Pesky Devils Quietus P. D. Q.

P. D. Q., Pesky Devils Quietus, is the name of the new chemical that actually kills the bug family, Bed Bugs, Roaches, Ants and Fleas, as P. D. Q. kills the live ones and their eggs and stops future generations. Not an insect powder but a chemical unlike anything you have ever used.

A 30 cent package makes one quart and each package contains a patent spout, to get the Pesky Devils in the cracks and crevices.

Your druggist has it or he can get it for you. Mailed pre-paid upon receipt of price by the Owl Chemical Works, Terre Haute, Ind.

BELLE ISLE HARD TO REACH

Mariners Dread to Approach it Through Treacherous Bay of Biscay, Owing to Swift Currents.

Belle Isle is a rocky islet jutting out of the Bay of Biscay off the Brittany coast. While Belle Isle is but ten miles from shore, the water is so rough that few people care to risk the passage. The Bay of Biscay has always been the dread of mariners because of the high tides, fierce currents and dangerous reefs.

Belle Isle was inhabited from early times, for the remains of rock structures made by the Druids are numerous. Later, the Romans occupied it as an outpost of their empire. Then it was held for a long period by a Catholic monastery. In 1761 the British captured the island, after a long siege, but it went back to France soon after. Napoleon started to fortify Belle Isle, but never finished the job. Dumas, in "The Three Musketeers," tells how the gigantic Porthos labored with the great rocks used for the earlier foundations.

How He Came In.

"I'm right proud of my son at college. He's one of the most popular young fellows there," said Farmer Hicks proudly.

"Yer don't say so?" exclaimed a neighbor.

"Yep; he recently gave a big dinner-dance in my honor at one of the most fashionable hotels."

"Wuz you there?"

"No, I wuzn't."

"Wal, where do you come in?"

"I paid for it."

Let the camel get his nose in the tent and presently he will fill the whole tent. It is the same way with a hobby.

There's a Reason

Champion Barrow Has Traveled Far

"Oklahoma King" Has Been Exhibited in Different Parts of United States.

Not content with being declared the grand champion barrow of the world at the 1922 International Live Stock exposition, Oklahoma King has added to his honors the title of the widest traveled and most inspected hog on earth.

Instead of being sent to the block after attaining supreme honors at Chicago last December, he was purchased by two Duroc associations and sent on a tour of exhibition which has carried him to all parts of the country. Among

Oklahoma King.

the places visited were Nashville, Tenn.; Denver, Colo.; Lincoln, Neb.; Crookston, Minn.; Madison and Janesville, Wis.; Fort Worth, Tex.; Oklahoma City, Stillwater and Guyton, Okla.; Peoria, Urbana and Aurora, Ill.; Columbus, O.; LaFayette, Ind.; Lexington, Ky., and Des Moines, Ia.

His journey will continue throughout the fall months when he will be the center of attraction at many of the large fairs. It is planned to bring him back to Chicago the first week in December for the International, this being the first time that the grand champion barrow at this show has ever been returned the following year.

Oklahoma King has stood up well and actually gained flesh during his travels. This is all the more remarkable in view of the fact that he has been shipped as an ordinary hog would be moved about, in a crate by express. At his numerous stops, however, he has been accorded royal receptions and honors have been heaped high upon his porcine head. In one city nothing was considered too good for one of his royal standing and he was given quarters in the lobby of the leading hotel.

This noted animal began life in the classical environment of the Oklahoma Agricultural college. Under the constant supervision of a former pig club winner he was grown and fitted for the great competition at Chicago and amply justified this faith by defeating nearly 500 of the finest market hogs in the world for supreme honors.

Competent judges have conceded that Oklahoma King is one of the most perfect types of market barrows that has ever been produced, and it is for the purpose of allowing as many people as possible to personally inspect this ideal porker that the breed associations have saved him from the butcher's block and have sent him on his history-making tour of the United States.

Vaccinating Cattle to Prevent Shipping Fever

Although still in the experimental stage, the vaccination method of treating cattle to prevent their contracting hemorrhagic septicemia has reached such a degree of perfection that it is now in use by the United States Department of Agriculture.

