Clear Your Complexion with This Old Reliable Remedy—

HANCOCK SULPHUR COMPOUND

For pimples, black-heads, freckles, blotches, and tan as well as for more serious face, scalp and body eruptions, hives, eczema, etc., use this scientific compound of sulphur. As a lotion, it soothes and heals; taken internally—a few drops in a glass of water—it gets at the root of the trouble and purifies the blood. Physicians agree that sulphur is one of the most effective blood purifiers known. Remember, a good complexion isn't skin deep—it's health deep.

Be sure to ask for HANCOCK SULPHUR COMPOUND. It has been used with satisfactory results over 25 years.

60c and \$1.20 the bottle at your druggist's. If he can't supply you, send his name and the price in stamps and we will send you a bottle direct.

HANCOCK LIQUID SULPHUR COMPANY
Baltimore, Md.

DON'T WAIT TILL YOU'RE DOWN SICK

THE minute you feel a little under the weather, get a bottle of Gude's Pepto-Mangan. Don't wait till you're down sick. Take Gude's as a preventive of illness—it will enrich your blood, and build up your energy. Your druggist has it, in both liquid and tablets.

Free Trial Tablets—To see for yourself the health-building value of Gude's Pepto-Mangan, write today for generous Trial Package of Tablets. Send no money—just name and address to M. J. Breitenbach Co., 53 Warren St., N. Y.

Iowa Boy's Steer Is Grand Champion

Careful Attention and Good Feeding Responsible for His Success

When Wayne Probst, a thirteen-year-old farm boy from West Liberty, Iowa, visited the 1922 International Live Stock exposition at Chicago and staged a meat-cutting demonstration in the boys and girls' club department, he examined the wonderful animals on display and vowed that some day he would be an exhibitor and lead his own animal into the arena.

Champion at Iowa.

During the winter and spring Wayne carefully tended the pure bred Hereford steer which he had entered in his county baby beef club, and when the state competition was held at Des Moines during the Iowa state fair, his pet, Bonnie Arbor, was declared champion Hereford baby beef and reserve grand champion of the show. Although he was offered 20 cents a pound

Wayne Probst and His Champion Hereford Steer.

for the animal, Wayne refused to sell him, since he had set his mind upon fitting him for the supreme show at Chicago the first week in December.

Wayne has been in the boys' club work for six years and has been a consistent winner at the Muscatine county fair. This year his entry won over 32 head at West Liberty and was sent on to Des Moines to compete for the championship of the state. At the state fair there were over 450 baby beebes entered in the classes, making the strongest show of these animals at any state fair.

Wins Trip to Chicago.

In addition to the prize money which Wayne won at the county and state fairs, he was also awarded a free trip to Chicago and will join the thousand or more juniors who will attend the International as a reward for excelling in their club work activities.

Wayne purchased Bonnie Arbor from a local breeder and although the animal was of excellent ancestry, those who know the boy state that his success was due to the care and feeding which were given to his pet. When started on feed December 20th, the steer weighed 400 pounds, and on August 9th he had exactly doubled his weight, balancing the beam at 980 pounds. This gain was put on at a cost of 8 1-3 cents per pound, and at the rate of 2.12 pounds per day.

Wayne attributes much of his success to the inspiration which he received at Chicago while attending the International Live Stock exposition last December. Within two weeks after returning home he started his calf on feed, and all during the succeeding months the high standard of the animals he saw at Chicago was kept constantly in mind and spurred him on to greater effort.

Soy Bean Stubble Makes Fine Seed Bed for Wheat

Soy-bean stubble makes an excellent seed bed for wheat and experimental work has shown that the wheat yield may be increased 25 per cent by sowing after soy beans. Most growers make the practice of harvesting the beans with a sweeprake and following immediately with the wheat drill. No seed-bed preparation is necessary, and this is one of the important factors in the economical production of wheat.

Corn for Silage Must Be Cut Fine and Tramped

Corn for silage must be cut fine and tramped well into the silo, if it is desired to make the best quality of feed and fill the silo to its greatest capacity, says the Department of Agriculture. The usual length of cutting varies from one-fourth of an inch to one inch, but the latter is a little too long, as the pieces do not pack so readily in the silo, and they are not so completely consumed in feeding as the shorter lengths.

Hogs Show Good Profit by Hogging Down Corn

Some practical feeders seem to question the advisability of hogging down corn at present prices, but plenty of tests show that hogs give as much profit when they are allowed to help themselves as when the corn is fed by hand—in fact, these same hogs will show greater profit by hogging down corn than digging it out of muddy feed lots.

Prevent Diseases by Exercising Good Care

Seed Bed Often Is Source of Various Plant Ailments.

(Prepared by the United States Department of Agriculture.)

Cabbage and other crucifers, such as brussels sprouts, kohlrabi, kale turnips, radish, rape, rutabaga and charlock, are subject to fungous and bacterial diseases which are carried from place to place by various means, including insects, infected seed, transplanting from an infected seedbed to field, drainage, cabbage refuse and the other plants mentioned, and stable manure, farm animals and tools, and wind. These diseases are preventable in the main by simple means of plant sanitation, says the United States Department of Agriculture, even as human diseases may largely be prevented by proper care.

