

TUSSEYVILLE.

The snow of April 1 made it very unpleasant for people to move. Boise Brown took a trip to State College and Bellefonte on Friday. A party was held at the Frank Flory home on Saturday evening. A nine and one-half pound baby girl arrived at the home of Mr. and Mrs. Paul Emehizer on Sunday and expects to stay.

POTTERS MILLS.

Spring is here; how glad we are. Quite a lot of movings are taking place in this section—Perry Koonsman moved to the business end of town; Joe Confer moved to his new home in town; vacated by Perry Koonsman. George Craig is leaving our town and moving back to Burnham; L. A. Condo moved in the Narcie Kimpport home, better known as the J. C. McClenahan home. Quite a few young folks from this place attended the surprise party at the Frank Flory home at Tusseyville, which was in honor of their daughter Edith. Jimmie and his little Ford are seen quite often. There sure must be some attraction; how about it, Jimmie? Joseph Carson, who has been ill, is able to be out again. Kolman Wingard was a caller at the Carson home. John Armstrong is not improving. Eddie Curry and Joseph Parker made a business trip to Bellefonte, Saturday. Ed. Sweetwood expects to start his road work Monday. Mrs. Ruth Wilkinson and son John of Spring Mills were at the F. A. Carson home Saturday.

SPRING MILLS.

Ambrose Gentzell, of Shamokin, and Grover Gentzell, of Harrisburg, were over Sunday visitors, at the home of their parents, Mr. and Mrs. George Gentzell; also, Roland Gentzell, of Altoona. Mr. and Mrs. Joseph Bitner are now residents of our town. Mr. Bitner's health is improving. Mr. and Mrs. Thomas Decker helped their son, William, to move from Altoona to Bellefonte. The Junior class of the Vocational School will present their two plays in the Grange hall on Friday evening, April 11th, and at Centre Hall on the following evening. Salem and Penn Hill Sunday-schools have united to give an Easter service. Mrs. William McClenahan, Miss Mary Kennedy of Centre Hall, and Mrs. Holobaugh of State College, were callers at the H. F. Rossman home on Saturday. The John Snyder sale, at Brush Mountain on Saturday, was well attended and everything brought fair prices. The hospital drive is on. The township is divided into sections and competent persons are making a canvas of every house to make up the sum allotted to the township. The roads are very miserable in some places, and it is almost impossible to travel them. Homer Feteroff and family went to Berwick on Saturday on account of the serious illness of Mrs. Feteroff's father.

FARM CALENDAR

Timely Reminders from The Pennsylvania State College

Concrete Work—When a concrete walk or floor is laid, cover it with dirt or manure and keep it moist several days. This will prevent rapid evaporation of water and results in a better piece of work. Use a wood float instead of a steel trowel to smooth down the concrete surface. A steel trowel makes the surface too smooth and slippery.

Poultry Parasites—If your birds become thin or lose control of their legs, it may be caused by the presence of round worms or tape worms in the intestines. Hold a post-mortem examination and if the parasites are present, treat the flock with nicotine sulphate capsules. Treat each bird individually by fitting a capsule into the end of a piece of rubber tubing, pushing the tubing down into the bird's crop, and then ejecting the capsule by means of a wire plunger. Follow this treatment the next day by dosing the flock with Epsom salts at the rate of one pound per hundred birds.

Varieties of Soybeans—For hay, a medium season, large growing, bean, such as the Wilson, Virginia or Ohio 9035, is recommended. Early varieties such as Ito Sen and Manchou will not give large yields. For the northern half of Pennsylvania, Elton is a good variety and is a little earlier than the Wilson. The large, late varieties such as the Mammoth Yellow are too coarse and late in maturing for best results.

Growing Asparagus—Asparagus is the earliest green vegetable the garden can produce. Every home garden should have an asparagus bed. Fifty roots will provide sufficient for a small family and 100 roots for a large family. A new circular on how to grow asparagus can be secured by writing to W. B. Nissey, vegetable garden specialist at State College.

A Good Thing - DON'T MISS IT.

Send your name and address plainly written together with 5 cents (and this slip) to Chamberlain Medicine Co., Des Moines, Iowa, and receive in return a trial package containing Chamberlain's Cough Remedy for coughs, colds, croup, bronchial, "flu" and whooping cough, and tickling throat; Chamberlain's Stomach and Liver Tablets for stomach troubles, indigestion, gassy pains that crowd the heart, biliousness and constipation; Chamberlain's Salve, needed in every family for burns, scalds, wounds, piles, and skin affections; these valued family medicines for only 5 cents. Don't miss it.

Hall's Catarrh Medicine
Those who are in a "run down" condition will notice that Catarrh bothers them much more than when they are in good health. This fact proves that while Catarrh is a local disease, it is greatly influenced by constitutional conditions. HALL'S CATARRH MEDICINE is a Tonic and acts through the blood upon the mucous surfaces of the body, thus reducing the inflammation and assisting Nature in restoring normal conditions. All Druggists. Circulars free. F. J. Cheney & Co., Toledo, Ohio.

Power in Small Things
A hundred small accounts make a bank stronger than a dozen large ones, even though the total deposits be about equal. A thousand small accounts means more to the community, to the bank and to the individuals or firms carrying such accounts than a hundred or two large accounts.
This bank wants a large circle of friends and as many customers as possible for we believe that every man and woman needs a bank account.
The kiddies need a Savings Account—have you started one for them?

LEOLA
HOG FEEDERS
Circular BROODER HOUSES
CHICKEN ACCESSORIES
DO YOU KNOW that you can more than double your profit from hogs by using a Self-Feeder? This is not an idle claim. It has been proved by Pennsylvania State College and by farmers who have given it an actual test. Two lots of fifteen hogs each were fed for ninety days on 4 rations of cornmeal, buckwheat middlings and tankage. Self-Fed to one group and Hand-Fed to the other. Here was the result:
Self-Fed Hand-Fed
Gain per day 1.3 lb. 88 lb.
Cost per hundredweight gain \$3.74 \$7.78
Profit above feed cost \$7.41 \$3.18
This test shows in dollars and cents what a Self-Feeder can do for you. If you had been the owner of those fifteen hogs, you would have earned \$111.15 in 90 days. This is \$62.45 more than you would have earned if the hogs had been hand-fed. In other words, the original cost of the Self-Feeder would have been more than repaid in 90 days and you would have a generous profit in addition.

SCHOOL
The little crossroads schoolhouse held only a score of pupils. In case of fire, exit was easy for all.
Today our schools literally turn away pupils, often working many classes in morning and afternoon shifts. Despite constant fire drills we frequently have appalling disasters from such crowded buildings. Suppose one of the victims was your child.
A school building of concrete being fireproof is not only safe for children, but also safe for the taxpayer's money—for it is permanent. And in first cost it is but 6% more than one of impermanent materials. Ask your building material dealer to demonstrate to you what is true building economy. He knows.
