**Protection of Farmers.**

Under a new law it becomes unnecessary for landowners to post their farms in order to secure reasonable protection to their property. Among other things, this Act makes it unlawful for any person to shoot or discharge any firearm or deadly weapon within 150 yards of any occupied dwelling or other buildings used in connection therewith while hunting or trapping for birds or animals of any kind, unless permission of the owner or tenant, has first been obtained to come within the 150 yard safety zone.

The same Act also makes it unlawful for any person while hunting or trapping to leave gates or bars open, break down or destroy fences, or tear down rail, post, wood or stone piles without rebuilding them as they were found. (Under the new game law there is no longer any excuse for tearing down stone or rail piles in order to secure game, as it is unlawful to shoot at game unless it is plainly visible, or to dig, cut or smoke live game out of its place of refuge.) Careless injuring of live stock of any kind while hunting or trapping is also specifically prohibited. The fine is \$25, and in default of payment imprisonment for ten days follows.

**CAUSE AND EFFECT.**

In the United States 8,000,000 women must work or starve. 35 per cent. are without the common comforts of life, 90 per cent. of children who enter school at the age of 6 quit and go to work before they reach the 8th grade.

HERE'S THE CAUSE: Out of the average twenty men nineteen of them fail to provide for their old age or for their families.

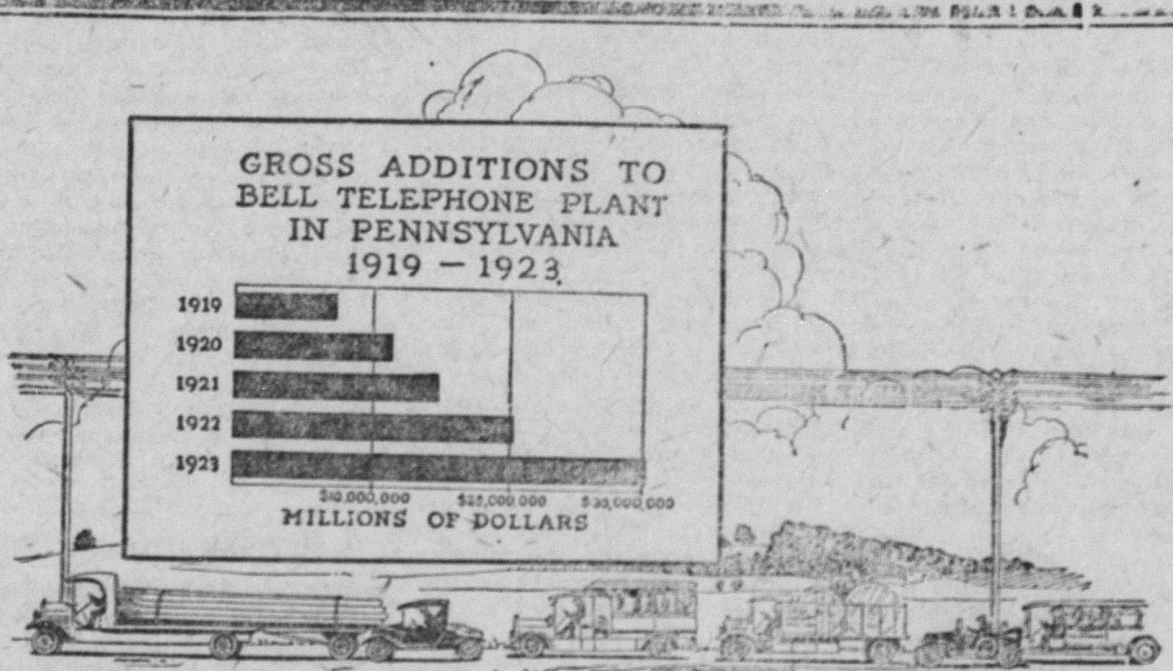

HERE'S THE CURE: Energy, Thrift, Determination—on your part, and the efficient service of a bank that has a desire to advance your interests as well as its own.

THIS BANK IS THAT KIND OF A BANK.

**This Year \$30,200,000**

We started the year with plans for the greatest telephone construction program ever attempted in Pennsylvania.

We expected to add twenty-five millions of dollars in new equipment to the Bell System in this state. But the tremendously increasing demands for telephone service have forced us to revise our figures upward.

By December 31, 1923, we will have placed in one year \$30,200,000 worth of new equipment, new telephones, new wire, new switchboards, new Central Office equipment, and new buildings.

And our 1924 construction program will probably run to \$40,000,000.

All this in spite of the fact that the three preceding years were greater than any six years in the telephone history of the state.

We are building—building to keep pace with the demands of the people of Pennsylvania for telephone service.
