Memorial to Campus Love.

More than half a century ago a young co-ed and a young bachelor graduate of Indiana university in Bloomington discussed matrimony during a walk on the campus, during which time the young co-ed took two small maple saplings, twisted them together and left them. She remembered the occurrence long after she had married another, told her son of it and he went to Bloomington, hunted over the campus, found the saplings still entwined, grown into a great solid tree trunk, but with the spiral lines showing plainly they had been lashed together long ago and had become one. The son, now a college professor, carried away a picture of the tree.—Ohio State Journal.

Biographical Lore neglected.

A book has been published containing the reminiscences of nearly everybody who knew Robert L. Stevenson very well. Such a work about Theodore Roosevelt would fill a bookcase. We should like to see the personal recollections of all the friends and acquaintances who knew O. Henry in Texas, where his first literary work was done. This is a field of his endeavor which has been singularly overlooked.

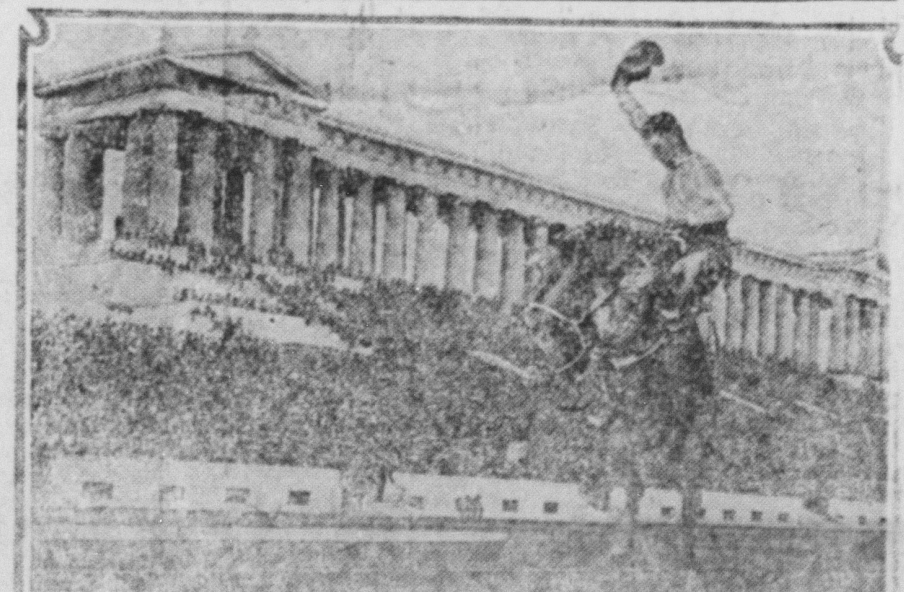

There are other bright lights in literature of whose personality a readable and instructive record might be made before they have receded too far into the past—William Dean Howells for one.

Note how assiduously every shred of information about Edgar Allan Poe is still sought and published and the last remnants that pertain to Walt Whitman, even his scattering contributions to New York Journalism.

Everywhere, and so often, the chroniclers wait until too long after the passing of distinguished literary men before beginning their researches. While their contemporaries are still alive is the time for the harvest.—Exchange.

THE OLD WEST IN ACTION

All highways and byways this year lead enticingly to the Chicago Roundup, and World's Championship Rodeo, which is to be held for nine days, beginning August 15. By cut rate train, boat or automobile, with parties of friends mad up to share the trip, thousands of tourists are expected to be transplanted into the atmosphere of the real West.

Chicago's new \$5,000,000 stadium on Lake Michigan is to become the capitol of American sport through the efforts of the domestic and foreign commerce committee of the Association of Commerce.

The story of the roundup and the rodeo is the story of romance of the real West. Into the nine days of the Chicago event will be packed morndaring feats and dynamic action than is the privilege of many to witness in a lifetime. Tex Austin, producer of the most successful cowboy contests, will organize and manage the Chicago spectacle. Cowboys, cowgirls and bulldoggers, champions all, and bronchos and longhorn steers which have scored mastery, will fight out the battle royal for supremacy.

From the "brush" of the Southwest to the ranges of Canada, the challenge has passed among the buckaroos who have fought out old rivalries at the famous cowboy events in Cheyenne and Pendleton. Not only seeking the glory of victory, they also will compete for more than \$30,000 in cash prize put up by the Chicago association. This is the largest amount given anywhere this year for cowboy contests. "Outlaw" horses, called the worst on the ranges, already are under contract with Tex Austin. They can't be ridden, is the promise of their owners. Carloads of steers, conditioned through the summer into their greatest strength, will defy the wits of the "bulldoggers."

The stadium itself is the world's wonder work of architecture. Its massive colonnades look down upon a huge arena and tiers of seats for 75,000 persons. It is set in the ring of boulevards and parks and on the lake front, which have won for Chicago the title of the "vacation city."

The roundup and rodeo will solve your vacation problems, so tell Mother and Sister and the Kid Brother to quit fretting over the summer's plans and get ready for the thrills of their lives.