Until the method has been more thoroughly tried out, the department will furnish vaccine produced in its laboratory and also trained veterinarians who will give the treatment at actual cost.

Losses from this disease have been steadily increasing for several years. During the past fall and winter the disease became more prevalent and virulent than ever before. It is most likely to show itself among animals shipped long distances, although it occasionally attacks those that have never left the home place.

Great Value of Adding Protein to Hog Ration

The value of adding protein to a ration, even when pigs being fattened for market have the run of a good alfalfa pasture, was shown in a test conducted by the Kansas experiment station last year. One lot was fed all the corn it would eat, in addition to alfalfa pasture. The other lot was fed all the corn it would eat plus one-fourth of a pound of tankage per head per day in addition to alfalfa pasture. The pigs in the lot receiving no tankage made a gain of .74 pound per day at a cost of \$5.55 per 100 pounds of gain. The pigs in the lot receiving tankage made a gain of 1.25 pounds per day at a cost of \$4.99 per 100 pounds of gain. The addition of one-fourth of a pound of tankage per head per day on alfalfa pasture reduced the cost of gains 56 cents a hundred.

Dairy Progress Nothing Short of Phenomenal

The progress which the dairy industry as a whole has made during the past three years is nothing short of phenomenal. During a period when other lines of farming and industry were suffering from stagnation, the dairy industry has been forging ahead and new records of production and consumption have been established each year.

Rotation to Prevent Disorders of Beans

Hand Pick Disease-Free Pods to Use for Seeding.

Plant beans on the same land not oftener than once in three or four years, particularly if disease has been prevalent. Soils which once become thoroughly infected as a result of continuous cropping are seldom safe to use for the same or closely related crops for years to come.

Wherever practical, destroy all diseased vines and trash by burning. If the bean straw from diseased vines is to be fed, do not use the manure on a field that is to be planted to beans.

As far as possible avoid cultivating the beans early in the morning when there is dew on them, or when they are wet with rain.

Hand pick disease-free pods, or if possible, select disease-free plants for seed. Use these to plant a seed plot on land which has never raised beans, and which is removed some distance from the main crop.

Remember that hand picking of seed as it comes from the fall or thrasher for the purpose of controlling disease is of no value, since it is impossible to detect even a small percentage of diseased seed.

Seed treatment of beans is of no practical value, since any chemical that would penetrate the seed deeply enough to destroy the disease-producing organism would likewise be apt to kill the seed.

Spraying with bordeaux mixture, 5-4-50 formula, even when done thoroughly by competent persons, is at best unsatisfactory, unprofitable and only partially successful.—Walter G. Sackett, Bacteriologist, Colorado Experiment Station.

Find Silage Profitable as Feed for Baby Bees

Recent feeding tests with baby bees at the Minnesota experiment station show that silage can be profitably used in fattening baby bees. In the tests, which were conducted by W. H. Peters and N. K. Carnes, calves getting silage, plus a full feed of grain, fed more regularly and required less skillful and careful feeding than calves getting a heavy feed of grain and no silage.

The silage-fed calves gained 2.90 pounds per head per day as an average of a 190-day feeding period, while the calves fed without silage gained at the rate of 2.22 pounds per head per day. Although the calves fed without silage were valued at 10 cents per hundred pounds above those which had silage, the silage-fed calves showed a net profit of \$17.90 per head while those without silage made a profit of \$16.15 per head.

In another test barley proved practically equal to corn, pound for pound, in making gains on fattening calves. However, because of the greater cost of the barley and the smaller saving of feed made by hogs following the corn-fed calves showed a profit of \$16.15 per head, while the profit on those fed barley was but \$6.91 per head.

Pure bred beef calves, high-grade beef calves and common calves showing some traces of beef breeding made similar gains on similar amounts of feed. The difference in selling price was marked, however, the pure breeds bringing \$86.78 per head, the grades \$38.45 and the common calves only \$56.18 per head.

