A warm welcome to these services is extended to all the people of the community. Come to the house of the Lord.

**Young Cattle for Winter Feeding.**

Messrs. C. B. Neff and his farmer, A. B. Smith, west of Old Fort, last week received a car load of young cattle from Lancaster for feeding for the spring market. There were thirty-four head in the lot. These gentlemen have been feeding cattle for some years and must be meeting success, as the lot just received is the largest yet fed.

**Lecture on the Holy Land.**

Rev. Dr. Spangler, of Yeagertown, who is a minister in the Lutheran church, a man who is a born leader in church and in state, a great thinker and organizer will deliver a lecture on the Holy Land as he saw it. This is a rare privilege and should not be missed by anyone who can arrange to be present.

Come to the Lutheran church, Centre Hall, this (Thursday) evening, at 7:30, and bring a friend, or friends, with you. No admission, but an offering will be lifted.

**COMMERCIAL GLUCOSE**

As a Preventive of Automobile Radiator Freezing.  
By CHARLES H. LA WALL.  
The drug, chemical and trade journals frequently contain articles giving formulas for anti-freezing mixtures for automobile radiators. These formulas usually contain denatured, or wood, alcohol, glycerin, or some chemical salt such as calcium chloride.

For four winters past I have successfully employed commercial glucose with unquestioned efficacy and with no detrimental results whatever. The ordinary confectioners' white glucose is preferred, although I have on one occasion employed the glucose sold for table use.

The amount necessary is between 15 and 20 per cent, or about a pint and a half of glucose to a gallon of water. The glucose may be mixed with enough warm water to completely dissolve it and then added to the remainder of the water in the radiator. No further addition or attention is necessary to replace the water lost by evaporation. When warm weather arrives the radiator should be emptied, rinsed out and filled up with plain water.

In addition to using the mixture practically for four years with satisfactory results I also performed some experiments to determine the congealing point of such a mixture. I found that it begins to get slushy at about 10 degrees above zero F., but that it does not actually freeze and harden even at 6 degrees below zero F.

Glucose does not corrode nor affect metals; in fact, it prevents such action by virtue of its chemical reducing properties. It seems to have no effect upon rubber in the dilution used; at least, I have never had to replace my rubber hose connections. There are no objections to glucose at all that I have found and its inexpensiveness and freedom from the annoyance of constantly having to replace a volatile solvent such as alcohol, are unquestioned advantages.

—Department of Theoretical Pharmacy, Philadelphia College of Pharmacy and Science.

[Note:—The above was in response to an inquiry made by the Reporter to the State Agricultural Department in reference to the successful use of commercial glucose as a preventive of automobile radiator freezing.—Ed.]

**Note From Mr. Detwiler.**

A business communication was received Saturday by the writer from John H. Detwiler, written from the State hospital, Danville, on Thursday of last week. In his letter Mr. Detwiler added this note: "I was before the medical staff and my ward master told me that I am now ready for home, and as soon as my wife asks for my release I will again be a free man, for which I very much long. She was here on October 12th and told me she wanted me home soon as possible."

When Mr. Detwiler's desire is accomplished he will have many warm welcomes from his acquaintances about here, many of whom believe his commitment to the state institution not justifiable.

**Highway Almost Completed.**

The state highway between Centre Hill and the Centre-Mifflin county line is almost completed except the ditching and dressing up of the sides which will require a considerable amount of work. The road has apparently been well built and will no doubt stand up even to the heavy traffic over it. This is an important thoroughfare, leading direct from Philadelphia, Bellefonte, Clearfield, Franklin and Erie. The road is of particular value to Penns Valley, since the Lewistown district has become such a fine market for farm products of all descriptions. The scenery over Seven Mountains and Nittany is a perfect delight and cannot be matched by any route within the state.

The Mifflin county portion of this road has been widened at various points and this work is being continued. At various turns brush is being removed so as to give the autoist a clear view of approaching cars, which will greatly lessen the danger in travel.

**Mr. and Mrs. H. M. Musser Entertain.**

Mr. and Mrs. Harold M. Musser, of Mifflinburg, entertained a few of their friends at "Hidden Inn" along Penns Creek, one evening recently. The evening was spent playing "500." Seasonable refreshments were served. The Halloween color scheme was carried out in the tasteful decorations.

Those present were: Mr. and Mrs. R. R. Finkel, Mr. and Mrs. Oren E. Sterling, Mr. and Mrs. J. S. Beckley, Mr. and Mrs. C. M. Steese, Mr. and Mrs. Myron Sterling, Mr. and Mrs. Robert Foster, Mr. and Mrs. Forrest Phillips, Dr. Paul H. Bickle, Mrs. Ernest Watson, Joseph Kurtz, Isabelle Schoch, Luther Kurtz, Mary Gutelius, Grace Letzell, Spyer Kurtz, Mrs. Annie Knauff, Miss Grace Hassinger, Dr. and Mrs. Alton Evans, J. Fred Klose, Mrs. I. V. Musser, mother of the host; Mrs. Meyers, Mrs. Joseph Gutelius, H. G. Gutelius and William Musser.

Several cars of potatoes were shipped to market from Coburn for which but sixty-five cents per bushel was paid.

**INTERESTING LETTER FROM INDIA MISSION FIELD.**

John L. Goheen Tells of Work at Sangli, India, in Letter to Cousin, Mrs. F. V. Goodhart, Centre Hall.

