**"77" DRUMPHREY'S REMEDY BEST FOR COLDS-GRIP**

**PENNSYLVANIA STATE ITEMS**

Shenandoah.—Martin Nash, an aged resident of this place, fell on ice, fracturing his skull and dying.

Pottsville.—Mrs. Mary Krebs, aged 47, was found dead seated in a chair at her home.

York.—George H. Zinn, 52 years old, died suddenly in a store while arranging goods in a show case.

Shenandoah.—Manuel Joseph was caught in a premature explosion at West Shenandoah colliery and killed.

Weatherly.—A considerable sum of money realized by a Thanksgiving event for the benefit of the fire company is missing from the safe in which it had been placed in the fire house.

Mills City.—Burglars forced open the safe in the postoffice and stole \$250.

Lancaster.—Councils reduced the tax rate from 11 to 10 mills.

Chester.—Bumbed with cold after sleeping in a packing box all night, Charles Craig, aged 8, was found by Sergeant Busher and Patrolman Talbot at Fourth and Market streets. He was sent to the Cueter Hospital, but physicians say that he will not suffer any ill effects from his exposure.

Hazleton.—Warren Blitenbender, of this city, camping with a party of hunters near White Haven, killed a deer between gulps of soup, while at lunch. He dropped his plate when he saw the buck, got his gun and brought him down with a single shot. Blitenbender finished his meal before he went out to claim his quarry.

Scranton.—Found guilty of running down and killing Mrs. James Loftus, while operating an automobile on the county highway last May, Jacob Wesnechak was sentenced to spend four years in the county jail. At the completion of this term he must serve an additional two years for breaking the law of Mrs. Michael McAulic, who was with Mrs. Loftus.

Philadelphia.—Rev. Richard J. Morris, secretary to Bishop Garland, is getting from a donor unknown to him "feed box" information straight from the New Orleans race track, which, if he were a man of sportive tendencies might profit him much. Mr. Moore several weeks ago began to receive tips on the races from a man signing himself "Jack Trotter," and modestly declaring that he is "the man who knows a horse." All Mr. Trotter asked in return was for the names of two of Mr. Morris' friends who play the races. But Mr. Morris is having no twinges of conscience, because, he insists, he doesn't have even one friend who plays the ponies.

Norristown.—A suit for \$30,000 damages has been instituted in court here against Dr. Harry L. Randall, who conducts a sanitarium at Germantown avenue and City line, Chestnut Hill, by Frank Mitchell. Mitchell claims when he called to see Dr. Randall last August to be paid for carpenter work, a dispute arose as to the amount due and the doctor struck him in the ribs and other parts of the body.

Lewistown.—Local authorities are looking for a Ford touring car bearing Pennsylvania No. 639935 stolen when two young men, said to have been from Altoona, stopped at a farm house near Ickesburg and told a story of running out of gas just down the road. They were permitted by the owner to use his car to get some gas and never came back.

Sharon.—Angered because she was "kidding" him, William Birtwhistle, 45 years old, shot and killed his housekeeper, Mrs. Sarah Stafford, 50, at his home on the Mercer Pulaski road west of Mercer. A shot gun was used and the load of shot shattered Mrs. Stafford's head. Both had been drinking. Birtwhistle was overpowered by neighbors and turned over to Sheriff William Bone, who lodged him in jail.

Pittsburgh.—A radio romance which had its inception when Thomas Malie, Pittsburgh vocalist and song writer, appeared at a local broadcasting station, and Miss Dorothy Hess, of Chicago, an actress, "listened in" in her New York apartment, was revealed here when announcement was made of their marriage. The "radio courtship" began three months ago, when Miss Hess sent Mr. Malie a note of congratulations after hearing a concert. They were married at Greensburg.

Chester.—Lillian Dorothy, 9-months-old daughter of Mr. and Mrs. James Cropper, of Marcus Hook, was fatally burned as she played on the kitchen floor of her parents' home. Her clothing caught fire while her two older sisters were playing with matches during the time their mother was out shopping. The baby was playing with her sisters, one 2 years old and the other 4, when one of them found a box of matches and struck several of them.

Bloomsburg.—John R. Kitchen, a well known Columbia county farmer, was seriously hurt when a tractor ran away and ran over him.