Sheep Raising Spurred by Advance in Prices

"The farmer who has the equipment and feeds at hand should be encouraged in raising lambs," says Phil A. Anderson of the animal husbandry division, University of Minnesota. "But farmers entering this field should go slowly at first and study the requirements very thoroughly," he adds.

Mr. Anderson makes the foregoing statement in view of the greatly increased interest exhibited in sheep production the last few months, which has been brought about by advancing prices for wool, a steady lamb market and good profits made in feeding lambs during 1921-1922.

Stocks of wool, which accumulated during the war and immediately after, have now been converted into merchandise. Manufacturers short of mill supplies and eager to keep the mills going have become anxious to buy, causing the price to go up.

"Prices of lambs have been at \$12 to \$15 per 100 pounds for a long time, with a variation of \$2 to \$2.50 for shorn lambs," says Professor Anderson. Such prices should be an inducement for many farmers to have flocks of 25 to 35 ewes or more which will consume green food perhaps otherwise wasted and convert it into a marketable product. With wool and market stock high in price, because of a decrease in the number of sheep in the United States and the action of the new protective tariff, our sheep breeders can surely compete with the breeders of other countries."

Overcrowding Chickens Is Quite Unprofitable

In culling the flock it is better to cull severely and save just enough birds to fill the laying houses to their capacity. Overcrowding never pays, as it cuts down egg production and increases the chances of disease. It is very difficult to keep the straw litter clean and dry in a poultry house that is overcrowded.

Oh, Fudge!

On sale was a cigar called the Villain.

Customer thought this a queer name for a cigar. The manufacturer was always ready to explain. "You see," he would say, "it's always foiled."—Louisville Courier-Journal.

All Set.

Jack—There's something I've been wanting to ask you for weeks. Jen—Well, hurry up. I've had the answer ready for months.—Boston Transcript.

At one hotel in Bavaria a visitor found the tablecloths and napkins to be paper.

MANY WOMEN AVOID OPERATIONS

Through the Use of Lydia E. Pinkham's Vegetable Compound

Two Interesting Cases

Some female troubles may through neglect reach a stage when an operation is necessary. But most of the common ailments are not the surgical ones; they are not caused by serious displacements, tumors or growths, although the symptoms may appear the same. When disturbing ailments first appear, take Lydia E. Pinkham's Vegetable Compound to relieve the present distress and prevent more serious troubles. Many letters have been received from women who have been restored to health by Lydia E. Pinkham's Vegetable Compound after operations have been advised by attending physicians.

Mrs. Edwards Avoids Operation—Wilson, N. C.—"For about a year I was not able to do anything, not even my housework, because of the pains in my sides and the bearing-down pains. I could only lie around the house. The doctor said nothing but an operation would help me, but I tried different medicines which did

no good, until my sister insisted on my trying Lydia E. Pinkham's Vegetable Compound. She said there was nothing like it. I know that she was right, for I began to improve with the first bottle and it has done me more good than anything else. I am able now to do anything on the farm or in my home and I recommend it to my friends."—LILLIE EDWARDS, R.F.D. 8, Box 44, Wilson, N. C.

Another Operation Avoided—Akron, Ohio.—"I can never praise Lydia E. Pinkham's Vegetable Compound too highly for what it has done for me. I had such pains and weakness that the doctor told me nothing but an operation would help me. But my mother had taken the Vegetable Compound and she told me what it had done for her, and so I took it and I am glad to tell every one that it made me a strong woman, and I have had two children since then."—Mrs. R. G. WESTOVER, 325 Grant Street, Akron, Ohio.

Lydia E. Pinkham's Private Text-Book upon "Ailments Peculiar to Women" will be sent you free upon request. Write to the Lydia E. Pinkham Medicine Co., Lynn, Massachusetts. This book contains valuable information.

Cash Trade Only.

Passer-by (to beggar)—I have no small change at present, but I'll hand you something coming back. Beggar (dolorously)—Ah, sir, it was doin' business on credit that redooomed me to this.—New Haven Register.

Hall's Catarrh Medicine is a Combined Treatment, both local and internal, and has been successful in the treatment of Catarrh for over forty years. Sold by all druggists: F. J. CHENEY & CO., Toledo, Ohio

Magistrate—Is this your first offense? Man—Well, it's the first time I've been caught.—Tit-Bits.

