SCORE ONE FOR PERFORMER WHEN NOBILITY BREWED BEER

Small Boy Must Have Retired From That Particular Encounter in Some Confusion.

At a point during the course of an address before members of the Caravan club the other day, Representative William D. Upshaw of Georgia had occasion to be "reminded" of a certain vaudeville performer whose imitation of dogs comprised the chief feature of his act.

"On his way to the theater in the small town where he was appearing," said the congressman, "the actor was accosted by a youth who wanted to know if he wasn't the man down to the Palace theater who barked like a dog."

"Yes," replied the imitator, rather complimented on being recognized.

"Gee," laughed the boy, "I got ya beat when it comes to makin' noises like a dog."

"That may be true," snapped back the performer, "but, then, you must remember I had to learn it."—Exchange.

**Magnetic Indicator Used.**  
It is a well-known fact, referred to in Popular Mechanics Magazine, that drill steel, in order to be tempered for the greatest possible toughness and resistance to wear, should be quenched at the lowest possible temperature above the critical point, which is the point at which the structure of the steel changes. This point coincides with that at which the steel loses its magnetism, and advantage has been taken of this coincidence in the production of a magnetic indicator to assist the blacksmith in quenching his steel at the proper point.

**Not Entirely Artificial.**  
"I was deceived in you," complained the husband. "Your teeth are hand-made, your complexion is artificial and your hair is another's. You are wholly false."

"No, not wholly," she replied. "I have a mind of my own, as you very well know."

And he was forced to admit the bitter truth of her statement.—Boston Evening Transcript.

**Thought for the Day.**  
The average son takes the advice of his father just like the father took advice from his father.

At times you get just what you want, and at other times a good salesman waits on you.

English "Upper Classes" Proved Not to Have Been Dependent on Commercial Product.

Relics of "ye olden days" show that beer was brewed on their own estates by the nobility in very ancient days. On the site at present occupied by Hay Hill once stood a farmhouse belonging to the Berkley estate, which comprised the land upon which Devonshire house stands. Recent clearing away of debris in the fine old gardens has brought to light the old vaults belonging to the original farmhouse, which dated back from the late Tudor period. When Berkley street was cut through in 1600 the old farmhouse was pulled down, but only to the street level, so that the original vaults have been found preserved below the street. The brewing house has been cleared of debris. Brickwork believed to go back beyond 1600 has been found, and it is believed that the two mash tubs bearing the lettering "D.D." now on view in the vaults of Devonshire house, were brought from the original brewery.—London Mail.

**A Past Time.**  
Charles Klauder, the well-known architect, said at a dinner in Philadelphia:

"American architecture stands today as high as any in the world, but there was a time when we were almost proud of our terrible jerry-builders."

"An American, gazing at the stupendous and lacelike masses of the Spanish cathedral of Toledo, said to his guide:

"How long did it take to run up this affair?"

"Five hundred years, senor," the guide answered.

"The American gave a contemptuous laugh.

"Five hundred years? Holy smoke!" he said. "Why over in God's own country we could build a structure like that and have it fall to pieces on our hands, all inside of two or three years."

**Economy.**  
Let us learn the meaning of economy. Economy is a high human office—a sacrament when its aim is grand, when it is the prudence of simple tastes, when it is practiced for freedom, or love, or devotion.—Emerson.

**Passing Through the Panama Canal.**  
It takes a ship about ten hours to make the trip through the Panama canal.

### What to Eat and Why

A Natural Supply of Vitamin

The word "Vitamin" is new, but the thing itself is as old as the human race. It is the energizing, vitalizing, growth-producing element in the right food. Its absence is a serious fault of the wrong food. When the food is right, there is no need to go to the drug store for Vitamin.

Grape-Nuts, the famous ready-to-eat cereal, supplies the natural Vitamin from the wheat, and a further supply is included in the cream or milk with which Grape-Nuts is eaten.

Grape-Nuts is delightfully crisp and appetizing, with a flavor which happily suggests the wholesome, health-building goodness which the food contains. Phosphorus and iron, as well as Vitamin, with a

bran content to stimulate intestinal action, are supplied by Grape-Nuts. Many of our modern, "refined" foods lack these vitally necessary elements.

Grape-Nuts digests easily and is assimilated quickly, and is splendidly nourishing and energizing. You'll find better health and fitness in the natural way, with Grape-Nuts as a regular part of your diet.

There's genuine economy in Grape-Nuts—many servings of this exceptionally nourishing food to the package. At your grocer's—ready to serve. Grape-Nuts—the Body Builder. "There's a Reason." Made by Postum Cereal Co., Inc., Battle Creek, Michigan.

## GROW TWO CROPS IN ONE SEASON

Those Who Oppose Idea Should Remember That Weeds Thrive on Unoccupied Land

### PLANT BETWEEN POTATO ROWS

Late Cabbage is Good for Kraut and Furnishes Dairy Cows Green Feed —Tomatoes Also Are Satisfactory Late Crops.

