A new and more correct way of marking narrow bridges has been adopted by the State Highway Department, the old sign, "One Way Bridge" having been abandoned for "Narrow Bridge—One Car Width." A young bob cat routed several dogs but on making a second attack on them was shot by Homer Neff, on the McCool farm, south of town. Mr. Neff was husking corn and heard the dogs chase some animal through the fields, but shortly the dogs came back thoroughly licked. On reaching a thicket in the field, Mr. Neff spied the cat, and attempted to induce the dogs to "go get it," but the dogs wouldn't "sick." Very unexpectedly the cat rushed at the canines the ferocious animal not leading but following in the chase. Mr. Neff mounted the corn wagon, grabbed his gun and fired at the pursuing cat, and then found himself lying prostrate in the wagon box due to the horses frightening at the report of the gun and making a sudden start. Later he found the cat badly wounded but full of fight, and not wishing to further injure the pet by a charge of shot, a fence rail was used in subduing the game cat.

Neff now has a thirty-five inch pelt and an order for \$15.00 bounty.

Chinese hens are laying millions of dozens of eggs to be beaten into American cakes and candies, in spite of the increased height of the tariff wall. Though Chinese eggs are coming into the United States annually to furnish approximately one dozen for every family. But the Chinese hen does not compete with the American hen in supplying the eggs for the breakfast table. Of the 23,710,000 dozen coming in last year practically all were in the dried or frozen form, according to the Sears-Roebuck Agricultural Foundation.

The American hen cannot be accused of loafing on the job. In addition to furnishing all the eggs needed for American use, she produces a huge surplus of export. Last year this surplus amounted to 30,000,000 dozen—6,290,000 dozen more than were imported. The American exports were largely eggs in the shell, which sell at higher prices than the frozen and dried eggs from China.

In 1914, just a decade ago, there were 19,000,000 dozen Chinese eggs imported. By 1918 the imports totaled 52,400,000 dozen, and in 1920 the number had climbed to 71,000,000 dozen. In 1922, the year the tariff went into effect, only 25,827,000 dozen were imported. Last year the number was still further reduced, with only 23,710,000 dozen coming in.

Present prices are not especially attractive to imports. The demand is for strictly high quality eggs, the production of which for the home markets the American hen monopolizes.
