Sheep and Lambs—Sheep, \$3@10; lambs, \$11@18.

**Coconut Bombs Are Found in Public Library**  
Honolulu.—When a new librarian, Albert Pierce Taylor, took charge of the public archives here a short time ago he stumbled over an old chest tucked away in a corner.  
Taylor, a former newspaper man, wanted to know all about it. The box contained relics of the overthrow of the monarchy, he was told by a veteran assistant; exhibits held for the long-delayed hearing of claims against the American government by British subjects imprisoned when Queen Liliuokalani was dethroned.  
"But what are these three old coconuts doing in here?" Taylor wanted to know, as he rummaged through the trash. No one could answer, and the librarian was about to toss the aged palm seeds away when he took second thought and telephoned for the advice of some army officers.  
The coconuts were taken carefully out to Fort Shafter and still more carefully pried open. Enough dynamite was found in them to have blown the archives building into the extinct crater of Punchbowl.  
Taylor had unearthed a few of the revolutionists' home-made bombs.  
**Significance in Name**  
Radio vacuum tubes are called "valves" in England, because they let electricity through in one direction and not in another.

**Bar Cross-Words**  
Harrisburg, Pa.—Employees of certain departments on Capitol hill have been notified not to indulge in the cross-word puzzle pastime during working hours, and inspectors are making the rounds to check up on any cross-word fans.  
**Turkey's Fur Trade**  
Nearly 10,000 marten and fox fur skins are sold in Turkey in some months.

**Fight Cane Pest With Bombs From Airplanes**  
Honolulu.—Negotiations for the use of army airplanes to "bomb" the sugar-cane fields of Hawaii with preventive dust in the fight against the eye-spot pest are in progress between headquarters of the Hawaiian department of the army and the Hawaiian Sugar Planters' association, and it is expected that the initial experiment probably will be made within a few months.  
The work will be along the same lines as the method used in Texas and other states where airplanes have been used in dusting cotton fields to combat the boll weevil. The estimated annual loss to plantations on Oahu through the effects of the fungus causing the eye-spot disease is \$100,000.  
The average size hen egg weighs about 24 ounces to the dozen.

**Fur, Crystals and Beads Style for Decorations**  
When one considers the ravishing beauty of the materials of today one readily understands why the smartest costumes are frequently devoid of any elaboration other than a broad band of fur or a cleverly placed motif of embroidery or bead work. A striking instance of the use of a single motif is seen on a frock of white satin with scant folds drawn to one side and held in place with an exquisite ornament made of crystal and multicolored beads. Fur is perhaps more generally used on evening gowns than any other trimming and varies from narrow bands of sable or mink edging the flounces of a frock of gold lace to a knee-width border of chinchilla on the skirt of a straight frock of white velvet. White velvet occupies a foremost position as one of the fashionable materials for evening gowns and coats and is especially lovely when chosen for a coat made on the lines of a tailored street coat and collared with fox or ermine.  
**Quite the Fashion**  
Cotton gloves once were regarded as the distinguishing mark of the New England spinster. Today they are being worn under the name of "fabric" gloves or "suedette" gloves by the best dressed women of the country. The favorite designs are of the soft gauntlet strapped wrist type.  
**Yellow Hats**  
Hats of yellow felt, bound with yellow ribbon and trimmed with a fan-shaped cocarde or very flat bow, are very attractive with white sports frocks.  
**Three-Piece Costume**  
The coats of the new three-piece afternoon costumes continue to be fur-trimmed, but the broad heavy bands of fur are conspicuously absent. In their place is a narrow edging of beaver, ermine or cone at collar, cuffs and hem.

# Announcing PAIGE - JEWETT Sales and Service

**WE** take pleasure in announcing that we have been appointed to handle the sale and service of Paige and Jewett cars in this territory. We have searched the entire automobile field. We have compared the new Paige and Jewett point for point with other cars at or near their prices and we have failed to find anything to equal them.

We have compared the new Paige-Jewett motors with all types—sixes and eights. In our opinion there are no motors built today that will equal these perfected sixes in Paige and Jewett cars.

**New Performance**  
Five minutes at the wheel and you will know why we decided to represent Paige-Jewett. You will know why we were unable to find motors to equal the amazing performance of these new Paige-Jewett motors.

Astonishing acceleration! 2 miles an hour to top speed in high without shifting gears. On those rare occasions when you do use second—the new velvet clutch and transmission seem to do the trick for you—no clash—no grind—a simple effortless movement. Women say it makes them feel expert.

New costly balanced crankshafts have eliminated vibration. A new chain drive

for pump and timing shafts with automatic take-up sprocket adds permanent quiet to smoothness. Two years' use of this chain drive in the Paige without a single replacement proved it right—now it is in the Jewett.

And these ample-size big-displacement motors are built to pull powerfully—to do their work economically for years without expensive upkeep.

**New Beauty—New Comfort**  
We have tried to find beauty that equals the custom-built smartness and style of the new Paige-Jewett cars. And we have decided that it doesn't exist.

And such roomy comfort—that leaves you fresh at the end of a day's drive. You ride on balloon tires and new type springs in restful ease. Steering is a new pleasure. Effortless touch control.

Enthusiasm and admiration have greeted these new cars wherever they have been shown. We want you to inspect them—to ride in them and drive them so that you can personally experience the thrill of their amazing performance.

There are no cars on the market today that represent a sounder investment. And you will pay far more to get Paige-Jewett quality in any comparable cars.

We invite all Paige-Jewett owners in this territory to take advantage of our modern service department. You will find trained mechanics here—ready to serve you courteously and quickly. We maintain a complete stock of Paige and Jewett parts.
