Animal Plagues Let Loose.
The true reason for famine prices of some articles of farm produce in Europe is given by Dr. E. A. Watson of the Health of Animals Branch of the Canadian Agricultural department, Ottawa. He says that it comes from disorganization and paralysis of the veterinary service in many parts of Europe. This has allowed infectious disease to spread from country to country, such as foot and mouth disease. So in several European countries milk, butter, meat and other animal foods are almost beyond the reach of the common consumer. Much suffering and ill health results especially among the children.

Yes, that's a description of the Star Car motor. Try it for yourself. Then it will be more difficult than ever to reconcile Star performance with Star Car prices.