While some farmers do not approve of growing two crops on the soil in one season, we have practiced doing it with the most satisfactory results.

Those who claim that double crops are too much of a drain on the land should remember how every field grows up in weeds just as soon as the first crop of the season is removed or stops growing, says a writer in an exchange.

This is especially true of the potato patch and why should we not sow or plant it to something profitable rather than allow the worthless, unsightly troublesome weeds to seed the patch to weed pests for another season?

If one sees that the soil is falling in fertility the cost of applying a light dressing of rich barnyard manure will still leave a handsome margin of profit from the value of the second crop secured.

**Profit With Potatoes.**  
Perhaps the most profitable manner in which the potato patch can be handled is to dig the potatoes just as soon as they are suitable for marketing.

At this season they are invariably high-priced and the land may then be put to whatever use it is desired without damaging the potatoes by cultivation and hoeing. Then, too, one can stir the ground more thoroughly than if the planting were done between the rows of growing potatoes.

Using a Hand-Cultivator Between the Rows.

Using a Hand-Cultivator Between the Rows.

Almost any garden or field plant will make a fair crop in the potato patch after it is laid by. Sweet corn, ninety-day field corn and pop corn are favorite second crops.

Late cabbage will usually make a good second crop for kraut and storage purposes or at least will furnish a lot of green feed for the dairy cows and poultry after the summer greenness is gone.

**Nice Crops in Patch.**  
Late tomatoes also are reasonably sure of making a satisfactory crop between the potato rows. Cane, kafir corn and millet will make nice crops in the patch after the potatoes are laid by and these may either be mowed or stacked for winter roughage or utilized as late fall pasturage for small stock that would not trample the ground down too much.

Rape and turnips are also favorite crops to be sown in the summer and they will make excellent pasturage for the lambs and shoats that are ringed so they will not root up the potatoes.

Of course it is impossible to harrow in any of the above-named seeds, as that would tear up the vines so we aim to do the last cultivating just before a rain, letting the rain drops beat the seed into the soil.

Where this is not to be done we sow the seeds while the dirt is still damp after the last plowing.

### CARE REQUIRED FOR CHICKS

Where Confined Young Fowls Must Be Given Greens and Animal Feeds, Also Exercise.

Confined quarters increase the amount of work required to raise chicks. If attempted, the care differs from that of range chicks. In that greens and animal foods must be provided, also exercise. If too closely confined, it is almost impossible to grow chicks at a profit, even with the most constant and faithful care.

### USE FOR SURPLUS SKIM MILK

Dairyman or Farmer Who Doesn't Own Flock of Chickens to Utilize By-Product Is Lacking.

The dairyman or farmer who doesn't have enough chicks to handle his surplus of skim milk, knowing its great value for chickens, should either build up a sideline flock of his own to utilize this valuable by-product profitably, or else market it among the farmers and poultry raisers in his community.

## KENTUCKY ACTIVE IN WAR ON SCRUB SIRES

Wayne County Farmers Careful of Breeding Stock.

Twenty-Two Purebred Beef Bulls Placed on Farms During Last Fiscal Year—Grade Animals Were Formerly Used.

(Prepared by the United States Department of Agriculture.)

Reports received by the United States Department of Agriculture from Wayland Rhoads, field agent in animal husbandry for the University of Kentucky, shows effective work in live stock improvement. Following are representative results: In Wayne county 22 purebred beef bulls were placed on farms during the last fiscal year. These animals were either shipped in or purchased at purebred sire sales. Wayne county is a mountainous region, and, although the live stock industry is not highly developed, farmers are giving a great deal of attention to the quality of their stock.

The average weight of baby heifers at a recent show was 1,275 pounds.

The Large Animal is an Aberdeen-Angus Steer 1 Year Old; the Small One is a Piney-Woods Steer 3 1/2 Years Old—Better Breeding is One of the Principal Methods of Overcoming Runtiness in Live Stock.

Prize money for the show amounted to \$1,700, which will be increased next year to \$3,000.

A cattleman in Crittendon county, Kentucky, reports that he has been offered three cents a pound more for his feeder calves since he used purebred sires. Formerly his bulls were grades, but having used purebreds he expresses his intention never to return to grade sires.

As typical of the determination of Kentucky communities to improve their live stock, following is one day's work of County Agent John R. Spencer and M. Wayland Rhoads of the State university, who was with him that day: Three farmers visited disposed of scrub bulls and ordered good purebreds; four farmers disposed of scrub rams. 21 signed enrollment blanks in the "Better Sires-Better Stock" movement, pledging themselves to use purebred sires only; a farmer placed an order for a purebred dairy bull from a register-of-merit cow; and the same day a full program of work for further live stock improvement was drawn up with the farm bureau executive committee. The foregoing statements are believed to be of educational interest since nine years ago more than 90 per cent of the bulls in the county were scrubs.

