Letter from South Dakota.

Sioux Falls, S. D.

Editor Reporter:

Enclosed find check for Mrs. Kate Conley's paper for another year. Mother can hardly wait until the Reporter comes. She has been sick for a while-but seems better today.

We are having awful hot weather here---just what we need for the corn, as all crops are a couple weeks late. This year we have a fine small grain crop.

Wishing you all the best of success, I remain,

Your friend,
J. K. CONLEY.

FISH.

Most people think of fish as cold, dull and stupid things without any trace of what we call in the animals "human traits." And many persons who would under no circumstances shoot a deer or harm any of the big, furred people of the woods, go cheerfully forth with a rod and pull up on a sharp hook fish---after fish---that is if his or her luck is good.

But recent investigations of science reveal some interesting and surprising facts. Fish that take one surprise for life, fish that sing and "talk" to each other, fish that climb up trees for their afternoon nap, fish that can change their skins to match whatever their eyes see---and many other new and astonishing discoveries, all of which appear in an illustrated page article in next Sunday's New York Sunday American.

Festival Postponed.

The festival advertised to be held at Potters Mills, on August 9th, has been postponed until Saturday evening, August 16th.

Hall's Catarrh Medicine

Those who are in a "run down" condition will notice that Catarrh bothers them much more than when they are in good health. This fact proves that while Catarrh is a local disease, it is greatly influenced by constitutional conditions.

HALL'S CATARRH MEDICINE is a Tonic and acts through the blood upon the mucous surfaces of the body, thus reducing the inflammation and assisting Nature in restoring normal conditions.