[Note.—Mr. Goheen is principal of the Boys' School at Sangli, India, and has been in mission work in the Presbyterian field for ten or more years. A brother, Dr. Robert Goheen, also a missionary, is at Venguria, India, where he is the head of a hospital, having all modern equipment. Both these missionaries are sons of Rev. J. M. Goheen, a missionary to India for thirty-one years, and were born at Kolarapur.]

SANGLI INDUSTRIAL AND AGRICULTURAL SCHOOL.  
A. P. MISSION.  
Sangli, India, May 25, 1923.

Dear Cousin Sarah:

I have a somewhat guilty feeling that I owe you a letter. Anyhow, if I write now I will have my side of the books clean, and I'm afraid this will put you on the wrong side. We do like to keep in touch with our friends and relatives, for we very often think of you all, tho we do not write as often as we would like to. I hope you are all well and that everything is moving along nicely with you there.

This is vacation for us, but when you get this letter we will be in the midst of it again. I have not "vacated" this year, for all our colleagues in the school are off in the States on furlough, and this has left too much work here to look after for me to break away. Jane and the children are at Kodalkanal, where Akre and their family also are. Bob writes that he expects to get away June 1st to join his family, and he much deserves a good change, for he has had a mighty busy time of it since he came back to India. He goes at this time, for in Venguria they have very heavy rains during June and July, so heavy, in fact, that practically all of the work must needs stop. It does not rain so much with us and we get busy with a vengeance from about the middle of June as the little sheet enclosed will show. Jane, Hunt, Patsy and Andy will be coming home in about four weeks, and needless to say, there will be one chap mighty glad to see them. They have been away since early in April, and I've been very lonely, except that there has not been much time to sit and mope.

Here's hoping you will have fine summer weather, with good showers to bring on all the crops. I'll not soon forget the nice little visit we had with you, and of the look-in at the cave with "Bob" Campbell.

India is pretty quiet these days—not at all stirred up like it was when we first got back from the States. People are beginning to realize that if they wish to make real progress they must settle down to it in a quiet, sensible way. We have good prospects for the new school year, even tho we are short of missionary help. Our friends, the Browns, are due to come back about the end of September, and believe me we will be mighty glad to see them again. They are out in Los Angeles now, but sail from San Francisco about the 10th of August. Mr. Brown has been doing a lot of studying in and around Kansas City, his wife's home, but his own folks live in Los Angeles, so they are stopping there for a few weeks. I've been trying to look after his work, and mine, for about a year now, and it has been "some" job. The Nappa just left to go home last month and they will be away for over a year. A good deal of Mr. Nappa's work will have to stop during his absence, for I've already got enough to do, and any-how, am not qualified to keep it going. So it goes on the Mission field—we never have half enough help. I see that the Foreign Board has come out away in debt this year, and that means that we will probably have to let down some in our work. Would that good old America, rich as she is, back us up a lot better! There have been hundreds of tourists in India the past few months, but mighty few of them have taken the time or trouble to visit Mis-

sion stations or to see something of the good work that is going on. Such people need a lot more real education, and how we wish they would give us half a chance to hand out a bit along the line of missionary endeavor!

We have been going ahead with the various lines of agricultural work, and are not ashamed of the little progress that has been made, altho we'd like to show a lot more. Our chickens are coming on nicely—we now have about 300—and a fine new model plant for them. This year I plan to go into the commercial side of the business, supplying eggs and fowls to first-class customers, and thus help to make the thing a good deal more self-supporting. Heretofore we've not been able to do this much, for we've neither had enough birds or a decent enough home in which they could do their best. I do not remember whether I ever sent you any pictures of the new quarters, so am sending one or two in this to let you see what they look like. Also will enclose some of our children to let you see how they are coming along.

I often see in my poultry magazines the "ad" of some people living near Centre Hall—the Kerlins—and have wondered what sort of a place they have, and what sort of people they are. They advertise good chickens of course, and this makes me anxious to get hold of some good ones for our school. If they have a catalog they would care to send me I'd be glad to see it. We are trying to build up our dairy business, but have mighty little in the way of creamery equipment, so have to move along very slowly. In my estimation one of the greatest needs of the people of India, them millions of poor ones, have in order to build up into strong healthy people so as to withstand the hundred-and-one various kinds of diseases, is for more milk and eggs, and we're trying to do our bit to help make these health-giving foods more available. But my! what little progress we make when we might go ahead so much more with more and better equipment, and financial help. But you hear enough of this sort of talk in the missionary meetings, so I'll not bother you with any more of it.

Well, it makes me a bit homesick to think of the picnics and good times you'll be having this summer, but it's not hard to choke off such vain feelings when there's a lot of work waiting to be done. Do hope that your business there is going along nicely and that life in Centre Hall is all that you could desire. Give my very best to one and all, and remember, we'll be glad indeed to hear from you whenever you feel like writing. I'm sending the family's good wishes too, even though they are about 1000 miles away.

Your cousin,  
JOHN L. GOHEEN.

**PUBLIC SALE REGISTER.**

WEDNESDAY, NOVEMBER 14th, at 10 A. M., on his farm at Pottery Mills, G. H. Emerick will sell: Live-stock, farming implements, etc.; a clean-up sale. L. F. Mayes auct.

**THE END OF A PERFECT DAY**

Many, many things go into making of a perfect day. Very, very few of us can look back on any of our yesterdays and call them perfect. We've made mistakes. Most of our sins are of OMISSION rather than COMMISSION. Especially is this true in a financial way.

We neglect to save today because to-morrow is going to be more convenient for it. BUT IT WON'T. The time to cure our 1924 financial troubles is in 1923.
