Painters at China's Mercy
In many respects the painter today is at the mercy of the Chinese workmen for without China brushes, now since the Russian supply has been decidedly cut off, the price of paint brushes would soar. The situation was extremely critical for a time during and after the war, but it is more stabilized today.

Don't chuckle if you put over a substitute when an advertised product is called for. Maybe your customer will never come back.
Ben Mulford, Jr.

Does He Fear a Wettin?
"I see that Slim's new portrait of King George is being severely criticized. What do you think of it?"
"Too much flashy clothes for this time and age."
"Well, I think myself he'd look better without that swell reincoat he's wearing."

AFTER BABY ARRIVES
Many Mothers Weak, Nervous
Lydia E. Pinkham's Vegetable Compound Helps to Restore Health

A great many letters similar to the following recommend Lydia E. Pinkham's Vegetable Compound as a wonderful medicine for bringing the new mother back to normal health and strength.
It is an excellent restorative, contains no harmful drugs, and can be taken in safety by a nursing mother.
Thousands of mothers who have regained their strength by taking it are its best recommendation. Why not take it yourself?
Now Well Again
Milwaukee, Wisconsin—"After I had my second child I felt sick and nervous and could not do much. Then after the other baby came I was worse than ever. I suffered this way for a long time and did not know what to do. I was looking over my cook books, and found one of your little books and I sat down and read every page. Then I bought a bottle of Lydia E. Pinkham's Vegetable Compound and took four bottles of it before I stopped, and now I am well again. I always recommend the Vegetable Compound to my friends."
—Mrs. JOHN MITZKE, 778 8th Ave., Milwaukee, Wis.
Buffalo, N. Y.—"My health got worse after my little girl's birth, and my mother advised me to try Lydia E. Pinkham's Vegetable Compound as it had done her so much good. I had headaches and tired feelings, with no ambition, also pains at times so it hurt me to walk. With the Vegetable Compound I took Lydia E. Pinkham's Blood Medicine and used Lydia E. Pinkham's Sanative Wash, and I have been greatly helped. I do hope you will use my letter as a testimonial as it will help other women."
—Mrs. GEORGE SHOEMAKER, 349 Emalie St., Buffalo, N. Y.

Followed Friend's Advice
Vienna, South Dakota—"After my second child was born I was completely run-down and didn't care for anything. I had sharp pains in my sides and a white discharge and was nervous and weak. I didn't seem to care how I neglected my work. A friend told me about Lydia E. Pinkham's Vegetable Compound and I took it for two months the first time and one month the last time. It has helped me in a great many ways and the pains have left me entirely. I certainly wish you to know how much benefit I have received."
—Mrs. G. W. FREEMAN, Vienna, South Dakota.
Such letters and a successful record of fifty years should convince every ailing woman that Lydia E. Pinkham's Vegetable Compound is the medicine she needs. For sale by druggists everywhere.

SWAMP-ROOT FOR KIDNEY AILMENTS
There is only one medicine that really stands out pre-eminent as a medicine for curable ailments of the kidneys, liver and bladder.
Dr. Kilmer's Swamp-Root stands the highest for the reason that it has proven to be just the remedy needed in thousands upon thousands of distressing cases. Swamp-Root makes friends quickly because its mild and immediate effect is soon realized in most cases. It is a gentle, healing vegetable compound.
Start treatment at once. Sold at all drug stores in bottles of two sizes, medium and large.
However, if you wish first to test this great preparation, send ten cents to Dr. Kilmer & Co., Binghamton, N. Y., for a sample bottle. When writing, be sure and mention this paper.—Advertisement.

Mother! Fletcher's Castoria has been in use for over 30 years as a pleasant, harmless substitute for Castor Oil, Purgative, Teething Drops and Soothing Syrup. Contains no narcotics. Proven directions are on each package. Physicians everywhere recommend it. The kind you have always bought bears signature of
Chas. H. Fletcher

Determine Time for Caponizing
Age and Size of Fowl to Be Operated On Are of Great Importance.

(Prepared by the United States Department of Agriculture.)
Within the last few years the business of producing capons has grown rapidly in this country, and increasing numbers of capons are being raised in the middle western states. During the winter months capon is regularly quoted in the markets of the large eastern cities. Massachusetts and New Jersey are the great centers for the growing of capons, while Boston, New York, and Philadelphia are the important markets.
Time Not Important.
The time of year when caponizing should be performed, so far as the effects of the operation and the rapidity and ease of healing are concerned, is of little importance. The capons seem to recover and do well at any time. Certain other considerations, however, do influence the time, says the United States Department of Agriculture. The age and size of the cockerel are very important. As soon as the cockerels weigh one and a half to two and a half pounds, or when two to four months old, they should be operated upon. The lower age and weight limits apply particularly to the American breeds, while the higher apply to the Asiatics. If smaller than this, their bodies do not give room enough to work handily. On the other hand, they should never be over six months old, as by this time the testicles have developed to a considerable extent, the spermatic arteries carry greater amounts of blood, and the danger of pricking these arteries and causing the fowl to bleed to death is greatly increased.

Demand During Holidays.
The fact that capons are in greatest demand and bring the best prices from the Christmas season until the end of March, and that it takes about ten months to grow and finish them properly, makes it important to hatch the chicks in early spring so that they will be of the proper size for caponizing in June, July and August. These are by far the most popular months for the operation, though in some cases it is performed still later.
Brown Rot of Cherries and Prunes Is Serious
Brown rot of prunes and cherries occasionally breaks into a serious epidemic in the Pacific northwest and causes the loss of a large percentage of these crops. Results of five years' investigations of this disease as it occurs in the lower Columbia and Willamette valleys are reported in Department Bulletin 1252, just issued by the United States Department of Agriculture.
The prunes and cherries that had fallen to the ground and become partly buried develop apothecia which shed spores causing the disease by infection of the blossoms, the extent of infection varying with the prevalence of damp and showery weather. Applications of spray just before the blossoms opened and just after the petals had fallen decreased the blossom infection, and applications three to five weeks before picking time decreased the fruit rot. All of the various standard spray materials were found fairly efficient in holding the disease in check.
A copy of the bulletin may be secured, as long as the supply lasts, from the United States Department of Agriculture, Washington, D. C.