Lewistown.—Thomas Davis, 74, one of the oldest volunteer firemen in the state, died from injuries sustained when struck by an automobile.

Rawlinsville.—Curtis McClune, 52 years old, committed suicide at the home of his sister, Mrs. Frank Durry.

Oil City.—W. L. Shaugherger, of this place, was elected general chairman for the Brotherhood of Railroad Trainmen for the lines east of Pittsburgh.

**Federal Grades of Big Benefit**

Standardization of Farm Products Attaining National Importance.

(Prepared by the United States Department of Agriculture.)

Standardization of farm products is rapidly attaining national and international importance, declares the United States Department of Agriculture. Federal grades are now available for 30 kinds of fruits and vegetables, one or more of which grades have been adopted by 25 states for use in interstate as well as in interstate commerce.

**Value of Grades.**

The department's standardization program was started in 1915 with the establishment of a telegraphic market news service covering most of the leading consuming markets in the country. Federal grades were prepared for Bermuda onions and potatoes, use of the latter being made compulsory by the food administration. The value of the potato grades was found to be such that with the termination of the food administration the trade continued the voluntary use of the grades, and it is estimated that at least 80 per cent of the total shipments of potatoes in the United States are now quoted on the basis of the federal grades.

Further stimulus was given the standardization program when the United States food products inspection service was started in 1917. This service provided for federal inspection of shipments at receiving points when such inspection should be requested by any of the persons interested in the shipments. Grading laws that had been long dormant were brought out and shaken to life. By 1921 federal grades had been recommended for 13 different fruits and vegetables, and had been widely adopted by the states.

**Service Extended.**

The following year the inspection service was extended to shipping points, and a tremendous demand developed for additional standards for fruits and vegetables. The grades now cover 30 commodities and the end is not yet, say department officials in charge of the work. Growers of artichokes, romaine, raspberries, rutabagas, escarotte, garlic and other commodities are requesting federal grades for their products. The grades are also now being recognized abroad as evidenced by the trade preference given American products that have been officially inspected and for which inspection certificates as to quality and condition have been issued.

The recent accession of interest in standard grades on the part of eastern products is pointed out as a notable development in the standardization program. In Virginia, for example, 500 apple growers this year have organized standardization rings and are collectively advertising their brand in connection with the federal grades. The Georgia peach crop this year for the first time was packed on the United States grades, approximately 8,000 cars being inspected and certified at shipping point on this basis.

**Two-Year-Old Ayrshire Has High Year's Record**

B. M.'s Canary Bell, a two-year-old Ayrshire owned by the Kansas State Agricultural college, has just completed a year's record of 9,315 pounds of milk containing 329.73 pounds of butterfat. She is the fifth daughter of the senior herd sire, Bell's Melrose, to complete a year's test, thus awarding to this remarkable sire the honor of five daughters that, as two-year-olds, average 11,007 pounds of milk and 411.24 pounds of butterfat. B. M.'s Canary Bell is a daughter of Melrose Canary Bell II, former world's record two-year-old, and a grand-daughter of the famous old Canary Bell that made 744 pounds of butterfat in a year.

The college Ayrshire herd is nationally known for its high-producing cows, having developed more class leaders and world record cows than any other institutional Ayrshire herd in America. Two world record cows and three French cup winners have been developed here. Of the 16 Kansas class records for 300 and 365 days, ten are held by K. S. A. C. Ayrshires. There are 12 Ayrshires in the college herd at present that during three years averaged 12,139 pounds of milk and 448 pounds of butterfat. A four-year-old Ayrshire produced 1,862 pounds of milk and 68.73 pounds of butterfat during September.

**Make Hens Exercise**

Feed the grain in a deep litter on the floor and make the hens exercise for it. The mash may be fed either wet or dry, and should be so regulated that the fowls will get about equal parts of mash and of the scratch grains. It is necessary to give the fowls plenty to eat to get good results, but the birds should always be eager for each feed. In cold weather feed about one-third of the scratch grains in the morning and two-thirds at night. In this way the hens are forced to exercise more than if they receive all the grain they desire at the morning feed.

**Mailing Many Kinds of Seed and Plants**

Proper Selection and Packing Are Most Essential.

(Prepared by the United States Department of Agriculture.)

Seeds, plants, scions, grafts and other plant material intended for propagating purposes may be shipped long distances if properly selected and packed. Long sea voyages through the tropics are particularly severe on plant material, so that great care must be exercised where such journeys are involved.

