Twenty-Two New Buildings

That's only one phase of the construction program we're working on this year in Pennsylvania.

It does not include 30 large additions to other Bell Telephone Buildings in the state.

And in 1924 our expenditures for building operations will be greater than this year.

The staggering demand for telephones—more and more telephones—has brought about the greatest telephone construction program ever attempted in one year.

This year we are adding 76,000 telephones; some ten millions of dollars' worth of new switchboards and other Central Office equipment; half a million miles of new wire.

With just one purpose in view—to keep pace with the needs of the people of this state for communication facilities.