As the seedbed is often the source of infection, the truck farmer will find it profitable to take the greatest pains to insure healthy plants. Locate the seedbed on new ground if possible, advises the department. Crop rotation, avoiding crops which belong to the cabbage family, will help and is worth while, regardless of whether or not it is necessary to control plant ailments. A good rotation system will starve out many fungous diseases that may exist and will help control many weeds, particularly wild mustard and its relatives, which harbor cabbage pests.

The leaf diseases of cabbage, cauliflower, and related crops are relatively so unimportant that spraying is seldom required. The most important diseases are internal or soil parasites, which are out of reach of fungicides. The free use of lime will help in controlling such parasites and the disinfecting of all cabbage seed before planting, to prevent black rot and black leg, will be found of considerable value, according to tests carried out by the department. The use of disease-resistant varieties of cabbage and other crucifers will also pay.

Artificial Lighting of Henhouse Is Permanent

The artificial lighting of henhouses has become permanent and popular during the last few years. Contrary to the first opinions of some people, electric lights are not installed for the purpose of fooling the hens. The use of lights merely endeavors to aid in duplicating spring conditions whereby hens have more opportunity to consume a large amount of feed and thus have material in which to manufacture a large number of eggs. Lights in the evening will give the hens less time between the last evening meal and the first one in the morning, so that the crop never gets empty.

Fairly Good Silage Can Be Made Out of Alfalfa

Because of the abundance of protein in alfalfa and the shortage of sugars and starches, it is hard to make really first-class alfalfa silage. At the Missouri station, however, they found that if care was taken, a fairly good grade of silage could be made out of alfalfa. The important thing was to let the alfalfa dry enough so that at the time of putting it into the silo it contained 30 to 45 per cent of dry matter. When it contains more water than this, it seems to make a sloppy, foul-smelling silage. The best plan seems to be to let the crop lie in the swath for a few hours after mowing until it is well wilted, but not dry.

Good Silage Serves as Substitute for Pasture

Feeding trials at the Kansas agricultural experiment station at Manhattan indicate that the silo is a money-maker wherever eight head of cows are milked. Good silage serves as a substitute for pasture during fall, winter and early spring. Silage can be profitably fed to dairy cows in Kansas nine months of the year.

There is a prevalent idea among farmers that it does not pay to put a good corn crop in the silo. As a matter of fact, the better the corn yield the better will be the silage and the greater the amount of foliage which may be fully utilized.

Two Plants Practically Alike Above the Ground

Sudan grass is sometimes mistaken for Johnson grass, as the two plants are practically alike above the ground. The Sudan seed, however, is a little larger and plumper than the Johnson grass seed. And there is a wide difference in the roots and the habits of growth of the two plants. Johnson grass has underground running rootstocks from which it grows from year to year. Sudan grass, on the contrary, has short, fibrous roots and grows only one year. Therefore it never becomes a troublesome weed like Johnson grass.

Soil Prepared for Soy Beans by Fall Plowing

Soil preparation for soy beans is the same as for corn. Where it is advisable to plow in the fall for corn, then it is advisable to plow in the fall for soy beans. The clay lands should be fall plowed, and in the spring disked, harrowed, and made smooth by the drag and planter. For light, sandy soils spring plowing is preferable. On clay and sandy loam soils both spring and fall plowing are equally satisfactory.

MERCHANT GIVES MORE EVIDENCE

W. F. Penny, prominent merchant of Hendersonville, N. C., and a leader in the civic and business affairs of his section, gives unstinted praise to Tanlac, which, he states, has restored his health and overcome troubles that had defied treatment for years:

"For many years," stated Mr. Penny, "I was a great sufferer from indigestion and stomach trouble. Ulceration set in and necessitated an operation. Utter lack of digestive power over a long period so weakened me that I was hardly able to attend to my business."

"Tanlac seemed to reach the seat of my troubles at once and now I have normal strength and activity in every way. Tanlac is undoubtedly the best stomach medicine to be had."

Tanlac is for sale by all good druggists. Take no substitute. Over 40 million bottles sold.—Advertisement.

Long Enough.

Jerome Bonaparte Left Bride.

Jerome Bonaparte married Elizabeth Patterson, daughter of William Patterson, one of the leading citizens of Baltimore. The match was opposed violently by Napoleon, Jerome's brother, who was then first consul of France, says the Detroit News. Their mother tried to aid Napoleon in his effort to have Jerome desert his wife. Jerome refused to yield, and then Napoleon asked Pope Pius VII to publish a bull annulling the marriage. The pope replied that after a careful investigation he could find no grounds for complying with the request of the emperor. Napoleon was furious and at once instructed his imperial council of state to declare the marriage null and void, which that body obediently proceeded to do.

In the meantime Jerome Bonaparte and his wife went to Europe, but Napoleon refused to see his brother. Eventually Jerome yielded to the stronger nature and shamefully deserted his bride.

Any man on pleasure bent is apt to find himself broke in due time.

HEALTH FOR WORKING WOMEN

Let Lydia E. Pinkham's Vegetable Compound Help You to Become Well.