Simple.

"A popular song must be simple." "Yes," commented Miss Cayenne, "even idiotic."

Life is a flower of which love is the honey.—Victor Hugo.

Might Be Advisable.

"One divorce for every eight marriages?" "So they say, girlie." "That's bad." "True. Suppose we get married before the odds get worse."—Louisville Courier-Journal.

More the Merrier.

"How many people in New York?" "More than four millions." "I don't see how you all live." "Oh, we patronize each other."—Louisville Courier-Journal.

Can't Afford Both.

Mrs. Loser—The dentist says I must have some bridge work done. Husband—Then you'll have to quit bridge play.—Boston Transcript.

Not Particular.

The Landlady—Will you take tea or coffee? The Boarder—Whichever you call it.—London Answers.

The big Poughkeepsie bridge is 7,100 feet long.

CHEVROLET

for Economical Transportation OF Farm Products

Modern, progressive farmers, being also business men, now depend on fast economical motor transportation to save time, save products and get the money.

Chevrolet Superior Light Delivery, with four post body was built especially for farm needs. It has the space and power for a big load, which it moves fast at a very low cost per mile.

For heavy work, Chevrolet Utility Express Truck at only \$550 chassis only, offers a remarkable value. Fits any standard truck body.

Alabama Mayor Out With Strong Facts

Judge G. W. Thomason, Mayor of Tarrant City, Alabama, widely known and highly esteemed pioneer citizen, recently gave his unqualified endorsement to the Tanlac treatment.

"Chronic indigestion brought me to the verge of a general breakdown three years ago," said Judge Thomason, "and nothing seemed to afford much relief, I was eating scarcely enough to keep going on, and food stayed in my stomach like a rock, causing pain and extreme nervousness.

Sleep was often impossible, and I gradually weakened so I could hardly attend to my office duties.

"The first bottle of Tanlac improved me wonderfully, and each successive bottle gave added impetus to my returning strength. I felt ten years younger when I finished the sixth bottle a short time later. Tanlac gave me new zest in life that still remains with me."

Tanlac is for sale by all good druggists.

Opportunity Calls from CANADA

Pay a visit to Canada—see for yourself the opportunities which Canada offers to both labor and capital—rich, fertile, virgin prairie land, near railroads and towns, at \$15 to \$20 an acre—long terms if desired. Wheat crops last year the biggest in history; dairying and hog raising well mixed farming rapidly increasing.

Homeseekers' Rates on Canadian Railroads

If you wish to look over the country with a view to taking up land get an order from the nearest Canadian Government Agent for special rates on Canadian railroads. Make this your summer outing—Canada welcomes tourists—no passport required—have a great trip and see with your own eyes the opportunities that await you.

For full information, with free booklets and maps, write F. A. HARRISON Dept. W 308 N. Second Street Harrisburg, Pa. Authorized Canadian Gov't Agent.

WANTED—DISTRICT PURCHASING AGENTS, \$250 per month, steady employment and exclusive territory. Write for Experience unnecessary. National Instrument Company, 4726 N. Hamilton, Chicago, Ill.

START A BUSINESS OF YOUR OWN? Man or lady, selling direct from manufacturer to consumer. Exceptionally high-grade line household necessities and toilet articles. Territory is restricted and opportunity afforded to build very lucrative business. Add. for full particulars. H. H. NICHOLSON CO., Baltimore, Md. 111 S. Gay St.

PEANUTS Extra fancy Virginia Shelled Peanuts, delivered by parcel post, 6 pounds for \$1.50. FRANKLIN PRODUCE CO., Franklin, Va.

PIGPOPPERS! YOU CAN BE! You possess two dynamic powers—will, action. Literature free for stamp, 16 days only. E. FISHER, P. O. Box 1646, Los Angeles, Cal.

Rainbows make themselves scarce enough to be always sure of conveying a thrill.

Man can build up a biceps; and he can build up a forehead, too, if he begins early enough.
