Uncommon Sense ...

IOHN BLAKE

HEED THE PILOT

men an hour before you hear one of them say :

"If I were twenty-one years old and knew as much as I do now, I'd be a whale of a success."

Perhaps he would. Perhaps he he could begin life at twenty-one with far better off.

And the curious thing about it all is that he could avail himself of this experience if he would pay heed to the pilots who are always willing to direct him.

What would you think of a man, go the other way?

Yet that is what is done, repeatedly, by almost every young man who starts out in life. From his father, his employer, from

older friends, he constantly receives directions which, if followed, would be invaluable.

They come from the experience which these men have dearly paid for. They are invaluable.

Yet youth is unheeding, and the adlearn from an experience as expensive tween sleeping and waking." and often as disastrous as that of the man who counseled him.

If you are a young man you are fortunate. Almost any of your elders will give you sound and sensible advice-advice which you can follow to your own profit if you will.

You can learn by the inistakes of others, instead of by your own.

You can plot your own course from n chart which has been made by those who have gone before you.

You will be wise to do it. Your own experience is a good teacher, but

Something to Think About By F. A. WALKER

BUILDING ON SAND

RE WATCHFUL of your words and acts lest you build your reputations of sand.

Seek truth, accuracy and exactitude. Better be plain, matter of fact and a bit old-fashioned than to go wabbling through life unsupported by a strong, underlying principle, and especially by the good opinion of your intimates.

Rather than make a promise which you know in your heart cannot be kept, hold your tengue, or you'll slip in spite of yourself from the base of verity. By some, the truth at times may be termed undiplomatic, but it never fails to hold for the eternal ages may elect to build upon it.

And certainly, the conscience is character is stronger for the effort. Those who may be inclined to fancy make the experiment and judge for

INCREASING USE OF STUCCO

As a Building Material It Is Finding Appreciation Among Architectural Critics.

Not only do architectural critics consider stucco as one of the most attractive finishes to be obtained for exterior a small-principality under the British walls of modern buildings but the gen- government off the southeastern coast eral public as well has placed its approval upon this method of structural population consists chiefly of Hindoos, finishing and beautifying.

Stucco is a magnesite product which three. not only is pleasing in appearance but has permanency as well. Properly applied, it is said to last as long as the foundation of a home. It is said to be fireproof and fire resisting. It is unsaid to disintegrate and destroy some a quaint combination of tropical and other forms of finish. Stucco forms a protection to the structure to which it | completely free from beast of prey or is applied and protects and perpetuates venomous reptiles. The death rate,

This difference in appearance is obtained through the use of | ish. small pebbles, crushed rock, flaked shells and other materials capable of resisting constant exposure to the weather, and varying so greatly in texture and color that unlimited combinations can be obtained, giving to each building a distinctly different effect canal. from the one adjacent. These surfaces are never painted and are said to be ideal as the resurfacing for old structures, resulting not only in making them look new, but making cooler homes in the summer and warmer houses in the winter.

MUST NOT OVERLOOK VINES

Have Strong Useful Purposes as Well as Generally Recognized Ornamental Effect.

Vines are among the most useful plants for "tying" buildings to their surroundings. There is a freedom and grace about their growth that helps to relieve the formality of buildings or fences better than almost any other plants. Care in their selection is necessary, however, as there are disadvantages in the use of sone vines under certain conditions. On brick and stone buildings some of the clinging vines are most appropriate. The impression that such vines are injurious to the walls or make them damp which exists in some quarters is erroneous, the United States Department of Agriculture believes.

The great problem is so to train the vines that they may be removed to permit proper painting of the woodwork when that is necessary. This may be done by means of a trellis hinged near the ground or a chicken wire placed over hooks at the highest point, so that it may be removed. A trellis can be made of chicken wire on a pipe frame that will keep vines entirely away from woodwork. The thought is sometimes expressed that vines cause woodwork to r.t. This is true if they are permitted to become so thick as to prevent proper ventilation and timely painting. Hot sunshine, however, is one of the most destructive forces in the life of paint. Vines by their shade help to preserve paint instead of destroy it.

Means "Better America."

Speaking at the Better Homes ceremony President Harding declared that the movement for better homes "is a movement for a better America." He continued:

"The home is at least not merely the center but truly the aim, the object and the purpose of all human organization. The common man of yesterday was a serf, a peasant, bound to tasks whose significance he did not know, and for whose results he had small care. The common man of today is a citizen, a voter, a sovereign, truly a participant in determining the ends and destiny of the state. It is the purpose of the Better Homes movement to make possible a like advance in the status of womankind."

Prepare Plans Carefully.

Don't make the mistake of building from sketchy plans or from no plans at all. Nothing is more expensive than the rule of thumb of planning or hit-and-miss building. Railroads cannot operate trains without time tables. There is no quicker way to wreck your purse than building without an accurate buying and building schedule. This means carefully prepared plans that are complete in every respect.

Town Wants Radio Set. Seward, Alaska, is conducting a rapid-fire campaign to raise funds for a municipal radio outfit.

Home Town Generally Best, Someone has said: "I'd rather be a big toad in a small puddle than a small toad in a big puddle." For mest men there are greater opportunities in home towns than there are in large cities. Better stay in your home town.

Individual Effort Necesary.

A clean city, be it remembered, can come only from individual effort. Don't leave it to your next door neighbor to from storage to ships of their station | dc all the cleaning in your community

ONE OF BRITAIN'S OUTPOSTS

Island of Mauritius Just Small Part of Great Empire's "Far-Flung Battle Line."