### DON'T POISON INNOCENT BEE

Many of the Little Honey Gatherers Are Destroyed by Spraying at Wrong Time.

Why poison the innocent bee by spraying your fruit trees in full bloom, when it is absolutely unnecessary?

"The only way to save and protect our bees," says R. E. Vaughan, plant disease expert at the Wisconsin College of Agriculture, "is to conduct a spray at the right time." He is heartily in favor of the resolution No. 1, passed by the forty-fourth annual convention of the Wisconsin State Bee Keepers' association.

"We don't stop to think of the damage we do to the bees in the neighborhood every time we spray our trees when in full bloom," says Mr. Vaughan. "It does no good to spray trees when in full bloom."

R. H. Roberts of the horticultural department of the University of Wisconsin and a fruit specialist, also is in favor of the resolution. He says we must realize the importance of bee-keeping, and arrange our work so that we can do our spraying at the proper time.

### CURE HAY FROM ANNUAL CROP

Considerable Bother Experienced With Soy Beans and Millet Because No Sod Formed.

It is always considerable bother to cure hay from an annual crop like soy beans or millet, because no sod is formed as is the case with clover. Clover is more cheaply grown because it is sown with a grain crop. For soy beans the land must be plowed, prepared and seeded.

### SPREAD MANURE ON FIELDS

To Increase Value and Bulk of Fertilizer It Should Be Hauled Out at Once.

Get the manure out as fast as it is made if it is possible to do so. You can generally find mornings when the ground is frozen in which to do this, and a few hours' work turns the trick. Bed well and thus increase the bulk of manure made.

### An Up-to-Date Young Feller.

Two high-school girls, short-skirted, hob-nailed, bright-eyed and talkative, sat in a downtown motion picture theater while on the screen before them a story of love was unfolded. The central figure was a man whose chief distinction, outside his motion picture success, is that of a certain brand of trousers which once were named for him.

One girl sighed. She turned to her companion and whispered: "Oh, Nell, wouldn't you just love to hate a man like that?"—Indianapolis News.

### CATARRH

Catarrh is a Local disease greatly influenced by Constitutional conditions. HALL'S CATARRH MEDICINE consists of an Ointment which gives Quick Relief by local application, and the Internal Medicine, a Tonic, which acts through the Blood on the Mucous Surfaces and assists in ridding your System of Catarrh.

## Find What CANADA has to offer YOU!

If your dream of success seems like a hopeless ambition, if you are discouraged trying to get ahead on high priced land, if your present location fails to give you opportunity, there is a new deal for you, a new chance in the fertile, virgin farms of Western Canada, where wheat produces 20 to 40 bushels to the acre, where the 1922 crop was biggest in history, where oats, barley and hay and fodder crops are the basis of a great dairy industry, and a man's work brings him success and prosperity.

### Low Priced Land—the Last Great West

In Western Canada you still can buy virgin prairie land at \$15 to \$20 per acre, on long terms if desired, near to town, railroads, etc.—land such as has for many years produced the world's prize winning wheat, oats, barley, flax, rye, alfalfa. Canada had no "wet time" land boom; prices are not inflated— you get in on the ground floor.

### Taxes Favor the Farmer as Values Increase

The tax laws of Western Canada encourage the producing farmer. The tax on land is reduced when it is brought under cultivation—while on your buildings, machinery, improvements, personal property, automobile, there is no tax at all. A single crop is often worth more, acre for acre, than the cost of the land.

### Rent Now—Buy Later Pay Out of Profits

Canada welcomes the industrious settler. What you have now isn't so important. If your capital is small, or you cannot sell your present holdings to advantage, rent a fertile Canadian farm and "try it out" for a season or two. Make a good living, increase your capital, and buy later. Farms may be rented from successful settlers on easy terms; in some cases with option of purchase.

### Buy on Exceptional Terms—32 Years to Pay

For the benefit of those wishing to buy land a national non-profit sharing organization—the Canada Colonization Association—has been established with head office at Winnipeg, and United States office at St. Paul. This Association offers selected land convenient to railroads—much of it at \$15 to \$20 per acre—on very small cash payment; no further payment until third year; balance extended over thirty years, but purchaser may pay up and obtain title at any time if desired. Interest six percent per annum on deferred payments.

### We Help Find Your Opportunity

The Canadian Government maintains information bureaus in leading American centers, where you can get full information, without cost, about all parts of Canada. The men in charge are Government officials, interested only in the service of the prospective settler.

### Get the Facts—No Cost

MAIL THE COUPON. Let us know something of your position, and receive free book with maps, and free service of the Canadian Government Agent in your territory; also information how special railway rates can be arranged for a trip of inspection.
