permitting them to develop on his farm to attack the wheat, corn and crops.

Farmers Heaviest Losers Under Republican Rule.

Farm products in 1922 were worth \$14,310,200,000, compared with \$23,783,000,000 in 1919, according to figures just issued by the Department of Agriculture. With the exception of 1921, this is the lowest value placed on American farm products since 1916.

Farmers will receive somewhat higher prices or their crops in 1923, it is predicted by the Department of Agriculture, but they will not have made any more money, since the commodities which they have to buy—food, clothing, lumber, hardware, machinery, tools, furniture, etc.—are increasing in cost faster than the value of their crops is growing.

During the two years of the Republican administration, beginning in March, 1921, the farmer has had to buy what he needed in a dear market and sell his products in a cheap market. He was the only producer who had no power to advance his prices far enough to cover his costs. In consequence of his helplessness in this respect the farmer bore the brunt of deflation. Everything on his land was deflated except his taxes and his indebtedness.

The first complete year of the first Wilson administration was that ended June 30, 1914. In that year farm products were worth \$9,895,000,000, which was about the value they had during each of the previous five years. In 1915 the value of farm products was \$10,775,000,000; in 1916, \$13,406,000,000; in 1917, \$19,331,000,000; in 1918, \$22,480,000,000, and in 1919—the last complete year of the second Wilson administration—\$23,783,000,000.

Standard Oil Co. Hogging It.

Philipsburg Journal.

Why are we paying a profiteering price for gasoline—or near gasoline—that reeks with kerosene oil? Possibly that question has been answered by a senatorial committee that has been making an exhaustive investigation of the question. That committee has made its report, and the report justifies many in the belief that the Standard Oil company absolutely dominates the oil industry of the United States. It is time for another shakeup, if an official shaker can be found who is not for sale.
