While crossing on the second island bridge below Lock Haven, on Friday, Mr. and Mrs. A. E. Kerlin and driver, C. E. Flink, ran onto a jam that had just taken place when three cars collided. A peculiar condition was that the three cars were from Butler county, but were not traveling together except at this point. One of the cars was occupied by F. D. Shultz and wife, both of whom were injured. The wrecked cars almost completely closed the bridge to traffic, so close at least that a cop gave a commending glance to Mr. Flink as he nosed the Packard through a margin of an inch.

Local Mill Again In Operation.

The flouring mill of Bradford & Co., at Centre Hall station, a few days ago opened for business after a shut-down of a few months in order that a complete renovating of the plant might be made. An expert millwright has just finished a fine job of erecting the latest improved machinery for the manufacture of the best grade of flour, and other machinery essential to a well-conducted flour and feed manufacturing establishment. The machines have individual electric motors, supplanting the old-type steam engine for power, and consequently there is an added cleanliness about the place, such as is found in the more pretentious milling plants.

The local firm feels a sense of modest pride in their new plant, and rightly so. They wish to be remembered when the need arises for anything in their line, especially high-grade flour. They are back of their product, and stand ready to serve only the best at all times.