Automobile Is Raising Standard of Work Horse
The small, seedy, misfit horse is now a "has been." The automobile has put it out of business. The automobile was responsible for a cut in the price of horses, and, of course, the scrub suffered most. As a result, says W. H. Peters, head of the animal husbandry division of the Minnesota experiment station, University farm, St. Paul, the type of horse one sees now is the big strong animal, able to do a honest day's work.
It is the latter type that the farmer should raise, if he has the marketing of stock in mind. "Breed only from high class stock of good draft type," says Mr. Peters.
The scarcity of horses is such, believes Mr. Peters, that the farmer may very well look to the raising of enough colts to meet at least the power needs of his farm.
Comb Honey Difficult
Comb honey is more difficult to produce than extract owing to the bees having an aversion to working in the section supers. To get them there requires crowding. Early in the spring, when the colonies require extra brood rearing space, it is customary to give a second brood chamber. Later, in the fall, when nectar is coming in well, this second brood chamber is removed and the super containing the sections is placed, without excluder, next the brood chamber.

Successful Farmers
"The most successful farmers study carefully the general trend of production, and without disorganizing their general plans, nevertheless try to go somewhat counter to the prevailing trend. Such farmers usually have the higher priced stuff to sell."
—Henry C. Wallace, United States secretary of agriculture.

Farmers Lose Much on Wheat Dockage
Failure to Clean Grain on Farm Is Cause of Loss.

(Prepared by the United States Department of Agriculture.)
Farmers in the spring-wheat states lost millions of dollars last year through failure to clean their wheat on the farm. The farmers of four spring-wheat states hauled to market 11,600,000 bushels of dockage mixed with their wheat. They lost millions of bushels of wheat in reduced yields by growing weeds; \$675,000 paid for threshing dockage; \$800,000 in freight paid on dockage; by weed seeds lowering the grade of wheat, and by losing the feed value of the dockage.
These facts are brought out in an investigation by the United States Department of Agriculture, which is now waging an intensive campaign in the spring-wheat states to induce farmers to clean their wheat on the farm. The quantity of dockage last year, if removed from the wheat, would have fed (with addition of roughage) 3,500,000 lambs, thus adding weight worth about \$8,700,000, the department says.
Wheat should be cleaned preferably at the threshing with a portable disk cleaner, or with any good cleaner at the granary. Cleaning at the farm removes the dockage for feed; increases the market value of the grain; provides clean wheat for sowing, and saves freight.

A descriptive illustrated poster emphasizing the need for cleaning wheat at the farm has been prepared by the department, copies of which will be displayed at banks, country elevators, mills, railroad stations and other public places through the spring-wheat territory. A special bulletin entitled "Cleaning Wheat on the Farm" is also being published, copies of which may be obtained free upon request to the United States Department of Agriculture, Washington, D. C.

Inspection Service on Eggs Expanding Rapidly

Nearly 5,000 cases of eggs were inspected at New York last month under the new market inspection service of the United States Department of Agriculture. Inspections were mainly for users of eggs, one chain restaurant system alone having 2,638 cases inspected by the federal officials. Other inspections were for government hospitals, navy supply ships, the United States Steamship lines and other steamship lines.
Widespread demand is being made for extension of the inspection service to other cities, declares Roy C. Potts, in charge of the division of dairy and poultry products at Washington, and it is hoped to meet this demand as rapidly as federal funds will permit. Inspection service is being established at Chicago this month, to be followed later in the year with similar service at Philadelphia, Boston and San Francisco.
The eggs are inspected in accordance with the specifications in the contracts between buyers and sellers. Increasing use is also being made of the federal grades for eggs, Mr. Potts says.

Ducks With Sore Feet

Ducks as well as hens are liable to get bruised or cut feet, causing considerable pain and lameness and occasional death. In cases of injury and swelling or festering lance the swelling by making a rather wide incision with a sharp knife. Drain the wound and wash it with iodine, and then bandage. Several dressings may be necessary before healing results. Such cases in birds greatly differ. Some may be easy to heal, while others result in lameness and great loss of vigor. Your own inspection of the bird can best determine whether it is worth trying to save through surgery.

FARM NOTES

If you don't dock your lambs the market will.
A good part of gas engine troubles is due to incorrect timing.
If you want your descendants to say, "My great grandfather put in these posts," use concrete.
If hens could talk, they'd probably say it was a waste of time to try to hatch chickens from inferior eggs.
A penny saved is a penny earned; follow the price movements when buying feed and make your plans in advance.
If some farmers put as much energy to cutting weeds as they do to cursing the political situation, their farms would look a lot better.
An ordinary six-shovel corn cultivator is a good implement for cultivating potatoes. More and smaller shovels will be better in a clean and mellow soil.
Keep the weeds cut close around the fence. Weeds take the water which the vegetables need. They harbor insects, and disease lives over the winter on the old weed stalks.
When cut for seed sudan grass is usually cut with a binder and shocked until ready to be threshed. This same method may be used when it is cut for hay if the climate is not too wet.

MONARCH COFFEE
QUALITY for 70 years
Each one of all the millions drinking Monarch Coffee at one time bought their first trial package. Unless you, too, do this, you'll never know how rare a quality it is. Is a trial too much to ask?
