

Work on I. O. O. F. Home.

Work is proceeding rapidly on the Odd Fellows' home for the aged at Middletown below Harrisburg. The foundations are far advanced and the cornerstone will be laid on May 31. This will be a big occasion, which will be attended by thousands of Odd Fellows from all over the state. The first floor concrete will soon be laid and the building will be finished by June, 1925.

From the Bleachers.

It was noticeable from the bleachers that the conduct of the Bellefonte High school base ball team was A No. 1. They played clean, were clean in speech on the diamond and on the bench. The game went off without a hitch or protest from either nine and the bleachers also said "yes." The game was not so brilliant. The feature mentioned above is of much more importance.

Freak weather was the order of the day on Easter Sunday. Sunshine, thunder showers, hail and snow followed in quick succession in the forenoon. During the afternoon rain fell the greater part of the time. Monday noon there was a brisk snow squall followed by light rains.

Little "Billie" Parker, who was kidnaped from the Children's Home at Clearfield, on March 5, has so completely disappeared that the authorities have not been able to get the slightest clue as to his whereabouts. Every effort to locate him has failed.

A few minutes of pitching in and doing a thing is better than a week of talking about it.

**LEOLA
HOG FEEDERS
Circular BROODER HOUSES
CHICKEN ACCESSORIES**

DO YOU KNOW that you can more than double your profit from hogs by using a Self-Feeder? This is not an idle claim. It has been proved by Pennsylvania State College and by farmers who have given it an actual test. Two lots of fifteen hogs each were fed for ninety days on a ration of cornmeal, buckwheat middlings and tankage. Self-Fed to one group and Hand-Fed to the other. Here was the result:

	Self-Fed	Hand-Fed
Gain per day	1.3 lb.	88 lb.
Cost per hundredweight gain	\$5.74	\$7.28
Profit above feed cost	\$7.41	\$3.18

This test shows in dollars and cents what a Self-Feeder can do for you. If you had been the owner of those fifteen hogs, you would have earned \$111.15 in 90 days. This is \$63.45 more than you would have earned if the hogs had been hand-fed. In other words, the original cost of the Self-Feeder would have been more than repaid in 90 days and you would have a generous profit in addition.

Changes in Long Distance Telephone Rates

CERTAIN changes in rates for Out-of-Town calls are provided in the new schedules which were filed with the Public Service Commission of Pennsylvania on April 1st to become effective May 1st.

Many of the Station-to-Station rates which are now 25c or over will not be increased. Where the rates are changed the increase in most cases is not more than 5c. There is no change on rates of 75c or over.

Person-to-Person calls under the new schedules will be charged for at approximately 40 per cent. more than the Station-to-Station day rates, instead of about 25 per cent. more, as at present. This applies only on calls on which the Person-to-Person rate is less than \$1.00.

HOME

How much will you pay for safety, for permanence, for comfort?

Portland Cement, the material making this possible, is the cheapest of all products undergoing a complete process of manufacture.

A permanent, fire-safe home can be built for from 2% to 5% more than one of impermanent materials. The protection of your investment, the safety of your loved ones, can be assured for a ridiculously small outlay. And such a home is warmer in winter, cooler in summer, and more sanitary the year 'round.

Ask your building material dealer for facts and figures on such construction. Your contractor will also tell you that it is more rapid, as well as safer, than temporary building.
