If all the fishermen who bordered the streams on Tuesday morning would have dug their bait in the garden, what a nice onion patch would now be ready for planting by the wives or mothers of the disciples of Iszak Walton. It's a shame to have wasted all that energy, for if rightly applied, every fisherman would have been rewarded regardless of whether he landed or lost all of the big 'uns.

Economies

In order to cut the high costs of new telephone equipment we have introduced many labor-saving devices. In every department of our business there are new machines, new practices, improved methods—all introduced to keep telephone rates down.

Where further economies will impair the service itself—a thing which you would not sanction, and which we could not allow.

When we reach this point—where every possible economy has been introduced in our business, and in spite of this our revenues are inadequate to meet the needs of a sound business, there is only one thing left for us—we must come to you and state the facts.

Were it not for the improvements in the telephone art in the past few years we would have been forced to come to you—the people of Pennsylvania—for increased rates a year or two ago.

We have now reached the point where every possible economy has been introduced in our business, and in spite of this our revenues are inadequate to meet the needs of a sound business, there is only one thing left for us—we must come to you and state the facts.

For you have the same interest in the service that we have.

A strong, well-conducted, efficient telephone system is an asset to the community. We ask only for rates which will enable this company to continue as an asset to the business and social welfare of the State.