The United States Department of Agriculture has prepared a new circular, Department Circular 323, for the information of persons who are in the habit of mailing various kinds of seed and plant material—to show how to collect, label and pack living plant material for long-distance shipment. It is based largely on the observations made from a great number of shipments which the department has received from all over the world, packed in many different ways and by many different people. The manner of packing the particular shipments which have come through severe conditions of climate and distance in a satisfactory manner is noted and recommended for practice.

It may not seem important, says the circular, to follow some of the directions given. But so many failures and disastrous results have occurred from variations from the directions that the department feels compelled to urge that they be followed as closely as practicable in all cases. Neglect to sew the cloth coverings on the packages properly may result in a total loss of the valuable material. Leaving off the dry burlap wrapper and substituting newspaper therefor may cause the sweating and molding of a collection of valuable scions or budwood. Too much care cannot be given to the selection of clean, healthy plant material.

A copy of the circular may be secured while the supply lasts from the United States Department of Agriculture, Washington, D. C.

**Legume Hay Is Favored for Farm Flock of Sheep**

There is no better feed for sheep than good legume hay. Alfalfa is perhaps the best. Red clover and Alsike nearly as good, and sweet clover is fine if well cured. Sweet clover is rather difficult to cure, however, and moldy sweet clover hay has caused much trouble and many deaths.

Wild hay is good for part of the hay. Some millet is good, but should not be fed to excess. Corn stover is well liked by sheep, but corn fodder should be fed sparingly lest they get too much grain. One ear of corn per day is enough for a ewe, and keeping to that limit will not permit the feeding of many stalks where there is much yield of corn. Straw is good for a part of the roughage, but sheep should not be allowed to run to straw stacks, for straw, chaff and beads will get into the fleece and injure the sheep and lower the value of the wool.

Timothy hay is one of the poorest feeds for sheep on account of its constipating effects, and constipation is one of the enemies of pregnant ewes.

**Forcing Rhubarb During Winter Is Easy Problem**

Forcing rhubarb in winter either commercially or for home use is comparatively easy, and should be carried on much more generally than it is at the present time, as a supply of this very appetizing dish can by this means be had from January until the early spring. The roots for forcing are dug in the late autumn before the ground freezes, care being taken to preserve all the buds on the crowns, and to keep as much of the earth adhering to the roots as possible. Past experience has proven that roots that have been completely frozen force much quicker. It will require at least ten days of quite severe freezing to put the roots in good condition for forcing.

When the time comes to bring in the plants, a dark cellar should be available where a temperature of 50 degrees to 60 degrees Fahrenheit can be maintained.

**FARM FACTS**

Drain barn lots with ditches or tile. Fill in low places with rock or gravel.

Burning woods is double economic murder; it kills trees and humus.

Feeding high-value feed to low-value live stock is like walking on quicksand.

If you wish to get the most for your money out of fertilizer put it upon analysis.

Sanitation, administered in regular doses, is the best medicine for poultry, sheep and pigs.

It is better to let the pullets roost in the trees than to crowd them in the laying house. A mature pullet needs at least seven inches of roost.

The old-fashioned farmer who sneered at scientific farming now has a club-boy son who uses science to beat his dad producing crops and live stock.

**MONARCH**

for 70 Years QUALITY

As Monarch Coffee excels ordinary coffee, so Monarch Tea and Monarch Cocoa give evidence of their superiority at the first trial.

A Good, Clean Business Proposition—Experience not required. Open to Man or Lady with capital. Details, Box 231, Chillicothe, O.

She Threw Away Calomel and took Beecham's Pills

"I felt so miserable," said the young woman cashier in a fashionable New Jersey hotel. "A friend suggested calomel and I was about to take it."

"Another friend noticed the calomel on my desk and cautioned me against it. She said her sister took calomel and ate some fruit and the combination 'salivated' her—loosened some of her teeth and made her very sick."

"Fearing that my stomach might be in an acid condition, I bought a 25c box of Beecham's Pills and took a dose. The next day I felt fine and I haven't needed anything during the three weeks since."

"I wouldn't take anything but Beecham's now. Some of the other girls here take Beecham's and all say they are wonderful."

At all druggists—25c-50c.

**Beecham's Pills**