Have you ever heard of "The Island of the Dodo?" Sounds like the same island of the more or less mythical idyl of Paul and Virginia.

However, there is such a place, because L. C. Barbeau is health commissioner of this island; and recently was a delegate to the national conference of social workers, held at Washington.

The Island of the Dodo, better known as the Island of Mauritius, is of Africa, east of Madagascar. It's British, Dutch and a mixture of all

"The island," said Mr. Barbeau, "is often spoken of as the 'star' of the Indian ocean, but I prefer the name of 'Sugar island,' by which it is also known in our part of the world. It enderstood to resist the natural elements | joys a delightful climate and exhibits temperate zone scenery. Its soil is however, from disease is high."

This island is in the southern conof its use and design is a feature. fines of the tropics. It was once the home of the extinct Dodo. Originally or other buildings can be built with colonized by the French, it was conquered by the English during Napoleonic wars, and has remained Brit-

Because of its excellent harbors and its situation on the sea route between India and South Africa it was at one time of much commercial importance, but this has been much reduced by the opening of the Suez

Dr. Barbeau's problem for public health work is that of a whole country with a population of nearly half a million inhabitants on an island only fourteen or fifteen miles in length. Dr. Barbeau is a graduate in medicine of the University of Edinburgh. He is director of the government laboratory in Mauritius.

Losing \$10 to \$75 an Acre.

Farmers the world over are having their troubles except in Denmark. English farmers are losing \$10 an acre on wheat, \$15 an acre on oats, \$20 an acre on barley, and \$50 to \$75 an acre on potatoes. Hard as this may be to believe, these are average losses set forth by experts in the London Times. That paper comments, "If the English farmer this year simply ceases to grow crops he will be keeping money in his pocket instead of losing it." The reasons for this situation as given by the London newspaper are several, a disturbed world, unstable exchanges, high railway rates, restricted credit, too short credit and middlemen's profits. When milk sells for 16 cents a quart in England, the farmer gets 7 cents the railroad 4 cents; a loaf of bread retails for 18 cents, the farmer gets 71/2 cents, millers and bakers get the rest; of every \$5 bill spent for beef the farmer gets only \$2. These figures are from the London Statist. They show how similar are the troubles of farmers 3,500 miles apart.

Impassable Street a Blessing. The old adage, "It's an ill wind," was successfully demonstrated the other day to a young couple who live uptown in an apartment overlooking an avenue which, because of comparatively little traffic is always used by the neighborhood fire engines when answering a call, the New York Sun states.

This avenue is now half torn up. New sewers or something are being put in and three new apartment houses are being erected. There is much building material strewn about and passage even on foot is a trying matter.

The young couple were inclined to be resentful-the dust, the inconvenience -until they discovered that the state of the street was really a blessing in disguise. The fire engines are now compelled to take another route and the young couple's sleep at night is no longer, disturbed as formerly.

"What Road's This?" "Dunno." The limited horizon of childhood was

illustrated aptly for a motorcar load of explorers who found themselves at a crossroads a few miles east of Holliday, Kan., without more than a general idea which way to turn. Two boys, each about eight years old, were trying to catch a turtle in a mudhole. "What road's this?" the driver asked, pointing to the crossroad.

After a moment of frowning concentration, in chorus; "I dunno," "Well, where does this one go straight ahead?"

"Oh," said the taller, "that goes to the store and the schoolhouse!" And both severed relations by grabbing again for the turtle.

Veteran Believer in Work, Mrs. H. T. Burhead, Rearly eighty years of age, does all her own gardening and sold \$300 worth of produce last season in addition to what she raised for her own use. She gardens about an acre and hires the plowing done, but does all the rest of the work herself, including the spading of the entire garden in the spring. She be-Heves firmly that hard work cures most of the ills of life.-Shelbina Democrat.

To Fight Loss From Rust. One result of Sir Robert Hadfield's announcement that the ravages of rust and corrosion represent an annual wastage of \$2,500,000,000 is a suggested exhibition in London of nonrusting and anti-rust products.

Glenn's Sulphur Soap Contains 33 1/4% Pure Sulphur (At Druggists)

Sulphur is an effectual remedy for skin Suppur is an electual remedy for skin troubles. Chronic eczema, sone, and various scaly eruptions are greatly ben-efited by Gienn's, which cleanes, dis-infects, whitens and beautifies the skin.

Millions find it delightful.

DO YOU WANT TO BE A NURSE?

The Sheppard and Enoch Pratt Hospital ol of Nursing offers a three-year course of study in practical and theoretical nursing eighteen months of which are devoted to care of nervous and mental cases, the remaining eighteen months in an affiliated general hospital in Baltimore. Pleasant, interesting atmosphere. Attractive sur-roundings. Pupils are given salary with full maintenance. Two years of high school re-quired. Fall and winter classes now form-ing. For information, address: Superintendent of Nurses,

SHEPPARD and ENOCH PRATT HOSPITAL TOWSON (BALTIMORE), MD.

JUDGE COULDN'T SEE POINT

Legal Luminary Had His Own Idea as to What Really Should Be Considered Distance.

An old judge had grown tired of the petty interests and conventions of a small city. Desiring to live closer to nature, he had built his home on the outskirts of the town.

One day he met a number of the younger legal lights who were inclined to think the old judge rather eccentric, and he, in turn, did not agree with them as to their importance on earth.

"But, judge," one of the leading lights said, "you live so far out." "So far out? So far out?" the judge spouted. "So far from where, from whom, you? I am just as close to the sun, moon and stars as you are."-Judge.

Those who have known grief seldom seem sad.