Thousands of girls have to work in homes, offices, stores, mills or factories who are physically unfit for work, with often an aged or invalid father or mother dependent upon them for support. Standing all day week in and week out, or sitting in cramped positions a girl often contracts some deranged condition of her organic system which calls a halt to her progress and demands restoration to health before she can be of use to herself or anyone else.

For these distressing weaknesses and derangements these girls have found health to do their work in Lydia E. Pinkham's Vegetable Compound.

Brooklyn, N. Y.—"Like many girls, I had troubles every month," says Carolyn Mangels, "and they interfered with my work as I could never be sure of my time. My mother often suggested that I take Lydia E. Pinkham's Vegetable Compound, but I never did until lately. I have had very good results, and am now a private secretary and do my work without missing a day. I recommend your medicine to every girl who speaks of having troubles like I have had."

Lydia E. Pinkham's Private Text-Book upon "Ailments Peculiar to Women" will be sent you free upon request. Write to the Lydia E. Pinkham Medicine Co., Lynn, Massachusetts. This book contains valuable information.

had."—CAROLYN MANGELS, 407 14th St., Brooklyn, N. Y.

Office Worker Helped

Milwaukee, Wis.—"I have taken Lydia E. Pinkham's Vegetable Compound and Lydia E. Pinkham's Blood Medicine for three and a half years, and they have improved my health wonderfully. My mother also has taken the Vegetable Compound and we recommend it to our friends. I am working in an office now and can always do my work as I do not have the troubles I had at first. I read of your Vegetable Compound in the newspaper and you may find my letter in that way if you wish to do so."

—ELEANOR SHEBLAK, 637 26th St., Milwaukee, Wis.

Pains and Headache

Webster, Mass.—"I was all run-down, had a bad complexion, and suffered with pains and backache, and was dizzy at times and felt weak. I worked in a mill and my girl chum told me about your wonderful medicine, Lydia E. Pinkham's Vegetable Compound. I am feeling much better since taking it."

—MARY FLAZA, 13 West Street, Webster, Mass.

Two pleasant ways to relieve a cough

Take your choice and suit your taste. S-B—or Menthol flavor. A sure relief for coughs, colds and hoarseness. Put one in your mouth at bedtime. Always keep a box on hand.

SMITH BROTHERS

S.B. COUGH DROPS MENTHOL (orange colored box)

Famous since 1847

Twisted.

It was his first great speech, and he wanted it to be a success.

His oration was long and passionate, and he wished to end it with a warning.

He could have couched his warning in the old proverb about locking the stable door after the horse was stolen, but that was too commonplace. He wanted something original.

He thought of something better. Then he shouted: "Don't, I beg of you—don't wait till the house takes fire before you summon the firemen!"

The Real Reason.

"Boy, is this the field on which the great battle was fought?" asked the historian.

"No, sir; that be at the top of the hill," answered the native boy.

"Dear, dear!" exclaimed the historian, "that must be a mile away. Why didn't they fight it in this field?"

"I suppose because this 'ere field belongs to Farmer Johnson. He never would lend his field for anything, not even for 't' village sports."

Suited His Case.

Doctor's Wife—Since you told Mr. Richleigh that he had heart murmur he comes to church oftener. And this morning I noticed him joining in the last hymn.

Doctor—Indeed! What was the hymn?

Wife—"Give me a calm and thankful heart. From every murmur free."—Roston Transcript.

Olive Emblem of Athens.

How the olive tree came to be the emblem of Athens is told in Greek mythology. Two deities—Minerva and Neptune—wished to found a city on the same spot, and, referring the matter to Jove, the king of gods and men decreed that the privilege should be granted to whichever would bestow the most useful gift on the future inhabitants. Neptune struck the earth with his trident and forth came a war-horse. Minerva produced an olive tree, emblem of peace.

Jove's verdict was in favor of Minerva, who thus became the patron goddess of Athens.

An Abbreviation.

"Bim" was a colored lad who did odd jobs about a suburban neighborhood. People were glad to have him clean cars, cut grass, trim hedges and so on, always finding him efficient and obliging.

Thus as time went on "Bim" became a local character, well known and well liked by all. There was no little conjecture as to how he came by his name. So a self-appointed delegation called on his mother.

"De name done got shorten'd," she explained.

"What's that, auntie?"

"His full name am Cherubim."

That Chap's Been Here, Too.

The fellow with no place to go and all day to get there in is usually the chap who is a fool for motorcar speeding.—Pleasant Hill Times.

Grape-Nuts and Milk—One of the few COMPLETE FOODS

WHEN you watch robust men and women at work or at play, does it ever occur to you that their strength and health are largely due to the kind of food they eat?

Grape-Nuts and milk supplies complete and balanced nourishment of the highest order. This delicious dish provides the valuable wheat and milk proteins; the "food minerals," phosphorus, iron and calcium; also the vitamins.

Because of its nutritive properties, its crisp texture, and its easy digestibility, Grape-Nuts is the best-balanced cereal food for young and old.

When used as an ingredient in other foods, it adds remarkable zest and valuable nutritive elements. Recipes will gladly be furnished on request.
