TRAFFIC

Knowledge, comfort, wealth, even safety, are dependent on the highways over which men go. Every increase in a road's usability is a fourfold benefit.

Today permanent highways have proved that they are both most usable and also ultimately cheapest. And the one material that makes this possible is Portland Cement, which, despite wide general demand, remains the cheapest of all manufactured products.

Atlas, through developing the rotary kiln, did more than anyone else to make Portland Cement actually cheaper today than thirty years ago. And in selecting the building material dealer as the only link between Atlas and user, assured distribution economy.
